STABLISHED PORATION

CARD.

We thank our friends and customers for their liberal patronage during the past three years. It has enabled us not only to keep the volume of our business up to what it was before the hard times began in '93, but to make a material gain each year as well.

This has been accomplished in the midst of general depression and decline in values, and, therefore, we deem it fitting to express our appreciation of our customers' favors in this, the most conspicuous place in our '97 seed annual.

That some of the features peculiar to our business may be better understood and taken advantage of, we bey your careful consideration for the following, viz:

Golden Roll of Honor, (see pages 10 and 11).

Bureau of Registry and Information, (see page 22).

Spraying Calendar and Insecticides (see page 53).

We Double It (see pages xii and xiii).

Our Publications (see page xx).

Free Delivery (see third page of cover.)

We devote but little space to Agricultural Hardware, Implements, Machines and Woodenware in our seed annual, because we have in the printer's hands the most complete and elaborate catalogue of these goods (see page xxi) ever published in the world. This work will be sent free on application to customers.

We assure those who entrust us with their business that the same care and fidelity will be observed in caring for their interests that have been heretofore exercised by us and those associated with us.

Entrance at the "Big Clock" 51 and 52 North Market St., also entrances at 46 Merchants Row and 21 1-2 North St.

BOSTON, MASS.

Juft Brocker for (CORPORATION.)

FLOWERING BULBS, For Fall Planting.

Our illustrated Bulb Catalogue is issued annually in September. We mail it free to all interested. The Bulbs we offer are grown under contract in Holland, especially for us and are of unsurpassed quality.

FLORISTS .- We publish a special list of

Flower Seeds, Bulbs and Requisites,

For florists' use. Mailed free to florists on application.

We publish a special catalogue for

Market Gardeners, and Large Farmers,

Who grow for market.

OUR GUARANTY.

First.—Our seeds are guaranteed pure and clean, and of the percentage of vitality named on the label accompanying and describing contents of each package.

Second.—This guaranty is subject to the test and analysis of the botanist of any of the State experiment stations, and to properly authenticated complaint being made to us within twenty days from time of purchase of seeds complained of. If the result of the analysis does not confirm the guaranty, we will take back the seeds, and refund the money paid for them, and pay the cost of transportation both ways.

Third.— Seeds once sown, or the above specified time for complaint having expired, our responsibility ceases. The results in field culture depend upon so many things besides the quality of the seeds, that the growth and crop cannot be guaranteed.

The advantages of this method of guaranty will at once be apparent to the careful farmer; it will give security as to vitality, freedom from noxious weeds, and to some extent, confidence as to varieties planted; in short, by obtaining seeds a few days before they are required for planting, you can have, without cost (for we assume expenses if results of tests are unsatisfactory), a warrant against almost everything except the visitations of Providence.

Our Golden Roll of Honor.

AST year, for the purpose of establishing our GOLDEN ROLL OF HONOR, we invited those who had traded with us, either as buyers or sellers, for forty years or more, to advise us of the fact with particulars as to length of time of their dealings with us, and of any features of interest that have been connected with the same during these long periods of years.

The result has proved quite a surprise to us; we realized we had a great many "old friends," but our estimate of their real number was altogether incorrect, for letters and visits from old customers soon began to be a daily occurrence, and it is quite a common thing to hear persons, frequently strangers to one another, who had come into our store to make purchases, as they had done for forty, fifty, sixty, and in some instances, even seventy years, exchange experiences of the olden time, and speaking of their satisfactory dealings with the three generations of Brecks.

It gives us great pleasure to reproduce here pictures of a few of these friends, and to subjoin a list of the names of those residing in Massachusetts, who either visited or wrote us during the past year. Two of these are especially remarkable, namely, Franklin King, Esq. (of E. & F. King), Boston, and George Bird, Esq., North Cambridge; both of these gentlemen

The following letter from Hon, Benjamin G. Smith, the well-

known eminent horticulturist, speaks for itself;

personally supplied their wants at our store in 1896, as they have done every year since 1826.

We were also favored with some correspondence from Fearing Burr, Esq., Hingham Centre, author of *The Field and Garden Vegetables of America*, in which he not only feelingly referred to his early acquaintance with the late Hon. Joseph Breck, founder of this business, but to many others who were associated with it more than half a century ago, including Mr. Charles Willis, father of our own "old" Mr. Willis, who retired from active life some three years ago, after a continuous service of sixty-four years.

DAVID C. ROBBINS, ESQ., A Customer for 60 Years.

FIRST PRIZE COLLECTION OF VEGETABLES.

Exhibited by Mr. H. R. Kinney, Worcester, Mass., at the Massachusetts Horticultural Society's Show. The Second Prize was awarde? o Messrs. Warren Henstis & Son, Belmont, Mass. Both lots were grown from Breck's Seeds.

Breck's Seeds Produce Prize Crops

Because they are grown by Specialists from Pedigree Stocks, and are tested before sold.

There were but few Horticultural or Agricultural Exhibitions of any importance in the United States, during the year 1896, at which the product of Breck's Seeds (Flower and Vegetable) was not awarded FIRST PRIZES.

\cdots 1897 \cdot

NOVELTIES and SPECIALTIES in VEGETABLES

This list embraces new varieties that are, we believe, meritorious, and standard sorts worthy of special attention.

WORCESTER CARMINE PODDED HORTICULTURAL POLE BEAN.

This bean, offered under many names, is the richest colored and most productive Horticultural Variety producd to date. The pods are of a bright carmine color, very large and well filled with extra sized beans that are also of a very bright appearance. It has so many features to recommend it that we feel sure both the private and market grower will, after a fair trial of it, discard other Horticultural Pole sorts. Pkt., 10 cts.; pt., 15 cts.; qt., 25 cts.; pk., \$1.50.

THORBURN'S VALENTINE WAX BEAN.

An introduction of 1896 that has proved itself worthy of a place among the very best wax sorts. It is without exception the earliest Wax Bean in existence and might be correctly styled the Six Weeks Wax. The pods are very meaty, and with so very little string that they may justly be called stringless. Certainly no other bean has less string or hard shell to the pod as long as they are suitable for cooking. It is the best quality for snap beans of any Wax Bean in use. It is remarkably free from rust, and remains a long time without becoming tough. Pkt., 10 cts.; pt., 15 cts.; qt., 30 cts.; pk., \$2.00.

HORTICULTURAL LIMA POLE BEAN.

This is the Lima bean for New England planters, being three weeks earlier than any other Lima. It is a cross between the large Lima and Horticultural pole beans, and has the shape of the former and color of the latter, while its flavor is a combination of these two finest of beans. It is very prolific, bearing five to seven beans in each pod. Pkt., 10 cts.; pt., 15 cts.; qt., 30 cts.; pk., \$2.00.

LIMA WAX BEAN.

Market gardeners and others who prefer a white-seeded wax bean will find the Lima Wax superior in many ways to the old-fashioned but yet popular white wax variety.

It is branching and vigorous, with an immense amount of foliage; pods are borne in greatest profusion, a single plant often having 60 or more. When in bloom, the plant is completely covered with flower spikes, and as the pods form in clusters they sink beneath the dense foliage, which shields them from light showers, heavy dews, and hot sun, and prevents their rusting or becoming soiled. The pods are the broadest of all wax bush beans, color transparent, glossy lemon wax, which they retain for a long time after being picked. This bean is very productive, handsome color, delicious flavor, and being white seeded makes an excellent dry bean for baking. Pkt. 10 cts.; pt. 25 cts.; qt. 50 cts.

DAVIS' KIDNEY WAX BEAN.

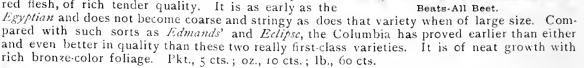

A new white-seeded variety of the Kidney Wax that is sure to be a general favorite when known. It is early, and has all the requirements as to quality, shape, size, productiveness, ripening well to the tip, hardiness, etc., that go to make up the perfect bean either for the private or market grower. Pkt. 10 cts.; pt. 15 cts.; qt. 25 cts.

BRECK'S BEATS-ALL BEET.

This new Beet is without exception the very best variety known to us and is sure to find favor with both market and private growers. It is extra early, of good size, fine form, very smooth, deep blood-red flesh and excellent flavor. The tops are very small, thus allowing it to be grown in rows close together. We recommend it with the fullest confidence for early and main crop alike. Pkt., 5 cts.; oz., 10 cts.; lb., 75 cts.

COLUMBIA BEET.

This desirable Beet was introduced some three years ago. The claims then made for it were many, but time has demonstrated they were all merited. The roots are of a neat turnip shape, with smooth skin and deep bloodred flesh, of rich tender quality. It is as early as the

Wherever this variety has been grown it is a favorite. It is a selection made by the late Josiah Crosby of Arlington, from the original Egyptian, but while it retains the extra early habit of that sort it is in every way superior to it, being of better form, color, quality and appearance. Pkt., 5 cts.; oz., 10 cts.; lb., 60 cts.

BOSTON MARKET CELERY.

There are so many types of celery sold under the name of "Boston Market" that growers of it are surprised if by any chance a plant of the true form is found among their crops. The strain we offer is Arlington grown and genuine. It is, everything considered, the most desirable late crop celery grown and those who know and like the true Boston Market quality can sow this seed with full assurance of getting a crop that will please them in all particulars. Pkt., 10 cts.; oz., 40 cts.; ½ lb., \$1.25.

ROSE-RIBBED, SELF-BLANCHING CELERY.

A sport of the Paris, Golden, Self-Blanching, of which it possesses all the good qualities for which the latter has become world-famed. It has its beautiful golden-yellow color, and differs from it only by the color of the ribs, a pretty shade of rose which deepens as the season advances. This feature gives the plant a pleasing appearance and enhances its value for both table and market. Pkt., 10 cts.; oz., 40 cts.

"We know what your seeds are as we have had them in years past, while we were on the farm. I never had better and seldom as good success with others as with yours."

Mrs. I. D. Berdge, Lynn, Mass.

Boeton Market Celery.

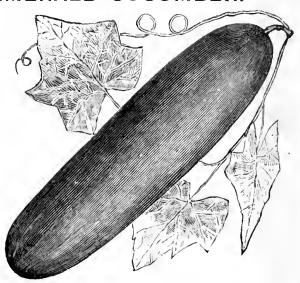

Japanese Climbing Cucumber.

JAPANESE CLIMBING CUCUMBER.

This is a novelty in so far as it combines the two-fold quality of being valuable as an ornamental climber, suitable for covering arbors, summer seats, etc. and at the same time produces a crop of the very best flavored fruit. The vines are of fine vigorous growth, sometimes attaining a height of ten feet. The foliage is a rich, dark green. The plants come into bearing quickly and continue throughout the season. The cucumbers are from ten to sixteen inches long, of dark green color, tender and of delicate flavor. Per pkt., 5 cts.; oz., 10 cts.; lb., \$1.00.

THE EMERALD CUCUMBER.

This variety, the originator says, embraces every good point in the best strains of White Spine, and in addition possess that rich dark green color which has been so long sought for. On sight, its distinct dark green and spineless skin attracts the attention and admiration of every one interested. The flesh of the fruit is peculiarly crisp and tender, and the flavor delicate. The young

fruit make excellent pickles, and when ripe none excel them for sweet pickles. For those who grow under glass, or for long distance shipping, it will prove a boon, on account of holding its deep green color so much longer than any of the other white spine sorts. Pkt., 15 cts.; 2 for 25 cts.; 10 for \$1.00.

"My people here have been very well pleased with the seeds purchased of your firm and will be pleased to continue buying from you." John E. Gould, Little Boars Head, N. H.

EVERGREEN CUCUMBER.

This cucumber has been on the market for some time, and has earned a repu'ation for quantity and quality. A large grower of this variety for seedsmen, states: "After the frost had killed the vines, it really looked as if the fruit entirely covered the ground, when the field was viewed from a short distance." I'kt., 5 cts.; oz., 10 cts.; lb., \$1.00.

EXTRA EARLY CROSBY SWEET CORN.

We offer home grown seed of this famous, early white sweet corn. We believe it to be as early as any corn obtainable, and the name "Crosby" is a sufficient guarantee as to quality. Per pkt., 10 cts.; qt., 25 cts.; pk., \$1.25.

FIRST CROP SUGAR CORN.

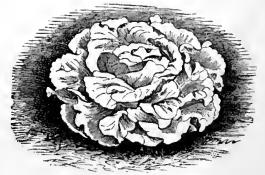

We offer an exceedingly fine strain of this extra early, good quality, sweet corn. It was grown from the introducer's stock under our personal care, and is, through continued selection, superior to the original strain. Per pkt., 10 cts.; qt., 25 cts.; pk., \$1.25.

HITTINGER'S BELMONT FORCING LETTUCE.

We offer seed of this improved forcing lettuce that was grown especially for us by Mr. Ward. This variety is displacing the Boston Market. It is a sure cropper, not liable to dampen off and of extra crisp quality. Per pkt. 5 cts.; oz., 40 cts.

MAMMOTH SILVER KING ONION.

This is one of the largest onions in cultivation, averaging from 15 to 22 inches in circumference, and often weighing from $2\frac{1}{2}$ to 4 pounds each. It is quite early, of fine shape, a little flattened, but very thick. The skin is a beautiful silvery-white color; the flesh, pure white, tender, and very mild-flavored. Per pkt., 5 cts.; oz., 25 cts.; lb., \$2.50.

Hittinger's Belmont Forcing.

WHITE MULTIPLIER ONION SETS.

This is really a White Potato Onion. It is earlier, hardier and more productive than the common yellow or brown variety. It is of fine quality and a remarkable keeper. Per qt., 25 cts.; peck, \$1.25.

SHARPE'S QUEEN PEA.

An English variety that has been tested in this country and found to be an acquisition. It somewhat resembles Stratagem, but is of stronger growth, and fully as abundant a cropper. We recommend market gardeners to try it, because of its large, even-sized pods, fine color, quality, and ready sale in the market. Pkt., 10 cts.; pt., 15 cts.; qt., 25 cts.; pk., \$1.50.

NOTT'S EXCELSIOR PEA.

This new, dwarf, extra early wrinkled Pea is superior in earliness, size, quality and productiveness to both American Wonder and Premium Gem. It grows about half as tall again as American Wonder, and its pods are larger in proportion. Being within a day or two as early as the first early smooth pea, it is sure to supersede other early kinds. Per pkt., 10 cts.; pt., 15 cts.; qt., 25 cts.; pk., \$1.50.

JUNO PEA.

The pods of this variety are remarkably large, long, straight, thick through and well filled. The peas are a very dark green color, and of fine flavor. Pkt., 10 cts.; qt., 30 cts.; pk., \$1.75.

WM. HURST PEA.

Another Extra Early Dwarf wrinkled variety from England. The vines attain a height of 1½ ft., and produce an abundance of bright green pods. Pkt., 10 cts.; qt., 30 cts.; pk., \$1.75.

GRADUS PEA.

This pea represents the greatest advance yet achieved in earliness, for although it ripens with such sorts as Alaska the deep green colored pods are as large and well filled as those of Telephone, with large, wrinkled peas, of fine quality. Pkt., 25 cts.

"On the 6th of April we planted Breek's Excelsior Peas. This was two weeks later than usual. On June 8 we picked a good mess of peas, and we could have picked them on June 6. We think it was pretty quick work," Jos. M. Wade, Fibre & Fabric, Boston, Mass.

LADY FINGER POTATO.

The old-fashioned variety for baking. The Lady Finger is a very old variety, of pretty appearance, and much esteemed as a Baking Polato. The tubers are long and slender, of nearly the same diameter throughout, and when cooked are as white as snow and very mealy;

the eyes are numerous and slightly depressed. Lb., 25 cts.; half pk., 50 cts.; pk., 75 cts.; bu., \$2.00. By mail, 35 cts. a lb., postpaid; 3 lbs. for \$1.00.

"HONOR BRIGHT" TOMATO.

This differs from all other tomatoes in its peculiar habit of ripening and in the firmness of the fruit. The plants are of vigorous habit although the foliage is of a greenish-yellow color. If the fruit is picked in the middle stage of ripening it is the longest keeper of any, hence very valuable for long distance shipping. The skin is crack-proof. The flesh when fully ripe tender and melting and of delicate flavor. The color of the fruit when ripe is bright red, but before reaching this stage it is first green, then waxy white, changing to lemon and la er to red. It is adapted for both home use and marketing. Pkt., 15 cts.; 2 for 25 cts.; 10 for \$1.00.

BRECK'S INTRODUCTIONS.

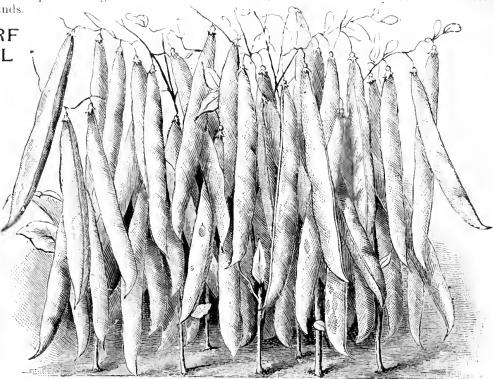

There are annually offered the gardening public new varieties of vegetables that die with the year of their birth because they are either not distinct from or superior to sorts that preceded them. During the past afteen years we have introduced the following kinds: they have withstood the test of time and are generally catalogued by the seed trade although our name does not often appear in connection with them. Being the originators we still give more than usual care to keep these sorts up to the highest standard of excellence, and we confidently recommend them as the best types of the several kinds.

BRECK'S DWARF HORTICULTURAL BEAN.

Pods long, very beautifully colored, and produced with greatest abundance. shell bean for market or family use it is without equal, either in abundance or quality of crops. Pkt., 10 cts.; qt., 25 cts.; pk., \$1.25.

On August 1, 1896, the Massachusetts Horticultural Society awarded Warren Heustis & Son, Belmont, their FIRST PRIZE for the best exhibit of Goddard Beans. They were the product of Breck's Seeds.

ONE CENT

BRECK'S SOYA BEAN.

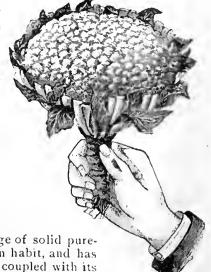

This is the only Soya Bean suitable for profitable cultivation in the New England States. The original seed was brought from Japan in 1891. It is a very heavy cropper, often producing from twenty-five to thirty bushels per acre. The dry beans are white in color and when roasted and ground form an excellent substitute for coffee. As a baking bean they are unsurpassed, while as meal for feeding to milch cows they will produce more milk ton for ton than any other meal or grain. The plant may also be grown for fodder and silo purposes. Pkt., 10 cts.; qt., 20 cts.; pk., \$1.00.

BRECK'S WHITE BOUQUET CAULI-FLOWER.

We cannot say too much in favor of this strain of cauliflower; leading private and market growers all over the land increase their plantings of it year by year, and those who have had most experience with it sreak loudest in its praise. When introducing the White Bouquet in 1890, we claimed it to be in all respects equal at least to any other sort in cultivation. Now a great many of our customers, who have grown it, claim it is better than all other sorts, no matter at what price offered. We have continually aimed to improve the strain, if possible, by selection, and we feel we have succeeded in producing a type that is without an equal, either for forcing or open-ground

cultivation. It is earlier than any other cauliflower, produces a larger percentage of solid purewhite heads, averaging ten inches in diameter, is dwarfer and more compact in habit, and has no useless rank-growing outer leaves to take up space. Its natural early maturing, coupled with its neat form of growth, make it peculiarly suitable for growing under glass during winter or spring. We own the entire seed stock, and every package of the genuine will be sealed with our trade-mark. 1kt., 25 cts.;

oz., \$3.50; 1/4 lb., \$12.00.

BRECK'S PREMIUM SWEET CORN.

This Sweet Corn has obtained for itself a substantial place in the esteem of our market gardeners, by whom it is pronounced an unequalled variety

for market purposes. It is a few days later than Cory, but of so much better quality that it is grown by many to the exclusion of all others. Its qualities are large size, earliness, pearly whiteness and delicious flavor. It is unsurpassed as a main crop variety for the home garden; we especially recommend it to those who desire both quality and quantity. Pkt., 10 cts.; qt., 25 cts.; peck, \$1.00.

BRECK'S FORCING WHITE SPINE CUCUMBER.

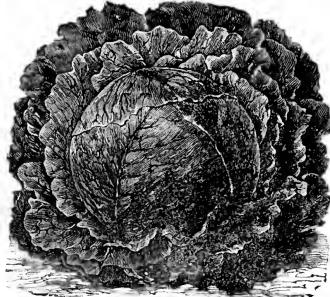

This is a very fine strain of the White Spine for forcing. The seed we offer was raised under glass from selected specimens and will, we think, give satisfaction to all who plant it. Pkt., 10 cts.; oz., 40 cts.

BRECK'S BOSTON MARKET LETTUCE.

This is a fine selection of the White-seeded Tennisball, and is exceedingly valuable for forcing. We recommend it, with much confidence to all who prefer the Boston Market type. Per pkt., 10 cts.; 02., 40 cts.

BRECK'S PERFECTION RED CABBAGE.

This, the best strain of Red Cabbage yet introduced, was awarded first prizes at shows in eleven different States in the Union, senson of 1896. The

Perfection Red Cabbage.

market gardeners of Boston prefer it to all others, because of its color, size, compactness of growth, certainty of heading and solidity. Our stock was originally procured from S. P. Buxton, Esq., of Peabody, Mass., and great care has been taken to select and improve the type. We recommend it to all who grow red cabbage. Pkt., 10 cts.; oz., 40 cts.; lb., \$4.00.

BRECK'S PREMIUM DRUM-HEAD CABBAGE.

This variety is recommended for its immense size and sure heading qualities, as well as for its fine texture, and firmness. It comes in as a second early, and is also a splendid winter sort. Pkt., 5 cts.; oz., 25 cts.; lb., \$2.50.

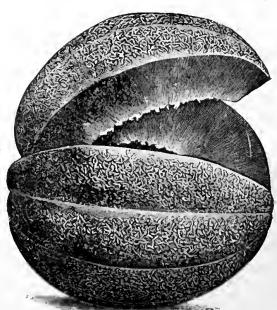

BRECK'S EMERALD GEM MUSK MELON

This variety of Emerald Gem couples size with all the desirable qualities of the original. It has the same thin, dark-green rind, thick, melting salmon-colored flesh, and high flavor. Pkt., 10 cts.; oz., 20 cts.

BRECK'S JAPANESE MILLET.

We are indebted to Japan for this valuable addition to our forage plants. It is superior in every way to Hungarian or the varieties of millet commonly grown in the United States and has already superseded them in many sections. The seed of this millet constitutes an excellent grain for hens, and when ground is a wholesome, nutritious, and economical food for cattle. The plants attain an average height of six feet, are short-jointed, and at every joint there is put forth an immense number of long, thick, fleshy leaves that increase its value as a cattle food. The heads average a foot in length and over six inches in

cattle food. The heads average a foot in length and over six inches in diameter. Pk., 50 cts.; bush., \$1.50. Subject to special offer No. 3 only.

BRECK'S DANVERS YELLOW GLOBE ONION.

The name Danvers' Yellow Globe is now applied to so many different strains of onions that purchasers of it are frequently disappointed in crop produced. This onion originated in the town of Danvers, Mass. and it is to Essex county, Mass. that we must yet turn for the most desirable and true type. Our strain has been brought to the highest state of excellence by continued selection and care in growing and we recommend it as being superior to all others. Pkt., 05 cts.; oz., 25 cts.; lb., \$2.00.

BRECK'S EXCELSIOR PEA.

This is the favorite extra early pea with the leading growers for Boston market and has been the first "native offered in Boston for a number of years. The peas are of medium size, slightly wrinkled and of fine flavor. The vines attain a height of from two and a half to three feet and produce abundantly. Pkt., 10 cts.; qt., 30 cts.; pk, \$1.25.

"When filling my order for flower seeds, sent yesterdny, please add a quart of Breek's New Life Peas. I grew a few last year and never had my sight and taste more gratified."

F. A. WILLARD, Hope Greenhouses,

Providence, R. L.

BRECK'S NEW LIFE PEA.

The Rural New Yorker says:-"The most productive pea, and all things considered the most valuable pea for home or for market of its season, that we have ever tried. That's saying a good deal, for we have tried nearly every pea, old and new, from year to year for twenty years."

The New England Farmer says: - Breck's New Life is a strong, stocky grower. "The pods are as large as the Stratagem and are produced abundantly. Both pods and vines retain their bright green color for a long time." Pkt., 10 cts.; qt., 30 cts.; pk., \$2.00.

BRECK'S CHANCE POTATO.

This potato is a thoroughbred and bred for quality but we find by the report of the Maine State Agricultural college that it is also very productive. In the trials made at that station last season the Chance was grown side by side with three other leading kinds (the station has not given us the names of these sorts) and produced a much heavier crop than either of them; from 100 pieces planted there were harvested 134

pounds of Chance, while the others produced 75, 93 and 114 pounds respectively.

The vines are of vigorous growth. The tubers are ready for table as soon as those of Pearl of Savoy (which was originated by us some ten years ago, and is to-day perhaps the most popular early kind grown). Under ordinary cultivation the crop is abundant, and as a keeper they are unsurpassed, but the greatest merit of the variety is QUALITY, in this particular they are much superior to all other kinds.

Quality is the leading feature, and if you are a potato grower you must know that quality, and in fact everything else desirable, in most potatoes of recent introduction, have had to take second place, if only earliness could be obtained Pkt, 50 cts.; bushel, \$1.50; barrel, \$3.50.

Potatoes are subject to special offer No. 3, only.

Alexander McGaw, So. Braintree, Mass. who has been A SATISFIED CUSTOMER OF OURS FOR OVER FORTY YEARS, was awarded at the South Weymouth Agricultural Society's Show, First Prizes on Breek's strain of Extra Eurly Crosby and Minnesota Sweet Corns.

"Yours were the best seeds we ever bought from any firm, and you shall have our order next year as well as orders from many other parties in this neighborhood,"

JOHN GRAPE & CO., Market Gardeners, Wankesha, Wis.

Breck's Belmont Tomato.

BRECK'S BELMONT TOMATO.

This tomato combines in itself three desirable points of merit seldom found in any one variety, namely, earliness, productiveness and quality. The fruit, which is of average size, does not crack, and is borne in clusters of four or five, is perfectly round, solid, free from rot, and bright scarlet in color. It has a very fine flavor, very few seeds, no core, and remains firm a long time when ripe. The vine is of vigorous growth and very prolific. Pkt., 10 cts.; oz., 40 cts.; lb., \$4.co.

Among our other introductions of rare merit are the following, particulars of which will be found under their respective classes in the body of this catalogue.

Breck's Hub Asparagus, Breck's Jersey Wakefield Cabbage, Breck's Premium Flat Dutch Cabbage, Breck's Angel of Midnight Flint Corn, Breck's Boston Market Enslage Corn,

Breck's System for Laying Lands down to Grass for Permanent Pasture and profitable Mowing.

A Few Forage Plants Worthy of Trial.

(SPECIAL OFFER NO. 3 ONLY APPLIES TO THESE.)

CRIMSON, GERMAN OR SCARLET CLOVER.

Owing to articles in the agricultural papers a large inquiry was made last year for this clover. It was first introduced from Italy into our Southern States, and has gradually found its way north. It is recommended as being a valuable green manure crop and for an April green-food crop for cattle, or it can be made into hay during May. Sow broadcast during July or August at the rate of fifteen to twenty pounds per acre; it may be sown among corn at the last hoeing, and it will make a good "catch" on stubble land by merely harrowing the soil with a heavy spading or disk harrow. Per lb., 12 cts.: 100 lbs., \$10.00.

GRAY WINTER OR TURF OATS.

The great value of these oats is just beginning to be appreciated, because they can be sown like wheat in Fall; they are hardy and will stand as much cold as that crop, after they have got well started. They should be sown broadcast at the rate of 1½ bushels per acre, in August or September in New England, and further South up to the middle of October. They make a good growth before winter sets in, and furnish excellent grazing during late Fall and early Spring, without injury to the grain crop afterwards. Their turfing and stooling qualities are remarkable, and even when thinly sown, they will, under anything like favorable conditions soon spread and cover the ground with a thick, heavy growth. The yield of grain on good soil is frequently from 50 to 70 bushels per acre; the grain is a dark gray color, with distinct strip, and often weighs from 35 to 40 pounds per measured bushel. These oats may also be used for Spring seeding, and if put in early in April will produce a much larger crop than the ordinary oats. Per pk., 50 cts.; bush., \$1.50.

WONDERFUL PEA.

The great demand we had for this pea last season was quite surprising, and the supply of seed was somewhat limited. Following is description:

"It may be that this new variety will not find much favor with either market or private growers who wish to harvest a crop of well-filled pods only, but if it in a reasonable degree answers the originator's description, we think farmers who

desire to increase the flow of milk or fatten stock economically, will find a valuable addition to their list of fodder and ensilage crops as well as a plant that will improve the soil in which it is grown by collecting and storing nitrogen in its roots, which gradually decay and furnish plant food for succeeding crops. The originator says the plants make a growth of from twenty to forty feet and are literally covered with large pods, each containing about twenty peas of excellent quality both in the green state and dried." Per pkt., 10 cts.; qt., 20 cts.; pk., \$1.00.

F. A. Wolfe was awarded with the product of Breek's seeds at the great Oregon State Fair:—

FLAT FORAGE PEA (Lathyrus Sylvestris Wagnerii).

This is rich food for cattle, hogs and sheep. It will grow on land too poor to pay the cost of cultivation, and after becoming firmly established will yield for years large crops of fodder suitable for pasture or hay. The seed requires several weeks to germinate, and growth is slow the first season. The land should be ploughed deeply and thoroughly worked. Plant the seeds very thinly in drills one foot apart. Pkt., 10 cts.; 02., 20 cts.; lb., \$2.00.

DWARF ESSEX RAPE.

This is very valuable for sheep pasture. It can be sown in May, and will be ready for pasturing in July or August, or, it may be sown in June, or even up to the latter part of July, and yet turnish, under reasonably favorable circumstances, a large amount of pasture or fodder. It is very suitable for sowing on land that an early crop of potatoes has been taken off. In drills, about 6 lbs. to the acre; broadcast, 10 lbs. to acre. Lb. 15 cts; 100 lbs., \$8.00.

SACALINE.

(Polygonum Sachalanense.)

While this plant may not have come fully up to the expectations of planters, it has considerable merit as the continued demand for it shows, therefore, we again give it space in our book.

The introducer says:—"It is perfectly hardy; once planted, stands forever; requires no cultivating or manuring, endures the severest drought with impunity. Thrives equally well on wet or dry soil. The young shoots and leaves may be eaten as a vegetable. The stems and leaves, green or dry, are greatly relished by sheep and horses. It is more nutritions than clover and produces from fifty to a hundred tons of green fodder per acre."

The seed should be started in the same way as Cabbage, and the plants, when large enough, set out four feet apart, each way. Pkt., 10 cts.; oz., 40 cts.

We offer true and pure home-grown roots of this wonderful new forage plant at 10 cts. each; \$18.00 per 100.

SPURREY.

(Spergula Arvensis.)

Since the recent introduction of Spurrey, there is a bright outlook for owners of barren, sandy land in the United States. Spurrey is an annual; its value has been recognized and appreciated in Europe for a great many years. It is cultivated on the barren soils of France and Germany, and as winter pasturage for cattle and sheep. It grows on sand that is too dry and thin to support clover, and so rapidly that three sowings may be made in one season. The crop may be fed both green and dry. About twenty pounds of seed is required for an acre, and it should be broadcasted and harrowed in same as clover. As a fertilizer for ploughing in, Spurrey will undoubtedly prove of much value, because it grows quickly on soils that will scarcely produce a green blade of anything else. Per lb., 10 cts.; per 100 lbs., \$8.00.

II. R. Kinney, Worcester, Mass., won THREE FIRST PRIZES for Beets grown from Breek's Seeds at Worcester County Horticultural Society's exhibit, including one for OUR STRAIN OF CROSBY'S EGYPTIAN.

The First prize for the BEST COLLECTION TABLE BEETS at the exhibition of The Valley Fair Association, Vt., was awarded to John E. Gale, Guilford, Vt. They were grown from Breek's Seeds.

SORGHUM.

The following forage plant seeds subject to special offer No. 3, only.

Early Amber Sugar-Cane. Ripens where Indian Corn matures. Per lb., 15 cts.; per 100 lbs., \$8.00.

Early Orange Sugar-Cane. Ripens about ten days after Early Amber. Fer lb., 15 cts.; per 100 lbs., \$8.00.

Brown Dhoura Corn. Per lb., 15 cts.; per 100 lbs., \$8.00.

Yellow Branching. (Yellow Millo Maize.) It is non-saccharine; used only for the large amount of foliage, green feed or cured folder that it furnishes, and for its grain. Per lb., 20 cts.; per 100 lbs., \$10.00.

White Branching. (White Millo Maize.) The merit of this non-saccharine Sorghum is, that when cut for feeding it starts again from the remaining stumps with renewed strength and vigor; thrives in the hottest and driest localities. Per lb., 20 cts.; per 100 lbs., \$10.00.

Red Kaffir Corn or Sorghum. Non-saccharine. The plant is low, stocky, perfectly erect. The whole stalk as well as the blades, cures into excellent fodder, and in all stages of its growth is available for green feed. Per 1b., 15 cts.; per 100 lbs., \$8.00.

White Kaffir Corn. Per lb., 15 cts.; per 100 lbs., \$8.00.

White African Sorghum, African Millet, or White Dhoura. Per lb., 15 cts.; per 100 lbs., \$8.00.

Jerusalem Corn. One of the best and surest for dry countries and seasons. Grows about three feet high, with one large head on main stalk and several smaller heads on side shoots. The grains are white and nearly flat. Per lh., 15 cts.; per 100 lbs., \$8.00.

VETCHES—Spring Tares. (Vicia Sativa.) Sown broadcast at rate of 1 to 1½ bushels to the acre like wheat or barley, and sometimes mixed with oats for soiling. Used in France and Canada as a substitute for peas. Also ground up into flour, after which it is mixed with wheat flour for making bread. A valuable plant. Per qt., 20 cts.; per bush., \$3.00.

Female Mercantile Department,

Supplies approved Female Bookkeepers, Cashiers, Stenographers, Saleswomen, Young Ladies for Office Work, etc.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining.

How well we have succeeded is shown by the rapid growth of this Department of our business, and the many voluntary statements received concerning its convenience and the high grade of employees furnished.

We mail free on application circulars descriptive of our Bureau and blank forms whereon employers can

state particulars necessary to guide us in selecting suitable employees.

Our Bureau of Registry and Information has certainly improved and elevated the service and we believe

it will continue to do so, besides supplying a long-felt want.

We take this opportunity to thank our customers for the business given us and to assure them that our Bureau was never so well prepared to serve them as now; those who have not as yet patronized it are invited to do so, and give us an opportunity to practically demonstrate the benefits to be derived from its use.

Yours respectfully.

URS is the oldest and the targest business of the kind in New England. The honest representations made of the seeds offered from season to season are appreciated by descendants of customers who became familiar with our establishment almost three-quarters of a century ago; their recommendations annually bring us new patrons. If our methods of doing business are unknown to you, some of your neighbors can tell you of them, and also of the quality of our seeds; inquire, and if results warrant it, send us a trial order. We supply only tested seeds of varieties that experience has shown to be the best.

Note. - Prices may vary as the season advances. Ours will always be as low as the lowest for gums of equal quality.

ARTICHOKE.

German, Artischoke. - French, Artichaut. - Spanish, Alcachofa.

CULTURE. — Sow seed in April in drills t in. deep. Following spring transplant the young plants in rows 2 ft. plant to plant, 3 ft. between the rows. Mulch during dry weather. They prefer rich deep toam, and should be well manured every spring. One ounce of seed sows 30 ft. of drill.

LARGE GREEN GLOBE, grown for the unripe flower-heads, which are produced in abundance from May to August. Packet, 5 cents; ounce, 25 cents; lb., \$3.00.

JERUSALEM, thrives best upon light, hard soil. Cultivated for pickles, also for feeding to sheep and swine Tubers per quart, 25 cents; per peck, \$1.00.

ASPARAGUS.

German, Sparget. - French, Asperge. - Spanish, Espárragos.

(For price on Asparagus Roots, see Vegetable Plants.)

An Asparagus bed may be made from one, two, or three year old roots, planted in October, or during April and May. The bed should be made very rich with well-rotted manure, and thoroughly worked over to a depth of nearly 2 ft. Plant the roots in rows 4 ft. apart, leaving about 12 in between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction. Cover lightly at first, gradually filling the trenches as the plants grow.

Seed may be sown in April in drills 1 in. deep and 1 ft. apart. One ounce of seed sows bo feet of drill.

BORECOLE, or KALE.

German, Blatterkohl. - French, Chou Vert. - Spanish, Breton.

Sow early in the spring in prepared bcds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for cabbage. They are extremely hardy, and will endure quite a low temperature. One ounce will sow 150 feet drill.

WINTER or GERMAN GREENS, "Sprouts," should be sown in August or early in September in rows one foot apart, and treated as Spingels. They make

Spinach. They make Pkt. Oz. Lb. excellent spring greens, .05 .10 .75

.10

1.00

German, Spargelkohl. - French, Chou Brocoli. - Spanish, Bróculi.

One ounce of seed produces about 1,200 plants.

This vegetable somewhat resembles the Cauliflower, but is hardier. In parts of the country where the thermometer does not fall below 20° to 25° Broccoli can be had from November until March. It succeeds best in a moist and rather cool atmosphere. The seed should be sown in May in a seed-pan and the plants afterwards set out in rows two and a half feet apart and eighteen inches between the plants.

BRUSSELS SPROUTS.

German, Sprossenkohl. - French, Chou de Bruxelles. - Spanish, Berza de Brusela

Species of the Cabbage family. It produces along the whole length of the stem small sprouts resembling miniature cabbages. These heads are a great delicacy boiled in the same way as Cauliflower. Seed should be sown about the middle of May in a seed-bed, and the plants afterwards set out in rows two feet or more apart. It is ready for use late in autumn after the early frost. One ounce of seed produces

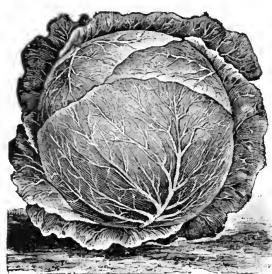

and cultivated like Cabbage. about 1,200 plants.

DWARF IMPROVED FRENCH, of sturdy compact growth. Packet, 5 cts.; ounce, 20 cts.; pound. \$2.50 IMPROVED PARIS MARKET, a most desirable strain. Packet, 5 cts.; ounce, 20 cts.; pound, \$2.50

CABBAGE.

German, Kopfkohl. — French, Chou Pomme. — Spanish, Berza. (For price on Cabbage Plants, see Vegetable Plants.)

All the cabbage tribe requires is the soil to be rich, deep, well-drained, and abundantly manured. For the early kinds, plant thirty inches between the rows and sixteen inches between the plants. For late kinds, three feet between the rows and two feet between the plants. For very early use, sow in January or February, in hot-beds. Set out when the plants are strong enough into other hot-beds, or set in cold-frames in March. Transplant when danger from frost is past to the open ground. For a succession, sow in the open ground last of March or early in April. Late plants are sometimes subject to attacks of the cabbage fly, which destroys them as fast as they appear above ground. To prevent this destruction, sprinkle the plants with wood ashes, air slacked lime, plaster, slug-shot, or tobacco dust, when the plants are wet with dew. One ounce of seed produces about 3,000 plants.

CARDOON.

German, Kardon. - French, Cardon. - Spanish, Cardo Hortense.

Cardoon is grown for the midrib of the leaf, which requires to be planched in the same manner as celery. Sow early in spring, where the plants are to remain, in drills three feet apart and an inch and a half deep, and thin out the young plants to a foot apart in the drills.

Pkt. Oz .30 \$3.00

CAULIFLOWER.

German, Blumenkohl. - French, Chou-fleur. - Spanish, Coliflor. (For price on Cauliflower Plants, see Vegetable Plants.)

Cauliflower is the most delicate and delicious of the cabbage family. For the production of the Cauliflower a rich, deep loam is required, a low moist situation being preferable. A liberal supply of water when possible produces very marked results. Seed of the early variety should be sown in a hot-bed in February or March. For later supply, sow seed in May, choosing a cool, moist place. When large enough, transplant, making the rows about 21/2 feet apart, and 18 inches between the plants. Transplanting should be done in moist weather. One ounce of seed produces about 2500 plants.

BRECK'S WHITE BOUQUET. This we believe
the carliest and most reliable Cauliflower for

German. Sellerie. - French, Céleri. - Spanish, Apio. (For price on Celery Plants, see Vegetable Plants.)

Sow seed the first or second week in April in hotbed or cold-frame. soon as the plants have at-

tained a height of three inches, transplant in prepared border, setting them four inches apart. In order to secure "stocky" plants, cut off the tops once or twice before transplanting into richly manured soil, in rows four feet apart, and from seven to nine inches plant to plant. Keep down all the weeds, and as fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. For winter use it is usually placed in frames and covered with litter, or stored in cold cellars. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board twelve to fifteen inches wide on edge on each side of the row, and to hold them in place tack bits of laths across the rows at the top. One ounce of seed produces about 3,000 plants.

CORN SALAD, or FETTICUS.

German, Lammersalat - French, Mache. - Spanish, Macha Valerianilla.

Used as a salad. It is sown very early in spring, in rows one foot apart, and is fit for use in six or eigh weeks. For early spring use sow in September, and winter in cold-frames, or cover with litter. One ounce will sow acc feet of drill. Large-leaved. Per pkt., 5 cts.; ounce. 10 cts.; pound, \$1.00.

CRESS.

German, Garten und Brunnen Kresse. - French, Cresson. - Spanish, Mastnerse.

Sow early in the spring and at intervals throughout the season, for a succession, thickly in shallow drills, as it soon runs to seed, The Water Cress requires a stream of running water, ditch, or pond, in which it will grow without care, except at first keeping weeds from interfering with it. It is easily introduced by planting along the margins of ditches or streams, and increases rapidly by the spreading of the roots or from the seed.

CUCUMBER.

German. Gurken. - French, Concombre. - Spanish, Pepino.

The first planting should be made early in May on partly spent hot-beds; inverted sods form an excellent medium for

both planting on and for carrying the young plants to their permanent location, or small pots can be used. Such plantings are usually ready for transplanting to the open ground in from three to four weeks, and are seldom troubled with the striped bug. Transplanting, when practical, should be Jone in the evening, into hills four feet apart each way. Thin out to about four plants to a hill when established. The seed may be planted in hills late in May, thus giving a succession. For pickles, plant during the last two weeks of June.

Plaster Dust, or an infusion of Hellebore powder in water, will destroy the striped bug.

One ounce will plant about fifty kills.

LETTUCE.

German, Lattich Salat. - French, Laitue. - Spanish, Lechuga. (For price on Lettuce Plants, see Vegetable Plants.)

The most easily grown of all open-air plants used for salads It requires a warm soil that has had a liberal dressing of well-rotted manure and abundant moisture. To be of a satisfactory quality, the growth should be rapid and vigorous. Seed may be sown in a frame in February or March, the plants set out as early as the ground can be worked, as light frosts will not injure them. Set the plants 9 inches apart in the rows, and 18 inches between the rows. For successive crops, sowings may be made every two weeks up to the end of August. One ounce of seed will produce about four thousand plants. DENVER MARKET an

MARTYNIA.

The seed-pods are used for pickling, and should be gathered when green and tender. Plant in the open ground the last week of May in rows two feet apart, making hills one foot apart in the rows; place several seeds in each hill, and when well up thin out to one plant. One ounce will plant fifty hills.

Eb. Martynia Probeseidia 05 .40 \$4.00

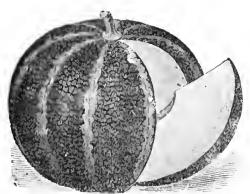

MELON (Musk).

German, Melone. - French, Melon. - Spanish, Melon.

Melons prefer a warm, light, sandy loam; being tender plantings, should not be made before middle of May. Plant about six seeds, half-inch deep, in hills five to six feet apart each way. The hills should have at least a peck of well-rotted compost thoroughly

stirred into each of them before the seed is planted. When well grown thin out to three plants in a hill. If an earlier erop than this method of cultivation allows is desired, the directions given for growing early cucumbers may be followed.

One ounce will plant about sixty hills. Two pounds will plant an acre.

MUSHROOM.

German, Champignon. - French, Champignon. - Spanish, Hongo.

(Special offer No 3 only applies to Mushroom Spawn.)

Mushrooms may be grown in cellars, out-houses, sheds, or under greenhouse benches. The amateur, however, is more likely to meet with success in cellars than elsewhere, as the cool moisture of the atmosphere and the uniform temperature are more congenial to the growth of this vegetable than that in structures above ground. The temperature should range between fifty-five and sixty degrees. Use a mixture of equal weights, fresh horse droppings and loam that has no manure in it. Before placing this mixture in the bed turn it over every day for a week so that it does not heat violently, and be careful to keep it under cover so that it cannot get wet. Then begin to make the bed by spreading thin layers of the mixture, and pound each firm, until you have in all a depth of eight to ten

inches; leave it thus for a few days until the heat runs up to a hundred degrees or over and then declines to ninety degrees; when this point is reached it is ready for spawning, which is done by making holes, three or four inches deep and twelve inches apart each way; into each hole put a piece of spawn about as large as a hen's egg and fill in the hole with compost. At the end of ten or twelve days the spawn will have run through the whole bed. There should then be spread over the entire surface about two inches of fresh loam. Over all place a few inches of straw. All that remains to be done is to keep the temperature as near to sixty degrees as possible; it should never be allowed to fall below forty degrees, or the crops will be both reduced and delayed. Ordinarily, if the conditions are right, mushrooms will appear in about six weeks and continue to come for about a month. In the event of the surface of the bed becoming very dry at any time sprinkle it freely with water at a temperature of about a hundred degrees. After the first crop has been taken off the bed, it should receive a dressing of tresh loam to a depth of half an inch, thoroughly firmed, over the entire surface, and when dry a sprinkling with water as above recommended, and a second crop will soon be had. A brick of English spawn is sufficient for nine square fect of bed.

ONION.

German, Zweibel. - French, Ognon. - Spanish, Cebolla.

The Onion thrives best in rather strong, deep, loamy soil, which should be well enriched with old well-rotten manure or compost, or what is better, deeply trench, add manure the autumn previous to sowing, and lay upon ridges during the winter to soften. Sow the seed thinly in drills about one-quarter inch deep and one foot apart. To ensure quick and safe germination after sowing the seed, the drills should be trod along evenly with the foot, and then raked even, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed. When three inches high thin to two inches apart. Hoe frequently to keep down weeds. In the seed rows where the hoe cannot be used, the soil should be stirred with the fingers, otherwise weeds will quickly grow up and choke the crop. One ounce of seed will sow one hun. dred feet drill; four pounds per acre.

PEAS.

German, Erbse. - French, Pois. - Spanish, Chicaros.

Peas come earliest to maturity in light, rich soils, but for a general crop a deep loam or moderately nearly soil is better. For early crops decomposed leaves or leaf mould should be used; if the soil is very poor stronger manure may be applied. The first sowing will be earlier if covered only one inch deep; those following should be covered two to six linches deep, the deep planting preventing mildew and prolonging the season. Fresh manure, and wet, mucky soil should be avoided, as they cause the vines to grow too rank and tall. All wrinkles Peas are superior to, more delicate in flavor, and remain longer in season than the smooth sorts, but should not be sown until the ground becomes warm, for, as in sugar-corn, the wrinkled appearance indicates the greater amount of saccharine matter.

PUMPKIN.

German, Kurbis. - French, Courge. - Spanish, Calabaza.

The Pumpkin is now little used except for agricultural purposes, the squashes being so much sweeter and drier and finer grained for the kitchen. The farmer, however, finds the Pumpkin a serviceable addition to his feed. The most common and least troublesome method of cultivation is to plant them with corn, two or three seeds in each hill.

Sweet Sugar, round, not large, but very sweet, and an excellent table variety	.05	.10	\$0.60

RHUBARB.

German, Rhabarber. - French, Rhubarbe. - Spanish, Ruibarbo Bastardo.

(For price of Rhubarb Roots, see Vegetable Plants.)

Sow early in the spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall, or the following spring, transplant into deep, rich soil about three feet apart each way. If propagated by dividing the roots, it may be done either in fall or spring, planting it at the same distance apart as given above.

RADISH.

German, Rettig, Radieschen. - French, Radis, Rave, Petit Rave. - Spanish, Råbano.

Radishes require a light, rich, sandy loam; heavy or clayey soils not only delay their maturity, but produce crops much inferior, both in appearance and especially in flavor. For a constant supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot bed in February. For winter Radishes, sow the seed about beginning of July, and keep the roots during winter in a cool cellar, covered with earth. They should be placed in cold water an hour or so before using.

I oz. of seed will sow 100 feet drill; 10 lbs. per acre.

or OYSTER PLANT. SALSIFY.

German, Boksbart. - French, Salsifis. - Spanish, Ostra Vegetal.

The demand for Salsify is increasing from year to year, as its delicions qualities are becoming known. It

is used stewed, boiled, or fried, and sometimes as a salad sliced raw in vinegar with salt and pepper. When cooked it has an oyster flavor, and is commonly called "vegetable ovster." Cultivate and start same as Parsnip. One ounce will sow fifty feet of drill.

SQUASH.

German, Kurbiss. — French, Courge. — Spanish, Calabaza Tontanera.

As all Squash are somewhat tender, they should not be planted out until danger from frost is past. They will grow on almost any soil, but a warm, incllow one that has been well manured suits them best. The hills for bush varieties should be about six feet apart; for running sorts, eight to ten feet. Thin out to two plants to a hill, and in the early stages of growth keep well sprinkled with plaster dust. Bush varieties, one ounce to fifty bills; running varieties, one ounce to twenty hills; four pounds per acre.

TOMATO.

German, Liebesapfel. - French, Tomate. - Spanish, Tomate. (For Tomato Plants, see Vegetable Plants.)

The seed should be sown in a hot-bed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out about four or five inches apart in another hot-bed. About the middle of May the plants may be set in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good show lful of rotten manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. One ounce will produce about 2,000 plants.

TURNIP.

German, Steckrube. - French, Navet. - Spanish, Nabo Comun.

Turnips may be sown at all seasons from April to August in our climate, although those will be the best which are sown very early in spring for summer crop, and early in August for a fall and winter crop. A light soil well manured the previous year is the best; no manure should be applied at the time of sowing, unless it be well-decomposed compost, or the roots would be liable to be bad-flavored. The ground should be dug and ploughed deep and made mellow and fine. Sow the seed of the flat sorts broadcast, and rake in evenly. After they are well up, thin to six or eight inches apart, and keep them clear from weeds. The Ruta Bagn sorts should be sown in drills fifteen inches apart, and for winter use may be sown from the twentieth of June to the middle of July, on land that has been well manured for other crops in spring; thin out as for the early crop One ounce will sow 150-feet drill. Two pounds will sow one acre in drills. One pound will sow one acre broadcast.

GRASSES.

" And he gave it for his opinion that whoever would make two ears of corn or two blades of grass to grow upon a spot of ground where only one grew before would deserve better of mankind, and do more essential service to his country, than the whole race of politicians put together." - SWIFT.

We desire to call special attention to the following list of AGRICULTURAL GRASSES, which will, we think, be found very comprehensive, both as to varieties and descriptions. We are devoting a great deal of time to this most important subject, and the department has already become an extensive

one with us.

Having learned by experience that the so-called imported grasses which are offered by those making a specialty of them in this country are very far from reliable, both as regards purity and quality, we have found it necessary to import all our seeds of this character direct. We have accordingly made arrangements for our stocks with one of the most prominent growers of Agricultural Grasses on the continent, who, by virtue of many years' experience in growing seeds of this peculiar character, has become the recognized headquarters for same. This will enable us to furnish our customers with the very best, and that which we know to be free

from all adulteration.

It seems almost unaccountable that at this day, when the different branches of practical agriculture are seemingly so thoroughly understood, that our American farmers should apparently ignore the importance of sowing upon their fields only those kinds of grasses which are adapted to the soil and climate, and which will produce in the shortest length of time a luxuriant crop of the desired character. The list of grasses now in use by most of our farmers can be counted on the fingers of one hand, which showing is indeed a small one, when we take into consideration the many species, valuable because of their respective merits, which should be in constant demand for the various soils and climates of America.

We invite special attention to our "Mixtures" for Permanent Pastures and Mowing Lands, which follow our descriptions. We have endeavored to bring into prominence a few important facts under the head of Mixtures, which, we think, cannot fail to be of interest to any one who is concerned in the laying down of profitable pastures, or who desires to obtain large crops of hay of choice quality from their fields.

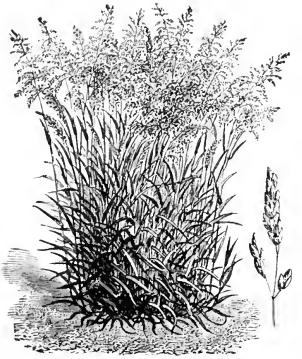

TIMOTHY (Herd's Grass or Catstail) (Phleum Pratense). Root fibious on moist soils; on dry soils often bulbous:

perennial; flowers in June and July. While this grass is (Phl um pratense.) commonly known as Timothy, it is frequently called Herds Grass, as this is the name under which it was originally cultivated. It is, without doubt, a most valuable grass for hay, especially in the North. It thrives best on moist, loamy soils of medium tenacity. Grows very readily and vields large crops on favorable soils. Should be cut just when the blossom falls. The hay is of best quality, yielding, under favorable circumstances, three or four tons per acre.

ORCHARD GRASS (Dacty is glomerata.) Root fibrous; perennial; flowers in June and July. This is one of the most valuable and widely known of all the pasture grasses. Its rapidity of growth, the luxuriance of its aftermath, and its power of enduring the cropping of cattle, all commend it highly to farmers. Thrives well on light soils, and as its roots penetrate to a considerable depth, where the subsoil is favorable it withstands droughts better than most species on dry sandy soil. It is very valuable to be used in a mixture with Timothy and Clover, and produces splendid crops of hay. This grass is sometimes condemned because of its coarse growth, which is only apparent when in a neglected condition, but with proper management no grass is more valuable. When pastured Orchard Grass should never be allowed to become coarse, but should be kept closely cropped. In this condition it is highly nutritive, and relished very much by all kinds of stock.

KENTUCKY BLUE GRASS (Meadow Grass, June Grass, Spear Grass), (Poa pratensis). Root creeping; perennial; flowers in June. This valuable grass is very common in the soils of America, and is claimed by some to be the most valuable of all the grasses in our pastures. On the other hand, some claim that its creeping root impoverishes the soil. It is a fact, however, that it grows very luxuriantly, producing the most nourishing food for cattle until late in the season in the North, while in the South abundant herbage is furnished throughout the entire winter. It is a very valuable species in lawn mixtures. Kentucky Blue Grass requires about two or three years to become well set, and does not arrive at perfection as a pasture grass until the sward is at least four years old, hence it is not suited for alternate husbandry, or where the land is to remain in grass two or three years and be then plowed up.

ROUGH STALKED MEADOW (Poa Trivialis)

PERENNIAL RYE (Lolium perenne). A very valuable grass; arrives early at maturity, and produces a good supply of herbage, of which cattle are very fond. It grows freely on almost any soil, and shows a very early Spring growth. Although a perennial grass, the root will not live over three or four years, and unless the plant is allowed to reproduce from self-sown seed it will die out in about that time. This is an objection to its extensive use for permanent pastures, but for hay crops it may be introduced to good advantage along with other grasses and clovers.

ITALIAN RYE (Lolium Italicum). This is one of the most valuable grasses brought into notice during the present century. In nutritive value, earliness and quickness of growth after it has been mown, it by far surpasses the Perennial Rye Grass. It is, therefore, indispensable for alternate husbandry; but as it does not last over two years it is of no use in permanent pastures. The soils best adapted to Italian Rye seem to be those that are moist, fertile, and tenacious, or of a medium consistency, and on such soils it is said to be one of the best grasses known to cut green, affording repeated luxuriant and nutritive crops.

FOWL MEADOW (False Red Top, Duck Grass, Swamp Wire Grass, (Poa seretina). Root slightly creeping; flowers in July and August. This perennial native grass is found on lowlands in many places, though it seldom takes full possession of the soil unless seed is sown. It has been largely introduced into New England, and is particularly adapted to moist, rich soils, such as the borders of rivers, ponds, etc., owing to the fact that an

RED TOP (Herd's Grass), (Agrostis Vulgaris). Root creeping; perennial; flowers in July. This valuable grass has been commonly cultivated in our fields for over a century. It is a fine permanent grass, and forms a nutritious pasturage when fed close. It is valuable for all wet soils producing a large return in good hay. Red Top is often sown with Timothy and common Red Clover, in which case the Clover soon disappears followed by Timothy, after which the Red Top usually takes its place, and with some wild indigenous grass forms a close sward. When sown alone three bushels per acre are required.

RHODE ISLAND BENT (Agrostis canina). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used in New England for pastures and for lawns. For the latter purpose it is often sown by itself, and if cheapness is an object perhaps it is as good as could be sown, but we recommend the lawn mixture wherever practicable. Soil and treatment same as for Red Top (A. vulgaris).

ROUGH STALKED MEADOW GRASS (Pou trivialis). Root fibrous; perennial. This grass is valuable on account of its quick growth, productiveness, and nutritive qualities. Grows in perfection on moist, rich soils, and is also well adapted to ground shaded by trees. Grows early in the Spring, and continues green until late in the Fall. As it delights in shelter, its produce is always much greater when sown with other grasses. Cattle, sheep, and horses show a great partiality for it, and the pasture is generally eaten barest where this grass predominates. Does not thrive well on dry soils.

PERENNIAL RYE (Lolium Perenne)

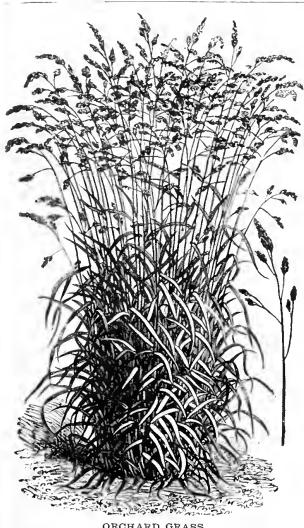

occasional overflow will not injure its growth. It may be mown at any time from June to October, as it never becomes so coarse and hard but the stalk is sweet and tender and eaten without waste. It makes an excellent grass for oxen, cows, and sheep, but is thought too fine for horses. It is easily made into hay which is of a nutritive character.

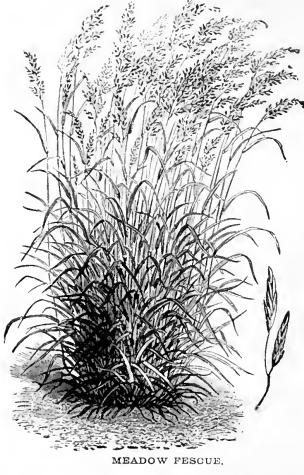

MEADOW FOXTAIL (Alopecuris pratensis). Root fibrous; perennial; flowers in May. This is one of the best grasses for permanent pastures, and should always form a fair proportion of the mixtures for that purpose, because of its extremely rapid growth and great nutritive qualities. Thrives best on a rich, strong soil. As the Meadow Foxtail shoots up its flowering stalk much earlier than Timothy, it can be easily distinguished from the latter, which, at first sight, it greatly resembles. It endures the cropping of cattle and sheep probably better than any other variety of grass, making it, as stated above, well-nigh indispensable in all first-class permanent pastures. The nutritive qualities of Meadow Foxtail are most abundant at time of flowering.

CRESTED DOG'S-TAIL (Cynosurus cristatus). Roots fibrous and tufted; perennial, This is a most valuable permanent pasture grass. It is very tender and nutritious at time of flowering. If, however, it is left until the seed ripens, cattle will not eat it on account of its wiry stems. For parks this grass is well suited, because of its fine,

close growth, and pleasant green color. It should form a portion of all mixtures for lawns.

MEADOW FESCUE (Festuca pratensis). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures, and is also sometimes used for alternate husbandry. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long tender leaves being much relished by cattle. It should be always sown mixed with other grasses.

ORCHARD GRASS.

SHEEP'S FESCUE (Festuca ovina). Somewhat creeping: perennial; flowers in June and July; especially desirable on light, dry, sandy soils. It is much liked by sheep, and should always enter into the compositions of mixtures for lands on which they are to be pastured. Its compact and fine growth make it suitable for lawn mixtures.

TALL FESCUE (Festuca elatior). Root fibrous, somewhat creeping; perennial; flowers in June and July. In appearance this species resembles the Festuca pratensis, but is larger and of stronger growth. It thrives well on moist soils, and yields abundant crops. Cattle and stock eat it greedily. It should form a portion of every mixture for permanent purposes on moist soils.

HARD FESCUE (Festuca duriuscula). This is one of the best grasses of the Fescue family. It is regarded by some s a variety of the Red Fescue, though taller, and the panicle more open. It is found in all the finest permanent pastures of the country, and is much valued for its dwarf habit. It resists the Summer drought, and develops remarkable verdure during Winter. It should form a part of every mixture for lawn or pleasure grounds, and for permanent pasture and alternate husbandry.

RED OR CREEPING FESCUE (Festuca rubra). This grass is found growing on light, dry, sandy soils, and from its creeping habit will be found of great value on sandy seacoast lands. It is a grass of better quality than some of the uncultivated species, but is not usually cultivated in this country as an agricultural product, except on elevated sheep pastures.

SWEET VERNAL (Anthoxanthum odoratum). Root fibrous; perennial; flowers in May. This grass is valuable on account of its early growth and its hardy and permanent nature, which, added to the fact that it throws up its flowertalks till the end of Autumn, upholds its claim to a place in all compositions where permanency is an object. It is very fragrant, and imparts a pleasant odor to the hay. Will grow in almost any kind of soil, but prefers those which are rich and moist. It is greatly relished by sheep, and is found growing naturally on upland pastures. As a component of "lawn mixtures" it is most valuable, and is largely used for this purpose. The seeds of this grass are scarce and most difficult to be had TRUE. An inferior variety of Anthoxanthum being sometimes offered at a low price by unscrupulous dealers, core ought to be exercised in buying. Our seed is guaranteed to be the true Perennial Sweet Vernal.

YELLOW OAT GRASS (Avena Flavescens). This grass deserves to form a portion of all mixtures for permanent purposes, and is well suited for lawns, croquet and bowling greens. It thrives best on light, dry soils, and is particularly adapted to exposed and elevated situations, where it is found growing naturally. Cattle eat it readily, and it is much relished by sheep. The seed of this grass, like that of the Sweet Vernal, is scarce and most difficult to be had true. The seed we offer is guaranteed to be the true Yellow Oat Grass.

TALL MEADOW OAT GRASS (Arrhenatherum avenaceum). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture mixtures, on account of its early and late growth. It succeeds pest on deep sandy lands, and is suitable for sowing in orchards or other shady places.

WOOD MEADOW GRASS (Poa nemoralis). This grass, as its name implies, is found naturally in woods, and is well adapted for growing under trees. It is especially desirable, from its fine habit of growth, for sowing on shady lawns and under trees on pleasure grounds. Root fibrous, flowers in June and July.

MILLETS.

COMMON MILLET (Panicum Miliaceum). Requires a dry, light, rich soil, and grows two and a half to four fee. high, with a fine bulk of stalks and leaves, and is excellent for forage. For ha low broadcast one-half bushel per acre from May first to August first. For grain, sow in drills, one peck to the acre, and t later than June 20th.

GERMAN, OR GOLDEN MILLET (Panicum Miliaceum var.). An improved variety, medium early, growing three to five feet high. The heads are closely condensed, though the spikes are very numerous. The seeds are contained in

rough, bristly sheaths, and are round, golden yellow, and beautiful in appearance.

From close observation during the past few years, the fact has been established beyond doubt that seed of the German or Golden Millet grown in southern latitudes will produce a much larger yield of hay than from seed grown in northern or western sections of the country, and for that reason is far better for farmers to sow. We have a good stock of southern grown seed, and, knowing its value, confidently recommend it. Bear in mind that to the farmer, southern grown seed is worth double that of northern or western grown, as that seed is degenerated and hybridized with other millets.

HUNGARIAN GRASS (Panicum Germanicum). This is a species of millet, growing less rank, with smalle-stalks, often yielding two or three tons of hay per acre. It is very popular and valuable with those who are clearing timber lands. Like the common millet, it is an annual, and requires to be sown every season, but will produce a larger return that

CLOVERS.

There are no plants so valuable for fertilizers as the Clover. They have the faculty of absorbng aitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil.

MEDIUM RED (Trifolium pratense) s the common Red Clover in general cultivation, and too well known to need a general description, It is by far the most important of all varieties for the practical purooses of agriculture. When sown alone produces hay of splendid quality, and with Timothy or other grasses forms a desirable pasture.

MAMMOTH, or PEA VINE (Trifolium pratense var.). Grows five or six feet high; its stalks are so coarse and large that stock will eat only the leaves, but by its judicious use lands which have been exhausted can be reclaimed, as it will grow where

the common clover will fail.

ALSIKE or SWEDISH (Trifolium hyoridum) is the most hardy of clovers, and is fast gaining popularity. It resists cold and extreme drought and wet, and on rich moist soil yields an enormous amount of hay or pasture of a nutritive quality. Can be cut several times in a season. It is well suited to low lands liable to wash, as its long, fibrous roots spread over a large area and hold the soil so as to resist

the heaviest rains. The heads are globular, very sweet and fragrant, and much liked by bees, who obtain a large amount of honey from them.

LUCERNE or ALFALFA (Medicago sativa). Where this variety succeeds well it is probably one of the most valuable of all clovers. It is not, how ever, particularly adapted to the Eastern or Northern States, but flourishes in all Western and Southern. It requires a fine mellow soil to get it firmly established, but when once thoroughly fixed will produce a profitable crop for a number of years. It yields an enermous amount of green fodder, and should be cut when commencing to blossom. Although a prodigious yielder, it does not exhaust the soil, but on the contrary improves it. In States to which it is adapted. four or five crops can be obtained in one season.

WHITE CLOVER (Trifolium repens). The value of this Clover to the farmer is well known, and it is to be found in nearly every natural pasture. It is adapted to all soils. Being a deep-rooted plant, it withstands drought on dry, sandy sections. It should form a part of all mixtures for permanent pastures

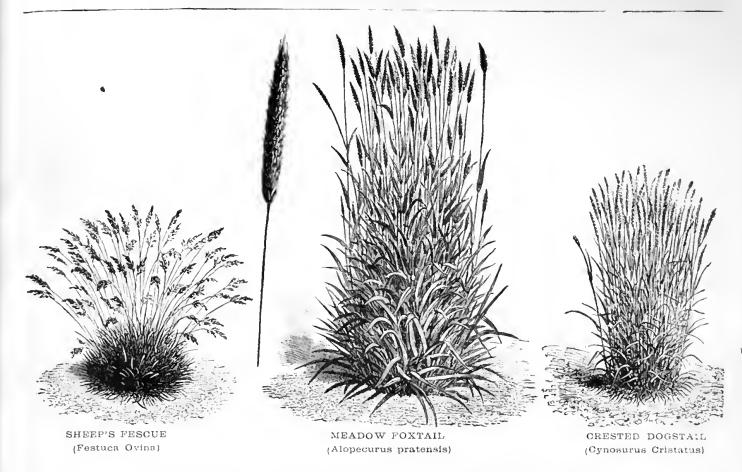

and is also valuable for alternate husbandry, when these crops are sown down for more than one year,

CRIMSON CLOVER (Trifolium incarnatum). It also known as Scarlet Clover and Carnation Clover. It is of rapid growth, and of great value where only one crop is desired, sown either alone or with Italian rye grass. It is an immense yielder, and can be fed green or made into hay It may be sown in the fall for an early summer crop, or in the spring for cutting in July.

See Special Offers on third page of cover.

YELLOW OAT.

(Avena flavescens.)

MIXTURES FOR PERMANENT PASTURES.

"One thing is certain: that good pasture land is the foundation of the riches of a farm "-SINCLAIR.

The oft-repeated complaints of wornout and exhausted pastures, made to us by some of our best New England farmers, have long impressed us with the fact that there must be something radically wrong with the manner in which our pastures are formed and cared for. Some remedy for this state of matters is imperatively necessary, and it seems to us that one most important line of improvement would be the sowing of a larger

number of species of grasses in the laying out of these pastures.

As we have already expressed as our opinion, farmers, as a rule, in preparing their mixtures of grasses to be used in the laying down of permanent pastures, confine themselves to too few varieties, thus failing to arrive at the most profitable results. The chief properties which give value to a grass are nutritive powers, produce, early growth, and reproductiveness (that is, the property of growing rapidly after being cropped). If one species of grass could be discovered that possessed all these qualities in a superior degree to every other, there would be no necessity beyond that of botanical science for us to acquire the knowledge which enables us to distinguish the different species of grasses, the soils and subsoils best adapted to their growth, natural habits, and comparative value; but the results of all experiments have proven that a combination of all the merits and properties which give value to a grass is not to be found in any single species, or in fact in any two or three. In sowing a mixture of a number of different varieties we are but following nature, who can be always depended upon as the best teacher. This can easily he demonstrated by the careful examination of any old, rich, permanent pasture, on which will invariably be found fifteen or twenty species of grass or forage plants growing in great profusion. Where, however, it is left to nature to supply the necessary plants to make a rich and succulent pasturage, a great deal of valuable time is, of necessity, lost, as seven or eight years will elapse before the field will naturally assume the character of a rich and profitable pasture, while by artificial means the same result can be brought about in one fourth the time.

In compiling any table of grasses and clovers to be used for permanent pasture purposes there are several important features to be taken into consideration. First, the proportion of plants which would be produced from the amount of each kind of seed sown should be determined, so that the undue predominance of any particular variety may be avoided. We have given this point special consideration in preparing our mixtures. A selection of grasses should be made that blossom at alternate months of the year, as it is a well-known fact that there is no month from April to September, inclusive, in which some of the valuable grasses do not attain their

full perfection.

EXPERIENCES.

- C. A. Dresser, Treasurer of the Central Mills Co., Southbridge, Mass., in speaking about our Permanent Pasture Mixtures, says:—"The cattle feed upon it ravenously."
- S. C. HUNTINGTON, Henniker, N. H., says:—"The Clover and Grass Seeds which I purchased of your house two years ago proved far better than any I could procure in this vicinity."

By using a mixture comprising these species, it will be at once apparent that a rich and luxuriant growth will be secured throughout the entire season, which result cannot possibly be obtained if the stereotyped mixture usually recommended composes the sward. It would be almost impossible for us to give a series of tables which would comprehend all the variations of soils, altitudes, and climates. We think, however, that those which we have compiled will be found sufficiently comprehensive

WHITE CLOVER.

to meet nearly all the contingencies that arise in ordinary farming.

These mixtures, which we recommend only after careful study and consultation with the best authorities, are of little or no value unless the seeds composing them are absolutely pure and true to name. We, therefore, especially request those who desire to obtain the best results from their mixtures for alternate husbandry, moving lands, and permanent pastures, to avoid the probability of disappointment which would naturally attend the placing of orders with parties who have never given any degree of attention to this most important subject, and buy from us direct (or authorized agents), who are the first in this country to make a specialty of this branch of the seed business. We doubt if a full stock of all the grasses which form the components of our mixture could be found anywhere in the United States outside of our own establishment, and know they eannot be obtained in the same quantities and of equal quality.

In conclusion, we would say, that although pastures be formed in the best manner as recommended by us, with a combination of MANY different species of grasses, yet a judicious mode of treatment afterwards is as necessary to continue their value. By proper stocking and top-dressing, very indifferent pastures may be brought to a state of great fertility; but, or the contrary, the richest pastures by neglect of proper stocking, top-dressing, or by the too frequent repetition of hay crops, will become so unprofitable as to require many years to bring them again to their original value. This fact every practical farmer is well aware of, and after the proper mode of sowing and stocking has been determined on, a suitable top-dressing should be found. Under the head of Fertilizers, in another part of this Catalogue, will be found a reliable top-dressing which we can strongly recommend as being specially adapted for pastures of this character.

Alternate Husbandry.

MIXTURES FOR MOWING AND GRAZING LANDS.

As the pioneers of grass mixtures in this country, we naturally have great pleasure in learning from day to day and season to season that our remarks under the heading, "Mixtures for Permanent Pastures," are fast becoming universally admitted facts; and we predict, with confidence, that the time is not far distant when the practice of sowing only one or two varieties of grass seeds with the hope of obtaining the best results from it will pass, and the better and more profitable one of following nature's plan be adopted.

Many of our statements regarding Permanent Pasture Mixtures are equally pertinent when applied to Alternate Liusbandry. It does not require much thought to convince any practical agriculturist that there is no basis to a system that employs the same quantity and kinds of grass seeds on all occasions, without regard to soil, duration of lay, or the condition in which the crop is to be used. All mixtures for Alternate Husbandry should include, say for one or two years' lay, only annual and biennial or other sorts that attain full maturity within that period; for two or three years' lay a greater quantity of seed is required, which should embrace a larger proportion of permanent sorts, so that the places of the dead annual kinds may be filled by the varieties that are of slower growth.

If a mixture, principally for mowing, is intended to lay more than three or four years, especial care is necessary in selecting and adjusting the several varieties of grasses in proper proportion. A three or four years' lay sown with grasses that are only of annual or biennial duration must be either very thin or foul at the end of the period for which it was laid down—the spaces vacated by the annual and biennial grasses being in all likelihood occupied by objectionable weeds when, if a proper selection of those species capable of lasting the whole of the desired period were sown, the lay would remain full of plant, free from weeds, and, consequently, much more profitable during the whole time the land is in grass.

The practice of mowing grass for hay when the plants are in blossom is acknowledged to be a good one, in that it a not so exhausting to the soil, and a more succulent hay, freer from dust, is obtained; it has, however, from the fact that all natural reseeding is prevented, a tendency to weaken the plants and reduce their number; hence when we see an old field of grass that was originally sown with Timothy, Redtop, and Clover, and which has been mowed, perhaps, twice annually, we can readily account for either the enormous number of weeds or vacant places that are sure to be noticeable. Our system of mixtures practically overcomes this difficulty by the continued growth and stooling out of some of the varieties included that do not attain full maturity under four to six years. Such mixtures, although in the first place more expensive than the ordinary orthodox seeding, are in the end more profitable; we have seen aftermaths from permanent mowing mixtures that more than equaled first crops of Timothy.

In making up the following tables the utmost care has been exercised, and we have no hesitation in recommending them to our patrons.

NOTE.

It will be noticed that the different tables are all based on the quantity required to sow one acre, so in ordering our patrons will please state the number of acres for which the seed is desired. We shall, unless we are especially instructed to the contrary, put up each variety of seed in separate packages, packing the entire quantity necessary for one acre in a case. We recommend our friends to always buy their mixtures put up as above, and to refuse to receive them in any other shape. The advantage of buying the seed before it is mixed is very apparent, as it insures the purchaser obtaining the exact varieties and quantities which should compose the mixture he has ordered. This protection cannot be enjoyed where the seed is mixed before it is sent out.

PRICES FOR JOSEPH BRECK & SONS' SPECIAL MIXTURES FOR PERMANENT PASTURES AND MOWING AND GRAZING LANDS.

When ordering, simply give number and kind of mixture selected and the number of acres for which seed is desired; for example: "Send me No. 2 Mixture for Permanent Pastures for three acres."

Special prices for quantities for ten acres and upwards.

While it is true that the mixtures which we have recommended are SEEMINGLY much more expensive than what is commonly used, it should be borne in mind that a vastly increased value is given to the pasture, not only for one year, but if the land is properly cared for it will remain in good condition for fifteen or twenty years without further sowing, and produce double the amount of fodder, while the ORDINARY sowing has to be repeated every three or four years; thus, in the end, costing more than four times as much as what would be paid originally for the proper mixture.

CAUTION.—Appreciating the fact that some unscrupulous parties will probably offer mixtures for permanent pastures, mowing lands, and alternate husbandry, purporting to be the same as ours, we shall, as a matter of protection to both our patrons and ourselves, stencil or print on each case, and also on package containing each variety of seed, our name and address, and request our patrons before purchasing from any other source than ourselves direct, that they examine the case containing same, and if not stenciled as described they may know that IT is NOT our mixture, and therefore not in any way entitled to our endorsement.

ENSURE A BEAUTIFUL LAWN BY USING BRECK'S LAWN GRASS SEED.

Breck's Lawn Grass Mixture has many imitations but no equal. Sow in Spring or during August and September.

We have given much thought and made many experiments in order to accrtain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen in this country.

One quart will sow 300 sq. feet, Price, per quart, \$0.25 One peck will sow 2,400 sq. feet, Price, per peck, \$1.25 One half peck will sow 1,200 sq. feet, " ½ peck, .75 One bushel will sow 10,000 sq. feet, " bush., 4.00 Four bushels will sow one acre.

THREE SPECIMENS.

"The bushel of Lawn Grass seed guaranteed free from weeds which you sent me some weeks ago is perfect in every way, and I am so much pleased with the manner in which it has acted that I am now enclosing draft for \$4.00 for which you will please express to me immediately another parcel of the same seed. Please be careful to send me EXACTLY the same class of seed as you sent before, it is that which you advertised in Munsey's."

H. L. GULLINE, Granby, P. Q.

The lazon for which you sent me Seed and Fertilizer last October is astonishingly successful. It looks like a growth of two years.

T. W., Wonalancet, N. H.

I can only say if the rest of your goods give as great satisfaction as your Lawn Seed Mixture, I shall know who to trade with. Send me, etc.

J. S., Exeter, N. H.

WIRE FLOWER-POT STANDS.

These stands are most desirable, either for household use or for conservatories and other purposes. They are elegantly made, painted a beautiful green, mounted on porcelain castors, and finished with gold bronze, making them very attractive and ornamental.

No. 2, \$3.25.

Square Stand, with 2 shelves, 33 in. No. 4, \$4 75. Oblong Stand, 24 in. high, 30 in. Semicircle stand, 36 in. high, 26 in. deep long, 92 in. wide. high, 18 in. deep, 33 in. long. No. 3 is like No. 2, but has 3 shelves, 36 in. high, 24 in. deep, 33 in. long. \$4.00.

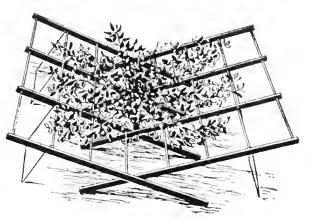

PATENT FOLDING WIRE PLANT STANDS.

Can be opened or folded in a few seconds' time by simply spreading the plant stand apart at the bottom and dropping the cross-bars into their places. Trays are in position and plant stand is ready for use. To fold it, lift up the cross-bars and close the stand together closely and it is folded. The motion of spreading apart the plant stand opens the trays to position; the motion of closing it together folds it compactly. 2 and 3 shelves, same sizes and prices as the rigid.

PERFECT TOMATO SUPPORT.

This is the only really practical support or trellis for tomatoes yet offered. It is made of hard wood, in two pieces, is easily put in position at any time, and allows the plant to retain its natural form (see illustration), and leave its fruits exposed to the sun, thereby ensuring a large crop of ripe, clean tomatoes. Per doz. (24 pieces), \$2.50.

Wire Tomato supports, per doz. \$1.25.

PERFECT TOMATO SUPPORT

BELLOWS, WOODASON'S FOR LIQUID AND POWDER.

Large double cone, each, \$3.00; large single cone, each, \$2.00; small single cone, each \$1.00; liquid spraying, large size, each, \$2.00; small size, each, \$1.25.

CARNATION SUPPORT.

It is cheap, indestructible, is adjustable to different heights, is quickly placed in position, strings are unnecessary.

No. I is the standard size; it enters the soil 5 in., its height is 20 in. above foot-piece, and has 3 rings each 6 in. in diameter. Price, \$2 50 per 100.

GLAZIER'S POINTS, VAN RIPPER'S.

The only durable and reliable points. Made of galvanized steel wire; no rights and lefts. Price per box of 1000, 60 cents; by mail, 75 cents. Pincers for driving same, 40 eents; by mail, 50 cents.

PLANT TRUCKS.

This is a large waterproof Saucer on castors, for extra large sized pots or tubs with plants. Their use makes the moving of the plants from one place to another easy, and prevents the carpets being in-

fored by water. Large size, 17 inches in diameter, 75 cents each.

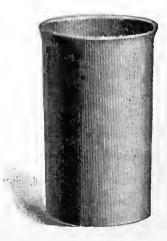

Small " 14

Saucers without castors, 6 in., 80 cents; 8 in. \$1.00; 12 in. \$1.25 per dozen.

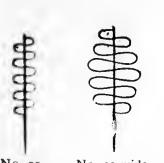

FLORISTS VASES.

Made of Indurated Fibre Ware, light, neat and clean. 8 in. diameter, 13 in. deep, 40 cts. each 5½ in. diameter, 10 in deep, 35 cts. each. 4 in. diameter, 6 in. deep, 25 cts. each.

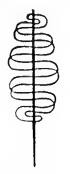

Special offer No. 3 only applies to articles on this page. See Special Offers on third page of cover.

SPRAYING CALENDAR.

This calendar, in a concise way, gives our friends the benefit of the many experiments made by the Agricultural Colleges of the country for a number of years. It is believed they can be followed without danger to the crops and with much profit to the grower.

The number of applications given in each case has particular reference to localities in which fungous and insect enemies are most abundant. If the crops are not affected at the time advised, the spraying is unnecessary. Know the enemy and the remedy, and apply them at the proper season, keeping in mind the fact that good judgment and prompt and persistent action is more necessary to success than any definite rules.

The applications to which an asterisk * is prefixed are of most importance.

PLANT.	First Application.	Second Application.	Third Application.	Fourth Application.
Apple	When buds are swell ing, copper sulphate solution.		fallen, Bordeaux and Ar	
CABBAGE (Worms, aphis.)	*When worms or aphi- are first seen, Kerosem emulsion.			Repeat third in 10-14 days if necessary.
CARNATION (Rust and other fungous diseases, red spider.)	*When rost is firs noticed, Bordeaux. Ker osene emulsion when rec spider is first seen.	. 10-14 days. For red spi-		if necessary.
CHERRY (Rot, aphis, slug.)	As huds are breaking Bordeaux; when aphis appears, Kerosene enrul sion.	Bordeaux. If slugs ap	Bordeaux.	10-14 days later, Am- inoniacal copper earbon- ate.
Currant (Mildew, worms.)	*At first sign of worms Arsenites.	*todays later, Hellebore, If leaves mildew, Bor- deaux.		
GOOSEBERRY (Mildew, worms.)	*When leaves expand. Bordeaux. For worms, as above.			third.
GRAPE	In spring when buds swell, copper sulphate solution. *Paris green for flea beetle.	inches in diameter, Bor-	*When flowers have fallen, Bordeaux. Paris Green as hefore.	
Nursery Stock (Fungous diseases.)	*When first leaves appear, Bordeaux.	*10-14 days, repeat first.	19-14 days, repeat first.	10-14 days, repeat first.
PEACH, NECTARINE, APRICOT (Rot, Mildew.)	*Before buds swell, eop- per sulphate solution.	Before flowers open, Bordeaux.	*When fruit has set, Bordeaux.	*When fruit is nearly grown, ammoniacal copper earbonate.
PEAR	As buds are swelling, copper sulphate solution.		*When blossoms have fallen, Bordeaux and Arsenites. Kerosene emulsion if necessary.	*S.12 days later, repeat third.
PLUM	*During first warm days of early spring, Bordeaux for black knot. When leaves are off in the fall, Kerosene emulsion for plum scale.	ing, Bordeaux for hlack knot and other fungous diseases. During mid-	*When blossoms have fallen, Bordeaux. Begin to jar trees for curculio. Before buds start, Kero- sene emulsion for plum seale.	*10-14 days later, Bordeaux. Jar trees for curculio every 2-4 days. For San Jose scale, Kerosene emulsion when young appear spring and summer.
POTATO (Seab, blight, beetles.)	*Soak seed for seab in corrosive sublimate solu- tion (2 oz. to 16 gals. of water) for 90 minutes.	*When beetles first appear, arsenites.	*When vines are two- thirds grown, Bordeaux. Arsenites for beetles if necessary.	10-15 days later, repeat third.
RASPBERRY . BLACKBERRY . DEWHERRY . (Anthrænose, rust.)	Before buds break, eop- per sulphate solution. Cut out badly diseased canes.	During summer, if rust appears on leaves, Bordeaux.	Repeat second if necessary.	*(Orange or red rust is treated hestby destroying entirely the affected plants.)
Rose	For mildew. *Keep heating pipes painted with equal parts lime and sulphur mixed with water to form a thin paste.	For black spot. *Spray plants once a week with Ammoniacal copper earbonate, using fine spray.	For red spider. *Spray plants twice a week with kerosene emulsion. Apply to under side of foliage.	For aphis, *Spray affected parts with Kerosence e mulsion when necessary,
STRAWBERRY (Rust.)	*As first fruits are set- ting, Bordeaux.	As first fruits are ripen- ing, Ammoniaeal copper earbonate.	*When last fruits are harvested, Bordeaux.	Repeat third if foliage rusts.
TOMATO (Rot, blight.)	At first appearance of blight or rot, under glass or out of doors, Bordeaux.	Repeat first if diseases are not eheeked,	Repeat first when necessary,	

For Aphides or Plant Lice use Kerosene Emulsion on all Plants. See Special Offers on third page of cover.

INSECTICIDES AND FUNGICIDES.

For spraying pumps and appliances see Index.

Breck's Liquid Anti-Ants. A preparation that destroys or drives away ants from lawns, trees, etc. 1/2 pt., 30 cts.; pt., 50 cts. Breck's Anti-Ant Powder. A preparation in powder form that

contains the same qualities as the preceding, and can be used indoors as effectively as on small plants, flower beds, etc. Per box 30 and 50 cts.

Breck's Dalmation Insect Powder. ("Buback.") Manufactured especially for us from clean, dried flowers. It is put up in air tight packages and keeps its strength indefinitely. It is invaluable to the housekeeper for the destruction of flies, fleas

roaches and other novious insects. Packed in four sizes, 10, 15, 25 and 40 cts. Breck's Bordeaux Mixture. Sufficient to make 50 gals., \$1.00; for 20 gals., 50 cts.

Bordeaux Mixture, Lenox Brand. A liquid form, only requires water added to make it ready for use. I gallon

makes 50 of proper strength for applying. Per gal., \$1.00; per qt., 40 cts.

Carbolic Purifying Powder. For removing unhealthy odors. Small pkg. 25 cts; 6 lb. pkg., \$1.00. Canker Worm Exterminator, (Morrill's Tree Ink,) a sure protection to trees from the ravages of grub and Directions with each can.

	DIECT II						_

Caterpillar. Lime. (Ermisch's Raupenleim). This is a German preparation. Recommended by the Royal Ministry of Agriculture, and also by several U.S. Agricultural Experiment Stations as being superior to any yet offered to prevent the ravages of grubs, cankerworms, etc. It is applied in the same way as Tree lnk and is more lasting and effective. 5 lb cans, \$1.00; 10 lb. cans, \$1.75; 25 lb. cans, \$4.00; 50 lb. keg, \$6.75; 100 lb. keg, \$12.75; in barrels of about 250 lbs., per lb., 11 cts.

This article is higher in price than other preparations for the purpose but the long effectiveness of a single application com-

pared with that of others makes it really the cheapest.

Dip, McDougall's Sheep. An effective, non-poisonous preparation for killing vermin on sheep, cattle and domestic animals. Per lb., 50 cts.; qt., 75 cts.; ½ gal., \$1.50; 1 gal., \$2.50, Dip, Leggatt's Sheep. An American article for the same purpose as

the preceding. Per qt., 75 cts; ½ gal., \$150; 1 gal., \$2.50. Disinfecting Powder. Searle's. A powerful deodorizer in powder

form. Per can, 25 cts.

Eciffo. A sure cure and prevention of water bugs, cockroaches, etc. Per tin, 50 cts.

Fir Tree Oil. Soluble. An invaluable preparation for destroying all insects and parasites that infest fruit trees, plants and animals. whether on the foliage or at the roots of the plants. Per qt., \$1.25;

pt, 75 cts.; ½ pt., 50 cts.

Tree Oil Soap. This article contains no poison, yet is quite effective in destroying red spider, mealy bug, Fir Tree Oil Soap. aphis, etc. It can also be used in the garden against potato bugs, cabbage worms, currant worms, black fly, etc. 1/2 lb. tin, 25 cts.; 2 lb. tins, 75 cts.

Fostite. A light powder that can be evenly applied with a bellows; destroys mildew, black rot and rust. Per 5 lb. pkg., 50 cts.

Fruit and Flower Soap. An effective, general insecticide. Pkg., 25 cts.

To prevent mildew on grapes and other fruits and vegetables, rotting of tomatoes, potatoes, and all diseases of a fungus character, apple scab and mildew, pear leaf blight, plum fruit rot, cherry, gooseberry, strawberry and celery blight. 1 lb. boxes, 15 cts each; 5 lb. boxes, 75 cents each.

A POWDERED BORDEAUX MIXTURE Grape Dust. Destroys mildew on grape vines. Can also be used in the garden for mould, mildew or rust mites.

5 lb. pkg., 35 cts.

Hellebore. Breck's Pure Powdered. We furnish a guaranteed pure article; ground from fresh roots. It is easily applied either in liquid or powder form and destroys currant worms, rose slugs, etc. Each package has special directions for its effective use. Packed in three sizes, air tight packages, 10, 15 and 25 cts. each. Kill-M-Right. A soap that is specially prepared to be applied with the "Stott" sprayers. It destroys red spider,

mealy-bug, aphis, etc. 5 lb. tins, \$1.75; 10 lb. tins, \$3.25; 20 lb. tins, \$6.00.

Kerosene Emulsion. Breck's. For plant lice, scale, cabbage worm, etc., see spraying calendar. Per qt., 25 cts.; gal.,

50 cts.; 5 gal., \$1.25. Little's Antipest. A safe and sure preparation for the destruction of all insect pests, equally suitable for greenhouse, garden and orchard. Per pt., 60 cts.; qt., \$1.00; gal. \$2.50.

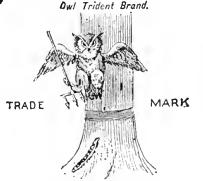

London Purple. For spraying fruit trees, potatoes, etc. 1 lb., 25 cts. Paris Green, Breck's Guaranteed Pure. 1/4 lb. 10 cts.; 1/2 lb. 15 cts.; 1 lb., 30 cts.

We are Sole New England Agents for W. S. Powell & Co.'s Reliable Fungicides and Insecticides,

and offer the following at the manufacturer's prices:

Powell's Guicide Powder. For potato blight, potato rot, grapevine flea beetle, potato bugs, pear and cherry slugs, codling moths, curculio and strawberry crown borers. Can be used either dry or in solution. 25 lb. boxes, .06 per lb., \$1.50 per box.

ERMISCH'S (RAUPEN LEIM) Owl Trident Brand.

Special offer No. 3 only applies to articles on this page. See Special Offers on third page of cover.

INSECTICIDES.-Continued.

For spraying pumps and appliances see Index.

Powell's Copperdine. A paste poisonous to human and animal life, a combined fungicide and insecticide. A substitute for Bordeaux mixture; requires no preparation except the addition of water. 1 lb. cans make 16 gals. of spray, 25 cts.; 5 lb. cans. 80 gals. spray, \$1.00: 25 lb. cans, 400 gals. spray, \$4.50. rell's Quassaine. In paste form. 1 lb. cans make 25 gals. of spray, 25 cts.; 5 lb. cans, 125 gals. spray, \$1.25;

Powell's Quassaine.

25 lb. cans, 625 gals. spray, \$4.50.

Powell's Sulpno-Seatite I owder. For lettuce mildew, powdery and downy mildew of the grape, rose mildew and other fungus diseases affecting plants under glass. 25-lb. boxes (used as a dust) 8 cents per lb.

Slug Shot, not only acts as an insect destroyer, but it will be found to be an excellent fertilizer. It contains nothing injurious to domestic animals, and does not deteriorate by age. On low-growing plants it should be dusted on with a very fine sifter. On tall shrubs and trees it should be applied with bellows. Price, 5 lb. package, 30 cts; 10 lb. package, 50 cts; in barrels of about 225 pounds, 4 cts. per lb.

Soap, Pinner's Tobacco, manufactured from the essential oil of tobacco. for the destruction of all insects, para-

sites and their eggs. Per lb., 50 cts; 1/2 lb., 30 cts.

Soap, Whale Oil, for destroying insects on plants, trees, vines, etc., for washing down the bark of trees, grapevines, etc. In boxes, 1 lb., 15 cts.; 2½ lb., 35 cts.; in buckets of about 14 lbs., \$1.75.

Soap, Sulpho-tobacco. Rese's Perfected. Does perfect work on all insects affecting flowers, trees and ani-

mals. In tin boxes, sufficient for 10 gals. of water, 25 cts.

Spanish Pink. A safe and effective article for the destruction of cabbage and web-worms, caterpillars and other chewing insects that affect cabbage, squash, cucumbers, melons, etc. Non-poisonous. 35 cts. per pound. Sulphur, Flowers of. Used to prevent and cure mildew on plants. 8 cts. per lb.; \$6.00 per 100 lhs. Kerosene Emulsion. A paste preparation of this valuable insecticide. Destroys plant lice and sucking insects of

all kinds. 1 lb. can makes 10 gals. spray, 15 cts.; 5 lb. can, 50 gals. spray, 60 cts.; 25 lb. can, 250 gals. spray, \$2.50.

Tobacco Extract, Rose Leaf Brand. A perfectly pure, aqueous extract, highly concentrated and always uniform in strength of nicotine poison. Destroys green fly, mealy bug, red spider and scale. Pts., 25 cts.; qts., 45 cts.; 1 gal., \$1.25; 5 gals., \$6.00.

Tobacco and Sulphur Powder. Prevents and cures mildew. Kills green and black fly and other insects. 16

cts. per lb.; \$6.00 per 100 lbs.

Tobacco Dust. Very finely pulverized. A valuable insecticide and fertilizer. 5 cts. per lb.; \$2.00 per 100 lbs.

Tobacco Stems. For fumigating. If used as a mulch around sweet peas and other plants they prevent the destructive work of the wire and cut worms. \$1 00 per bbl.; \$2.50 per bale.

INSECTICIDE DISTRIBUTORS.

LIQUID SPRAYING BELLOWS

Bellows, Woodason's for Liquid and Powder. Though a little higher in price than other makes, these are really the cheapes! bellows on the market, because they are well made of the best materials; consequently do better work and last longer. Large double cone, each, \$3.00; small single cone, each, \$1.00; liquid

spraying, large, each, \$2.00; small, \$1.25. Houchins' Bellows. Cheap and useful for applying insecticides in powder form. Nos. 11, 75 cts; 14, \$1.00; 19, \$1.25.

Dusters, Tin. These have finely perforated bottoms for applying Paris Green, Slug Shot, etc. 20 cts. each.

Gun, Excelsior Powder. For applying insect powders, etc. 15 cts. each.

Cyclone Powder. 15 cts. each. Blizzard Powder. 10 cts. each.

Powder Puff, Scollay's Insect. This is a large, strong rubber bulb, with long metal neck and distributor set at an angle that enables the operator to apply either powder or liquid over or under the leaves. \$1.00 ea.

"TOUGH ON FLIES."

This article has been thoroughly tested in New England and is in every particular as represented.

Harmless and effective. One application instantly and positively relieves horses and cattle from all annoyance from Green Heads, the dreaded Texas Heel Fly as well as from other flies, gnats and insects of every description for at least twentyfour hours. It improves the coat of the animal and abolishes the use of fly nets. It prevents thrush and other hoof diseases. It is soothing and healing if applied to sores, and stands unrivalled as a disinfectant. Applied to cows, its wonderful effect in securing for them perfect rest and a chance to feed in peace quickly manifests itself in their improved appearance

and by the increased quantity of milk given. It is the greatest compound of this progressive age. Recommended by thousands using it. One gallon lasts four head of horses or cattle an entire season. Price of "Tough-on-Flies": Quart cans, 50 cts.; 1/2 gallon cans, \$1.00: gallon cans, \$1.50; and five gallon cans, \$1.50 per gallon.

Special Offer No. 3 only applies to articles on this page.

MISCELLANEOUS REQUISITES.

Baskets, Verbena. Wood or wire handles. Standard size per 100, \$2.00; per 1000, \$18.00. Large size: 12 in long, 7 in. wide, 4 in. deep, per 100, \$3.00; 1000, \$25.00.

Caps, Hay, Breck's Improved, brown, medicated, complete with ropes and pins, 50 cts. each: \$45.00 per 100. Color, Improved Butter, Well's Richardson & Co,'s imparts the "golden tint of June" to butter at all seasons of the year. Bottles sufficient for 500 lbs., 25 cts.; 1250 lbs., 50 cts.; 3000, \$1.00.

Color, Hanson's Butter, a universal favorite, bottles, 25 cts., 50 cts., and \$1.00 each.

Cotton Batting, for packing flowers, etc., per sheet, 6 cts.

Mats, Archangel, an excellent light covering for frames, hotbeds, etc., 75 cts. each.

Mats, Straw for hotbeds, etc., 6x6, \$1.50 cach. Other sizes to order.

per 100, 25 cts.; per 1000, \$1.75; 3 ft., per 100, 30 cts., per 1000, \$2.25; 4 ft., per 100, 45 cts., per 1000, \$3.00. Silkaline. Used by florists for growing Smilax and Asparagus on, also for tying in bouquet work, per reel, 25 cts. Soil, Prepared Potting. Rotted Fibrous Peat, Leaf Mould, 50 cts. per pk., \$1.00 per bu., \$2.00 per bbl. Sphagnum Moss. \$1.00 per bu., \$2.00 per bbl.

Tinfoil, for bouquets. Per lb., 15 cts.

Twine, soft, for tying cut flowers, vines, etc. Per ball, 25 cts,

Twine, Parceling, all sizes. Per ball, 10 to 25 cts.

Exceedingly useful for mending Rubber Hose. It is a strong, adhesive ribbon, three quarters of an inch wide, can be wound tightly around a leaking part and thus stop it. Per coil, 25 and 50 cts. Wire, Bouquet, Nos. 23 and 24. Per stone, \$1.50.

Wax, Grafting, (Trowbridge's), the best in the market. This brand should not be confounded with the many cheap makes now offered, that are not possessed of an even consistency, and give unsatisfactory results. Put up in 1 lb., 1/2 lb. and 1/4 lb. pkgs., price 40 cts., 25 cts., and 15 cts., respectively.

Nos. I 2 3 5 6 7 8 13 14 15 Price per 100, \$2.00 \$1.30 \$1.70 \$1.70 \$1.00 \$0.90 \$1.30 \$1.00 \$0.75 \$1.00 Zinc Labels

stica. For Glazing Greenhouses, new or old. Elastic, adhesive, easy to apply. Every florist has experienced difficulty in obtaining putty (whether ordinary or white lead), for glazing, that is satisfactory for any length of time. After much study the inventor of "Mastica" decided that the composition must be of different materials from that used heretofore for this purpose, must be elastic and tenacious, and Mastica. these qualities must be retained to admit of expansion and contraction without cracking. This result has been reached in "Mastica" which, when applied, in a few hours forms a skin or film on the entire mass hermetically sealing the substance and preventing the evaporating of the liquids, and remains in a soft, pliable and elastic condition for years. The use of "Mastica" avoids the necessity of repeatedly re-glazing the houses, saving much time and expense. With "Mastica" can bed in or use on the outside, with a machine. Broken glass can be easily removed and replaced by new without the breakage of other glass, which usually occurs with hard putty. One gallon will cover about 290 running feet (one side). Put up in gallons, \$1.00; half gallons, 60 cts.; quarter gallons, 35 cts.

"I used your seeds last year, and found them to be the best. I got first prize at the Union Agricultural Society's Exhibit on your Stone Mason Cabbage." C. M. Phelps, Blandford, Mass.

"I received your 1896 Catalogue to-day. I wish to say that the dealings I have had with you have been pleasant and profitable to me. I shall want about \$10.00 worth of seeds."

A. L. Ward, Milo, Me.

POULTRY SUPPLIES.

PRICES SUBJECT TO CHANCE.

BRECK'S Poultry and Swine MEAL.

Breck's Poultry and Swinc Meal was first offered the American public in 1893, but it has, since that time, found its way into the yards of the most progressive poultrymen in the country, because it is superior in every respect to all other Meals Made From Meat or Animal Matter.

A reasonable trial only is necessary to prove its superiority as producer of eggs and as a maker of flesh, bone. and muscle.

It is not a new article, but one that has been used for a great many years in Germany, where it is known as "Thieren Mehl," which in English means meat meal or meal made from animal matter. It is perfectly sweet and wholesome, being prepared when the materials are fresh, and it is guaranteed to keep longer and better than good beef scraps. Its odor is sweet and the flavor more agreeable than any other meat or animal meal on the market, hence it is better relished by poultry and swine, and consequently produces more satisfactory results.

In addition to the pure meat and bone, we have combined in this preparation some of the most potent agents known for the production of eggs, not hy stimulating but rather by preventing disease and promoting general good health, which condition is also necessary for fattening both fowl and swine. This preparation is not only more nutritious and palatable than other animal matter meals, but is entirely free from had odors is cheaper than either beef scraps, bone incal, fish meal, or similar manufactured articles. Order a trial bag and you will be convinced as to its great merits. 100 lb. bags, \$2.25; trial bag (a month's supply for 30 hens) \$1.00.

Ground Oyster Shells. 100 lb. bags, 65 cts. per 100 lbs.; in bbls. of 250 lbs., 65 cts. per 100 lbs.

Mica Crystal Grit. 50 lb hag, 75 cts.; 100 lb., \$1.00. Cracked Poultry Bone. Per bbl. of about 200 lbs., \$2.50 per 100 lbs.

Bone Meal for Poultry and Cattle. 50 lb. bag, \$1.50; 100 lb. bag, \$2.50; per bbl of about 200 lbs., \$2.50 per 100 lbs.

Flour of Bone. 50 lb. bags, \$1.50; 100 lh. bags, \$2.50; per bbl. of about 200 lbs., \$2.50 per 100 lbs.

Thermometers. Common tin case. Each, 8 in., 20 cts.; 10 in., 25 cts.

Thermometer. Standard, tin case. Each, 8 in., 65 cts.; 10 in., 75 cts.

Thermometers. Standard, incubator. Each, 75 cts. If Thermometers are wanted by mail, add 10 cts. each.

Caponizing Instruments, with instructions. \$2.50 to \$7.00 per set.

Wire Nests, Strong, neat and clean. Net 35 cts. each,

Poultry Supplies on this page except those quoted net, are subject to Special Offer No. 3 only.

MEDICOL NEST EGGS.

These are medicated eggs but entirely different from anything that has hitherto been offered. They can be cleaned without injury, are lasting, effective, and appreciated by chickens and adult fowls. No hen should be set without one of these in the nest as a preventative of vermin. One placed in a bird cage keeps it sweet and the bird free from insects. They drive away lice from pot plants, prevent moths from attacking furs or other clothes when packed away and are also valuable as a disinfectant. 10 cts. each; \$1.00 per doz.

SULPHO-NAPTHOL.

This preparation, originated by the late Dr. Cabot, is recommended for a great many purposes. It is used instead of vaseline in the operating rooms of many large hospitals. It cleans and heals all sorts of cuts, bruises and sores. It is sure death to all kinds of Bacteria and Insects and is unsurpassed as a disinfectant. For domestic animals, poultry and poultry houses it is the thing. 50 ct. bottle make 10 gals.; \$1.00 can, 50 gals. solution.

VETERINARY X-ZALIA.

A purely vegetable preparation, contains no alcohol or poisonous ingredients. It may be applied to a raw surface or even poured into the eye of an animal without causing pain. It cures Galls, Scratches, and Surface Inflammation of every description. Per large bottle, \$1.25.

P. D. Q. POWDER.

A valuable preparation that not only destroys and prevents insects of all kinds on fowls but drives away quickly all sorts of insects that pester the housewife. If dusted on clothes when packed away moths will not trouble them. It is useful for a hundred and one purposes and not the least among them is that of disinfectant. Per package, 25 and 75 cts.

FERTILIZERS.

STURTEVANT'S GRANULATED TOBACCO AND SULPHUR.

LAWN DRESSING AND GARDEN FERTILIZER.

We are the manufacturers' New England agents for this valuable, combined Fertilizer and Insecticide. This is a cheap, odorless and easily applied Fertilizer, valuable alike for the flower and vegetable garden, orchard and lawn. It prevents the ravages of worms on the lawn, and tends to keep plants free from insects. It should be used at the rate of 50 lbs. per 1,000 square feet. Price, for 100-lb. bag, \$2.50, per 50-lb. bag, \$1.50, per 25-lb. bag, \$1.00.

FLOUR OF TOBACCO AND SULPHUR.

Special Offer No. 3 only applies to this article.

A desirable Fertilizer for house plants. May be applied in powder or liquid form. It prevents mildew on grapes and rose bushes, and destroys the green and black fly, grubs, cutworms, lice, etc. Packages 25 and 50 cents each.

Special offer No. 3 only applies to articles on this page.

See Special Offer on third page of cover.

FERTILIZERS.

BRECK'S FLOWER FOOD.

Twelve years ago we introduced an entirely odorless fertilizer, that could be used on the lawn and garden without offence to either user or neighbor. It has yearly grown in popularity, and on account of its success several imitations were put on the market, yet its sales are greater than those of its combined imitations. Many people who used it on their lawns and flower beds were so pleased with the results, and its freedom from all offensiveness to either smell or touch, have also been using it largely on their house plants. We do not recommend it for this purpose, because it is neither so highly concentrated or as quickly soluble as a pot plant fertilizer should be. For these reasons, and to meet the demand for a really odorless and reliable article, we now offer Breck's Flower Food. Its users will promptly be surprised at the way it promotes a healthy, vigorous growth of wood, leaf and flower, and wonder how it can add such color and fragrance. Put up in two sizes - beautiful lithographed boxes.

No. 1, sufficient for 30 plants for one year, 25 cts.; by mail, 40 cts.

No. 2, sufficient for 30 plants for three months, 15 cts.; by mail, 20 cts.

Bradley's Lily Brand Flower Food. No. 1, 25 cts.; by mail, 50 cts. No. 2, 15 cts.; by mail, 25 cts.

BRECK'S LAWN AND GARDEN DRESSING.

The verdict of all who have used Breck's Lawn and Garden Dressing is that it is the most complete and satisfactory Lawn Dressing ever placed upon the market. It is a brand manufactured expressly for our own trade, and we can therefore vouch for its containing all the constituents required to produce a growth of grass of a luxuriant nature and rich green color. While many Lawn Dressings are claimed to be odorless, we believe beyond a question that ours is the only absolutely odorless. It is also so clean that the most fastidious person ean apply it without offending the organs of sight and smell. It being quick in action, the effect can be seen immediately after the first rain or the sprinkling of the hose, and going directly to the roots of the grass, stimulates them to greater activity, thereby thickening the sward and producing a firmer growth, which remains rich, green and velvety throughout the season. Its superiority over stable manure can scarcely he estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always contains weeds and other undesirable seeds. Great care should be taken to distribute the dressing evenly, and in no greater quantities than recommended on the tag which accompanies each bag, as a too liberal application will injure the sward. It can be applied at any time during the year from April to November, as often as the grass seems to need nourishment. In making new lawns apply at the same time the seed is sown and rake in with the seed. Never apply the dressing while the grass is wet with dew or rain. Any time the grass is perfectly dry will answer, but the best time to apply it is just before a shower. It is equally as suitable for flowerbeds and all vegetable crops as for the lawn.

SHEEP MANURE.

The superior of all natural manures. Better than any chemical fertilizer. This is a pure natural manure, and the most nutritious food for plants. Its effect is immediate. It is the best of all manures for mixing with the soil for green-house plants—one part manure and six parts soil. Strewn over and dug into the vegetable garden, or placed directly in drills or hills, it promotes a rapid, steady growth until maturity. It makes the richest, safest and quickest liquid manure, rivalling guano, without any deleterious effects. For use in liquid form, one pound to five gallons of water will make a dark liquid which can he used with safety daily if necessary. Retail Price, in bags of 100 lbs. each, \$2.25; per ton, \$40.00. Sheep manure at ton price is net F. O. B. Boston; smaller quantities as quoted are subject to Special Offer No. 3 only.

PLASTER DUST.

For destroying insects upon vines. Per 5-lb. box, 15 cts.; 25 lb. bag 50 cts.; barrels of about 150 lbs., \$2.00 per barrel. Net F. O. B. Boston.

See Special Offer on third page of cover.

THE MAPES MANURES.

These are the standard Special Crop Fertilizers of the world. They may cost a little more than some other "complete manures," but they give far better results in the field.

We are the sole Boston Agents, also for some other New England sections. Pamphlets giving full information

in regard to the Manures mailed free.

These fertilizers are packed in bags of 200 pounds each. 2,000 pounds to the ton.

Our Special Offers do not apply to Mapes Manures, but we allow five per cent discount for cash payments. F. O. B. Boston.

Potato Manure. For Irish and sweet potatoes; also for asparagus, early vegetables, tomatoes, sugar beets, fruits, sorghum and sugar cane. Per bag of 200 lbs., \$4.00; three bags and over, \$39.00 per ton.

Fruit and Vine Manure. For insuring fruiting power, particularly in quality of fruit in vineyards (grapes), pears, apples, plums, strawberries and all small fruits. Is slow in effects. Per bag of 200 lbs., \$4.00; three bags and over, \$39.00 per ton.

Complete Manure (for heavy soils.) For use on heavy or clay soil, for wheat, rye, oats, seeding grass, or spring top-dressing of meadows, pastures, etc., on any soils where small quantity of potash, but large quantities of ammonia and phosphoric acid are required. It is very safe for use around young plants, nursery work, strawberry vines. Is very forcing. Per bag of 200 lbs., \$4.00; three bags and over, \$39.00 per ton.

Complete Manure (for light soils.) Early Vegetable or truck Manure. For all kinds of soils, light or heavy, use broadcast; special for onions, also on light soils for asparagus, sweet potatoes, melons, tomatoes, wheat and seeding to grass. Per bag of 200 lbs., \$4.20; three bags and over, \$41.00 per ton.

Complete Manure ("A" brand) For use in hill or drill on all crops, particularly in connection with farm manures. Special for peas, beans, buckwheat and turnips. Per bag of 200 lbs., \$3.60; three bags and over, \$35.00 per ton.

Complete Manure (for general use.) A substitute for stable manure. For use on all crops and all soils with or without stable manure. Use broadcast; use sparingly if put in hills. Special for oats, Hungarian grass, vegetables, melons, tomatoes, and seeding with or without grain. Per bag of 200 lbs., \$3.90; three bags and over, \$38.00 per ton.

Corn Manure. For sweet corn, fodder corn, Hungarian grass, millet, late turnips, late cabbage, and seeding to grass. Per bag of 200 lbs., \$3.70; three bags and over,

\$36.00 per ton.

Cauliflower and Cabbage Manure. Ammonia, 5.50 to 6.50 per cent; phosphoric acid, 6 to 8 per cent; actual potash, 8 to 10 per cent. Per bag of 200 lbs., \$3.90;

three bags and over, \$38,00 per ton.

Grass and Grain Spring Top Dressing. Ammonia, 5 to 6 per cent; phosphoric acid, 7 to 9 per cent; actual potash, 5 to 7 per cent. Per bag of 200 lbs., \$4.10; three bags and over, \$40.00 per ton.

STOCKBRIDGE MANURES AND BOWKER'S PHOSPHATE.

These goods are so well known in New England that any remark from us regarding them is uncalled for.

LIST OF STOCKBRIDGE SPECIAL MANURES.

Stockbridge Potato Manure, for on	e acre w	ithout st	able manure,*	1,000 to 1,500 lbs.	
Stockbridge Corn Manure,	46	44	"	600 to 1,200 lbs.

BRADLEY'S FERTILIZERS_

Are guaranteed to contain more plant food in better mechanical condition and of higher agricultural value than any other fertilizers in the world, and they are, therefore, as the New England Homestead affirms "the most economical to use."

Do not be misled into purchasing unknown fertilizers of uncertain value, but buy Bradley's Fertilizers which have grown large crops of superior grass, grain, and vegetables, on thousands of farms all over New England for more than thirty years.

Among their leading brands are:

BRADLEY'S SUPERPHOSPHATE

Bradley's Superphosphate, the pioneer of the fertilizer industry in the United States, has been more extensively used than any other brand of fertilizer in the world.

From its unvarying quality and uniform condition it has gained the name that more plainly bespeaks the estimate in which it is held among the farmers than volumes of praise,—"the Old Reliable."

BRADLEY'S POTATO MANURE

For Growing Smooth, Sound Potatoes of the Best Quality Without Barnyard Manure.

Bradley's Potato Manure is in no sense a theoretical or experimental mixture, but is prepared from formulas which repeated field tests have proven will produce the largest crops of smooth, sound potatoes.

The universal testimony of leading farmers is convincing that it gives the best of satisfaction, and at a considerable saving in cost over many of the high-priced "special potato manures" whose alleged scientific combination is their principal claim to the farmers' patronage.

BRADLEY'S COMPLETE MANURES

For Potatoes and Vegetables. — For Corn and Grain. — For Top-Dressing Grass and Grain, with 10 per cent. Potash.

These manures are the richest and most concentrated fertilizers sold, as has been abundantly proven by actual results in the field. They are manufactured from the very best plant-food materials obtainable, combined in such form and proportions as long practical experience has proven will yield the largest crops of the best quality.

Send to us for finely Illustrated pamphlets, describing all of their brands, and let us quote you prices on all of these unequalled fertilizers before purchasing elsewhere.

NOVELTIES AND SPECIALTIES

FLOWER SEEDS, BULBS AND PLANTS.

Single Flowered China Aster.

ASTERS. The Aster Seeds we offer are in every case the very best of the several classes, all having been grown especially for us by the most skilled and successful cultivators of the different kinds in America, England, France and Germany; many of the strains, which are superior to all others, we control exclusively. Our Aster Seed is popular with the leading Florists and private growers throughout the Union, and we recommend it in the full assurance that it will satisfy and delight all who plant it.

For complete list of varieties see pages 66-69.

Single Flowered, China. Marguerite. Abundance of flowers, variety of brilliant shades and suitableness for cutting are features possessed by this new class of Asters that will make it valuable alike to the private and market grower. The plants are of globular form and carry on long, stout stalks a mass of single, star-shaped flowers which appear early and last a long time. They are as effective for beds as the double-flowered sorts and will keep fresh for ten days or more when cut. The colors embrace shades of White, Rose, Carmine, Blue and Violet.

Mixed pkt., 25 cts.

Ray Aster. The first of a new class that by form, habit and size of flowers will prove attractive. The plants grow to a height of 11 feet and produce in great abundance on long, strong stems, flowers from 4 to 6 inches in diameter. The Gardener's Chronicle says: "They are pretty and distinct, resembling some of the straight-rayed Japanese Chrysanthemums." The colors are white and bright rose, sep-

arate or mixed. Pkt., 25 cts.

See Special offers on third page of cover.

ABUTILION. "Tennysonian" and other new varieties mixed. From a very large variety of charming flowers; pure white, straw, yellow, rose, scarlet, crimson, and yellow and red shades. Pretty drooping bells, gay little parachutes, dainty swinging flowers on thread-like stems, large flaring blossoms sometimes measuring four inches

across. Pkt., 15 cts.

ANTIRRHINUM. Majus Grandiflorum. This splendid new strain of Antirrhinum is a great improvement in size of flowers on all varieties hitherto existing. The plants are of very robust growth. The flowers are nearly double the size of the ordinary kinds, whilst the colors are very vivid and striking. Splendid mixture. Pkt.,

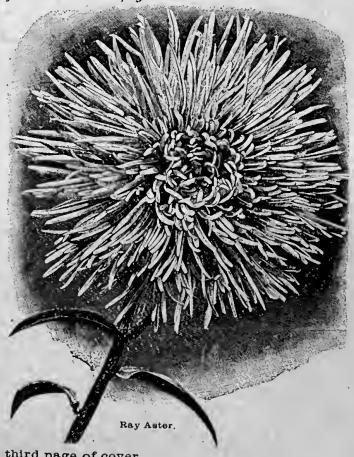

Dwarf. This class is of neat growth and densely covered with flower spikes; if sown in March or April and planted out when strong enough, they make a fine display through-

out the summer and fall. Height, 1½ ft. Crimson, Scarlet, Striped, Yellow, White, Carmine and White, any color. Pkt., 10 cts.; mixed pkt., 10 cts.

Tom Thumb. These are of dwarf, compact growth, and come very true in color from seed. They are effective when grown in beds or masses. Height, 9 to 12 in. Crimson, Rose, White, Yellow, Striped, Orange and Scarlet, any color. Pkt., 10 cts.; mixed pkt., 10 cts.

Yellow Queen. An undoubted acquisition; the plants grow 15 inches high and produce, true from seed, an abundance of large, beautifully formed flowers of a bright

yellow color. Pkt., 15 cts.

ASTER-JEWEL or BALL. As an addition to the existing colors of this desirable, tall-growing class, we offer the following acquisitions. Azure-blue, Red-Violet, Pure White. Separate or mixed. Pkt., 25 cts.

GIANT COMET. The flowers of this class are of immense size (much larger than the ordinary Comet), very

double, and composed of long, wavy, twisted petals, borne on long stems. The Bride. White, passing into rose. Pkt., 15 cts.

Light Blue. A new and pleasing shade. Pkt., 15 cts.

Lilac. Very delicate. Pkt., 15 cts.

Crimson. A decided acquisition. Pkt., 15 cts.

Above colors mixed. Pkt., 10 cts.

DWARF CHRYSANTHEMUM. Terra-Cotta. The color of this new variety, when opening its blossoms, is bright salmon-red; when in full bloom it changes to terra-cotta brown. Pkt., 15 cts.

"I have again filed an application at your Bureau of Registry and Information for a similar situation to the one which you secured for me with Mr. N. B. Stevens, thou years ago; and I desire to say, in regard to this situation and my experience with your Bureau, that I am perfectly satisfied with the help it has rendered me, as well as the courtesy which has been shown me by the clerks of that department,"—Geo. Irvine, 11 Baker Park, Roxbury.

DOBBIE'S GLOBE QUILLED. This strain has been grown and selected for over thirty years. It has been twice commended by the Royal Horticultural Society of England, after trial in their gardens. The blooms are large and of very beautiful colors. Assorted colors, pkt., 10 cts.; collection six distinct colors, 50 cts. DWARF PÆONY, Perfection. Dark Purple. This is the true pæony form, the color is entirely new amongst

asters, being a very deep, velvety purple. Pkt., 10 cts.

Blackish-Violet. This is the darkest colored aster yet produced; seen from a little distance it seems quite

black. Pkt., 10 cts.

MIGNON. Rosa Alba. The value of this class is enhanced by the addition of this new shade, rose, with an under-glaze of white. Pkt., 15 cts.

PRINCESS ROSE. This is the favorite "Snowball" type. The color of this new claimant for favor is bright rose; it is an acquisition. Pkt., 15 cts.

Begonia Vernon Compacta.

BEGONIA. Fibrous, "New Giant." Saved from grand new Begonias, and from hybridized flowers of many of the best-named new varieties. They will be sure to bring some beauti-ful new sorts. The plants are of very strong, robust growth with beautiful foliage and splendid large flowers. Pkt., 15 cts.

Vernon Compacta. Charming new compact variety of the beautiful and universally admired Begonia Vernon, forming small, round, very compact bushes of about 4 to 5 inches in height and possessing the same good qualities as its taller growing parent, namely, the brilliant red flowers and the deep brownish red foliage. Blooming in the greatest profusion throughout the summer and autumn, this new variety may be considered one of the best bedding plants for dwarf groups or ribboning. Pkt., 15 cts.

Hybrida. Hero. A result of crossing Baumanii with Gigantea Alba; this new, robust growing variety produces long flower stalks with large, well-formed, sweet-scented flowers, the color

of La France Rose. Pkt., 25 cts.

Aurora Odorata. A new sweet-scented variety with coppery-crimson flowers. Pkt., 25 cts. Tuberous-Rooted. Breck's International Prize. Single-

flowered. This strain is saved from selected flowers of the largest and best collection in the world. Pkt., 25 cts.

Double-flowered. Equal to the preceding. Pkt., 25 cts.

Carinatum. Golden-leaved. Double-flowered. CHRYSANTHEMUM. A notable addition to the new section of golden-leaved annual Chrysan-The large and very double flowers are of all colors, the red shades being especially strongly represented. The plants will prove very

suitable for borders, etc., and for cutting. Pkt., 15 cts.

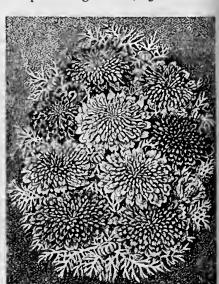

Carinatum. Purple Crown. Similar in habit and foliage to the foregoing. The flowers are single, produced in great abundance, and are purple-scarlet

with a bright golden-yellow ring. Pkt., 10 cts.

Maximum. Perfection (Leucanthemum). This novelty is a great improvement on one of the most useful hardy perennials. It is a grand white flower, many of the blooms measure five inches across, and for cutting is invaluable. It comes true from seed and is sure to find a place in every garden when known. Pkt., 15 cts.

[&]quot;We were very much pleased with the Flower and Vegetable Seeds we bought of you last year. The Nasturtiums were the finest ever grown here and were very generally admired."-Mrs. M. J. Corille, Laconia, N. H.

Chrysanthemum Carinatum, fl. pl.

Campanula Persicifolia.

CAMPANULA PERSICIFOLIA, Grandiflora, Blue. A new variety, with superb, large blue flowers, well worthy of a place in the garden. It is in every respect equal to the white flowered sort and will be found suitable for

planting with it. Pkt., 15 cts.

Campanula Japonica. A new perennial variety from Japan. The plant is of fine branching habit, each stem bearing several flowers from 21/2 to 3 inches across, and of a deep blue color; the flower forming quite a regular star composed of twelve petals. It is perfectly hardy and if sown in summer will bloom from June until August of the following year. Pkt., 15 cts.

CONVOLVULUS, Japanese Morning Glories. Those who had the opportunity of trying these last year were loud in their praise. The descriptive terms mostly used regarding them being, "Entrancing," "Gigantic," "Magnificent," "Incomparable," The colors range from rose to maroon, from sky blue to purple, from white to cream and gray. They are striped, starred, spotted and edged. Pkt. 10 cts.

Double White Convolvulus.

CONVOLVULUS, Heavenly Blue. A beautiful, climbing morning glory. The flowers are large, four to five inches across, and of a rare blue shade with a yellow throat. Pkt., 5 cts.

New Double White. The flowers remain open nearly all day. They are white, with delicate purple marks in the centre Very double and finely fringed. Pkt., 10 cts.

COSMOS. This is now a fashionable flower, and with good reason for the strains offered vie with the rose in variety and brightness of colors, besides its cost is low and cultivation easy. The only difficulty in growing it in New Engand has been its late blooming habit. These plants seem to be very much at home in California where they bloom in from five to six weeks from time of planting. To induce early blooming grow the plants in small pots or shallow boxes, allowing them to become pot bound before they are planted outside. Sow the seed in March, as soon as possible, transplant into two-inch pots, and again into four-inch pots which should be well filled with roots before the plants are set out in the garden. Do not either over feed or over water as semi-starvation will produce more satisfactory and earlier bloom than the usual kindness. Following is the cream produced to date.

Cosmos.

Giants, Red, Pink, White. The flowers are of perfect form and immense size. Separate colors or mixed. Pkt., 5 cts.

Camelliaflora, Red, Pink, White. Separate or Mixed, splendid varieties with very large overlapping petals somewhat like single camillias, but larger. Pkt., 5 cts.

Tints of Dawn. New and distinct varieties. The flowers have a white ground, finely flaked or flushed with delicate pink; they are variously formed and very beautiful. Pkt., 5 cts.

Fringed. White and Pink. Separate or mixed. Most exquisite and perfect flowers, with petals overlapping or

pleated. Pkt., 5 cts.

New Marguerite. Distinct and beautiful; the petals are deeply and irregularly laciniated and fringed. Pkt., 5 cts. New Early Blooming. Much earlier than the old sorts. These embrace a great variety of forms and shades of

color. Mixed. Pkt., 5 cts.

Golden Yellow. Perfectly distinct in habit; the plants being of branching growth and furnished from the bottom up with finely cut, glossy, green foliage. Pkt., 5 cts.

See Special Offers on third page of cover.

CARNATION, MARGUERITE. Yellow. The color of this new early flowering carnation is a welcome addition, as it practically completes the variety of color wanted. About 50 per cent come true to color. Pkt., 25 cts.

New Double-Flowered Cyclamen.

CENTAUREA CHAMELEON. Similar in habit § and attractiveness to the Margaret Centaurea, introduced two years ago. The flowers are pale sulphur-

yellow with a purple shading. Pkt., 10 cts.

argaret Distinct from all other Centaureas and Margaret undoubtedly the most beautiful variety known. The large flowers are of purest white, deliciously scented, and freely produced on long stems. Pkt., to cts.

"Your strain of Primula Chinensis Fimbriata is very fine; it surpasses any I ever grew, both in size of flowers and variety and quality of colors. John Husband, Belmont, Mass.

CYCLAMEN. Large Flowered, Double. An entirely new variety from Persia. The introducer says: "It has been very difficult to obtain double flowers of the large Persian cyclamen, and while the type is not yet perfect it has so many good qualities that it is deemed worthy of introduction to the flower-loving public. The flowers are of beautiful form, and the richness of their colors yield to none of the older single sorts. They are without doubt of first merit and will increase the loveliness of the entire family by contrast." Pkt., 50 cts.

CELOSIA. Ostrich Feather. This new Celosia produces very large plumes, which are exquisitely curved and curled like an ostrich feather. The plant grows about 3 feet high, is of handsome pyramidal form, and is effective for either pot or outdoor cultivation. It requires the same treatment as the ordinary Cockscomb.

Crimson. Pkt., 10 cts.

Orange. Pkt., 10 cts.

Centaurea Margaret.

DIANTHUS LACINIATUS NANUS. New Hybrids. New strain of the annual Pinks with laciniated or fringed petals. This novelty differs from the well-known D. Laciniatus by its lower growth and its somewhat smaller, less fringed but much finer colored flowers. The latter, varying in all shades from white to deep rose and even to purplish-red, are all tinged more or less with bright salmon red or salmony scarlet and are distinguished by a dark ring round the centre. A group of this new tribe in full bloom presents a beautiful and distinct aspect on account of these charming salmon colorings, and of the great diversity of designs. Pkt., 15 cts.

Dianthus Superbus Telekeii. A new cross between Superbus

and Laciniatus. It is a hardy perennial of robust growth that flowers incessantly from June until frost. The flowers, which are double and single, vary in all shades of color known amongst Chinese Pinks. Pkt., 15 cts.

DATURA. Golden Queen. This variety has all the fine qualities of the popular D. Cornucopia, but, on account of its brilliant yellow flowers, it is a more showy and effective plant. From seed sown in the open ground, it grows in a single sea on to a height of 21/2 feet, forming a compact bushy plant. The flowers are of gigantic size, many of them to inches long, very double and produced in great numbers. Pkt., 10 cts.

Dianthus Laciniatus Nanus.

EUPATORIUM SERRULATUM. A new greenhouse plant, from South America, with beautiful green foliage and umbellated, purple rose flowers which appear on the tip of the branches. It is of the easiest culture and is especially valuable because it flowers during winter when flowers are scarce. Pkt., 15 cts.

Weinmannianum Tricolor. A new variegated variety. The leaves are green, yellow, silvery-white and pink, making the plant very effective during the whole year. The color of the foliage is not affected by the sun, which fact makes the plants valuable for bedding as well as pot culture. Pkt.,

10 cts

ESCHSCHOLTZIA. New Giant Hunnemania. A lovely new plant with the beautiful foliage of the Eschscholtzia enlarged, that develops into an herbaceous shrub, 21/2 feet high, adoined with large jonquil-yellow flowers on stems 12 inches long. These blossoms are cup-shaped, with broad over-lapping crinkled petals. The bright orange stamens are in fine contrast with the clear yellow flower. Seeds planted in spring make blooming plants by autumn, and once in bloom continue to flower for months. The flowers keep for two weeks in water. They measure three inches across. Pkt.,

Datura, Golden Qeeen.

FELICIA ABYSSINICA. A perennial that will flower the first year. It is a lovely dwarf alpine from Africa, producing in June a great abundance of graceful flowers of lilac color, which often changes to blue. Very suitable for border or carpet

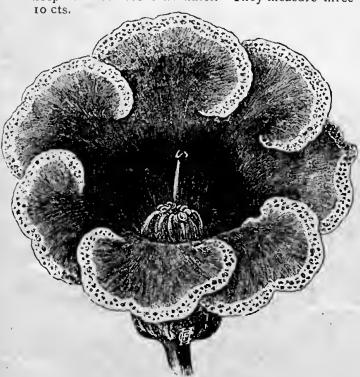

bedding. Pkt., 10 cts.

GLOXINIA. Aighurth Crimson. This is the finest high-colored sort ever sent out. As its name indicates, it is a vivid crimson self. The flowers are erect, of the finest form, substance, great size, and abundantly produced; the habit of the plant is all that could be desired. Pkt., 25 cts.

Grandiflora Princess Maud. This new variety is a grand addition to those already offered. Its throat is a light shining crimson red, shading to the top a rich dark carmine, followed by a beautiful edging of pure violet, while a broad band of white spotted violet surrounds the whole of this fine waved

bloom. Pkt., 25 cts.

Giant Hybrids. From time to time flowers of quite unusual dimensions have appeared in collections of Gloxinias. These giant flowered varieties have now been fixed. The seed we offer is the product of one of the finest assortments, and may be depended upon to reproduce itself quite true. It is saved only from strikingly beautiful flowers which measure 41/2 to 5 inches across, the colors of which are rich and varied in the extreme. Pkt., 40 cts.

Gloxinia. Princess Maud.

GODETIA GLORIOSA. Very showy new variety of the same habit and dwarf compact growth as the Lady Albemarle Compacta, from which it differs essentially by its large, satiny, brilliant, deep blood-red flowers. It is without doubt the darkest colored of all Godetias and produces a gorgeous effect by the wonderful brilliancy of its flowers. Pkt., 10 cts.

GODETIA. Yellow Queen. A new variety of the largeflowering class of Godetias, with pale yellow flowers. It is a valuable acquisition and sure to find favor. Pkt.,

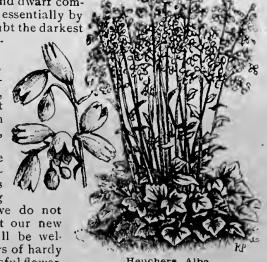

EUCHERA ALBA. One of the most charming perennials of recent introduction is decidedly the red-flowering

Heuchera sanguinea, and we do not doubt a moment but that our new white-flowering variety will be welcomed warmly by all lovers of hardy perennial plants. The graceful flower-

scapes, 15 to 20 inches in height, produce their pure white flowers just as freely as those of the red-flowering species and furnish a splendid

material for bouquets. Pkt., 25 cts.
HOLLYHOCKS. Breck's Silver Medal Strain. This strain introduced by us in 1891 as superior to any in cultivation, has well maintained its position. No other collection approaches it in length of spikes, pro.

fusion and texture of flowers and foliage or variety of colors. Collection of twelve distinct colors, \$1.00. Mixed colors, about 20 shades, pkt., 10 cts. See Special offers on third page of cover-

Lobelia Cardinalis Nanseniana.

LOBELIA CARDINALIS NANSENIANA.

A desirable addition to the Cardinalis class. It differs from others in the purple-crimson color of the flowers and its early and continned season of blooming. Pkt., 15 cts. erardi. Mixed. These are of the Cardinal

Flower class and are acquisitions, giving, as they do, a greater variety of color to cultivators of that favorite border plant. The flowers are produced in panicles of from 12 to 16 inches in length from June until frost; the colors are rose, coral red, blood red and purple violet. Mixed pkt., 10 cts.

Erinus Delicata. A new dwarf variety with large flowers of a brilliant indigo blue and a distinct,

clearly marked white eye. Pkt., 10 cts.
LEPTOSYNE GIGANTEA. This new Leptosyne, a native of California, is of peculiar habit and It is a biennial, but will flower here beauty.

the first year from seed. Our illustration gives a good idea of the form of the plant, but does not convey a shadow of its beauty. It is of quick growth, attains a height of four feet, and is crowned with a wealth of finely-cut, light-green leaves, from out of which the yellow sunflower-like flowers peep. Pkt., to cts.

Leptoeyne Gigantea

NASTURTIUM LOBBIANUM. "Good offer this California grown improved have a splendid vigorous habit, with The flowers are large with broad petals range through selfs in straw yellow, orange, scarlet, crimson, maroon red, copper, etc., etc., with combinations

See Special Offers on third page of cover.

NASTURTIUM LILIPUT. Under this title was introduced last year an entirely new class of Dwarf Nasturtiums and one which deserves the greatest attention. The plant is in every respect smaller than the Tom Thumb and the pretty little flowers, produced in the greatest profusion and standing up well above the small-cut, bushy foliage, make it one of the prettiest annuals imaginable. The blossoms are of the most varied and showy colors, and it is noteworthy that some quite new shades appear among them. The supply of seed last season was not nearly equal to the demand and we anticipate a similar condition this year. We have heard from several persons who grew this variety and all speak loud in its praise, Mixed colors, pkt., 15 cts.

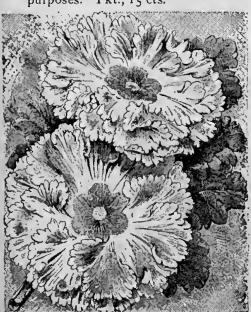

Petunia Hybrida. Snowball.

plants bloom when not over two feet high. Pkt., 25 cts.

PENTSTEMON GLOXINIOIDES. A new annual variety. Hitherto Pentstemons have not attained to the popularity they deserve because of the fact that they did not flower the first year. That difficulty is overcome in this new sort and we look to see it much grown in the near future. The flowers are very large, often two inches across, and of great variety and brilliancy of color. The seed should be sown in March and the plants set out about the end of May. They will flower continuously from the beginning of July until cut down by frost. Pkt., 25 cts.

PHYSALIS FRANCHETI. We are indebted to Japan for this addition to our ornamental plants. It grows about two feet high, is of erect habit and covered with beautiful foliage, which shows off its brilliant seed-pods to great advantage. The seed-pods are the striking feature of the plant; they are almost globular in form (see cut) over two inches in diameter, of a shining orange-red tint and enclose a cherry-like fruit of the same color. This is edible and especially recommended as a preserve. The intense color of the seed-pod makes the plant valuble for decorative purposes. Pkt., 15 cts.

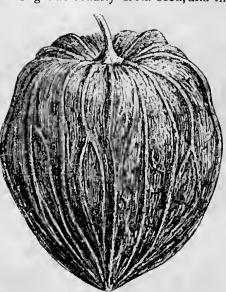

Primula Sinensis Fimbriata, Snowdon.

NYMPHÆA. (Water Lilies.) From Seed. Seed should be planted during March or April in a tea cup containing two or three inches of soil, and filled up with water. After planting, the cups should be placed in a temperature of from 70 to 80 degrees during germination, which ordinarily takes ten days. When large enough to transplant, prick into small pots and place them in a pan of water, deep enough to cover the pots about one inch. In June move to tubs or pools of water outdoors.

O'Marana, Zanzibarensis Aurea and Rosea, Gracilis, Cœrulea, Odorata Rosea. Separate or mixed. Pkt., 25 cts. For descriptions, see page xviii.

PETUNIA HYBRIDA. Snowball. A new and very dwarf variety that comes quite true from seed. Its beautiful, large, satiny white flowers entirely cover the plant. It is admirably adapted for bedding or pot cultivation, and is recommended as a novelty of merit. Pkt., 20 cts.

PASSAFLORÁ GRACILIS. A charming miniature Passaflora with small light green leaves, and pure white flowers about two inches across. It is fine for pots, extremely pretty in hanging baskets, and does well outside. It grows readily from seed, and the

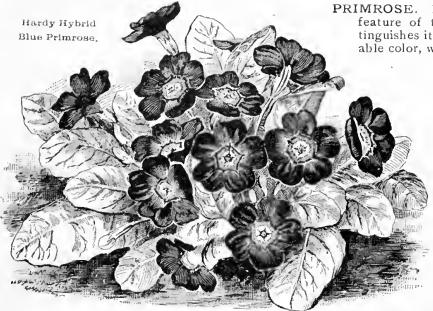

magnificent new Chinese
Primrose is, without doubt,
the finest white variety ever Fruit of Physalis Franchett.
offered. Borne in immense trusses, the flowers, of wonderful substance and glistening snowy whiteness, are of great size, measuring 2½ inches in diameter, beautifully fringed and crenulated, the crimped petals lapping and overlaying one another in such a manner as to impart to the blooms a depth that is quite remarkable. Pkt., 50 cts.

Sinensis Fimbriata. Magnum Bonum. This beautiful variety will form an excellent companion to the "Snowball" introduced last year. The plants are very sturdy, and compact in habit; the flower stem is strong and rises well above the foliage. The blooms, produced in great profusion, are very large and beautifully fringed. The color is a rich, deep red. Pkt., 50 cts.

PRIMULA OBCONICA FIMBRIATA. New, large-flowered. The flowers of this fine variety are not only much larger and of greater substance than the type, but are beautifully fringed; they are also much deeper in color, being a rich lilac. Pkt., 25 cts.

PRIMULA SINENSIS FIM-BRIATA. Snowdon. This

IMROSE. Blue Hardy Hybrid. The most prominent feature of this Primrose, and that which clearly distinguishes it from all others in cultivation, is its remarkaable color, which is developed into many shades of blue,

from pale lavender to deep violet. The flowers are freely produced on single stalks, not in bunches, rising well above the foliage, and are superior in size, shape and duration to the best of the older sorts. They have received six awards of merit from the Royal Horticultural Society of England, and a special award in April, 1895. We recommend this as a sterling novelty to all who love spring flowers. Pkt., 50 cts. POPPY, Yellow Rose. A beautiful new

POPPY, Yellow Rose. A beautiful new variety of the dwarf double carnationflowered poppy. The color is pale yellow and rose; a very pleasing combination. Pkt. 10 cts.

PETUNIA. Purple King. A valuable acquisition to 'the large-flowered class of petunias. When opening its flowers the color is of a velvety purplish violet,

which changes in a few days to blood red, and later into fiery red. A distinct lilac, dark-veined throat adds to its beauty. Pkt., 25 cts. PANSIES. Breck's Boston Prize. This strain stands easily at the

head of the list for size, form, substance, color, and every feature that goes to make the perfect Pansy. Since the original stock came into our possession a few years ago we have been continually improving it, and now we feel sure that Boston Prize Pansy is superior to all in quantity and quality of color, etc. Sold in sealed packages only. Pkt., 25 cts. For

complete list of Pansies see page 85.

STOCK. German Ten-Week. White Pearl. This new stock is described as being quite a distinct kind. The plants grow about 6 inches high, and are of compact habit, the leaves lying close to the stem. The petals are short, and densely close together in the double flowers, quite different, and much superior to any other kind, and of the purest white. The value of this new stock is much enhanced by its protracted blooming period, which unlike other Ten Week Stocks, lasts till the autumn. Pkt., 25 cts.

STOCK. Large-Flowered Pyramidal Ten Week. Brilliant Rose. Very effective new variety of this popular class of Ten-Week Stocks. It produces long flower spikes with large, well-formed double flowers of an extremely brilliant rose color. 75 to 80 per cent of the plants will prove to be double flowered. Pkt., 25 cts.

SCABIOSA. Pompadour. A new variety that grows to a height of 3 feet and produces very large flowers of a globular form. The

New Pyramidal Rose Stock.

large rounded petals are of a dark purple at the base, merging into a pure white from the centre to the edge. Pkt., 25 cts.

STOBAEA MEMBRANIFOLIA. Exceedingly handsome plant from South Africa. The leaves are 2 feet long by 6 inches in breadth; on the surface dark green, underneath silvery white. Flower scape branched, flowers large, sulphur-yellow. Pkt., 20 cts.

STREPTOCARPUS. Veitch's Improved Hybrids. These are dwarf in habit, profuse bloomers, and have an abundance of leaves. This strain is composed of the best and brightest colors, most elegant markings and largest forms only. Pkt., 25 cts.

SAINTPAULIA IONANTHA. The leaves of this interesting novelty, which are dark-green, of fleshy consistence and downy surface, spread themselves laterally just over the soil, and form, as it were, a rosette, in the centre of which spring up quite a bouquet of flowers, violet-like both in color and shape, but 1½ inches in diameter, and gracefully borne on stalks 2 to 3 inches high. These begin to appear while the plant is quite young and continue their display through the entire season. The seed is extremely fine and it requires similar treatment to Streptocarpus. Pkt., 25 cts.

See Special Offers on third page of cover.

SWEET PEAS.—Lathyrus Odoratus.

Here are Sweet Peas on tiptoe for a flight With wings of gentle flush o'er delicate white, And taper fingers catching at all things, To bind them all about with tiny rings .- Keats.

The varieties here described, together with those on pages 87-89, embrace everything in Sweet Peas, produced to date, that is distinct, beautiful and desirable. We were the first seedsmen in America to popularize these gems of beauty and fragrance and we still maintain our position with the largest stock of the best strains of the kinds that give satisfaction to planters. The prices we quote speak for themselves.

BRECK'S HARVARD. This beautiful, deep crimson variety, introduced by us three years ago, has become a great favorite throughout the country. Per lb.,

75 cts.; oz., 10 cts.; pkt., 5 cts.

BLUSHING BRIDE. The beautiful rose and white flowered variety, grown so largely by Boston florists. Per lb., 75 cts.; oz., 10 cts.; pkt., 5 cts.
FISHER'S SNOWFLAKE. A new white, that received the first first class

CERTIFICATE OF MERIT awarded by the Massachusetts Horticultural Society to a Sweet Pea. This fact alone is a sufficient guarantee of its superiority. It attains a height of about three feet, and produces on long stems an abundance of large, pure white flowers. It is an early and continuous bloomer, and sure to become a first favorite. We control the entire stock and offer it only in sealed packages. Per lb., \$1.50; oz., 20 cts.; pkt., 10 cts.

OTHER INTRODUCTIONS OF 1897.

Aurora. Very large flowers, borne usually three on a stem. Both standard and wings are striped and flaked on a white ground with bright orange-salmon. Pkt., 15 cts. Brilliant. Flowers of good size and substance. Color, bright crimson-scarlet. Pkt., 15 cts. Coquette. Rich primrose, tinted with apricot. Pkt., 25 cts.

Creole. A chance seedling from Lemon Queen. The standard is light-pinkish-lavender. The wings, pure

lavender. Pkt., 15 cts.

Countess. A pure light lavender throughout. Pkt., 15 cts.
Countess of Shrewsbury.' Soft rose standard. White wings. Pkt., 25 cts.
Golden Gate. Standard soft pinkish-mauve. Wings a lighter mauve and lavender. Pkt., 15 cts.
Lovely. Soft shell-pink. Grand form. Pkt., 25 cts.
Mars. Intense scarlet. Magnificent form. Pkt., 25 cts.

Maid of Honor. Light blue on a white ground, shaded and edged. Pkt., 15 cts. Prim's Donna. Light rose pink. Very beautiful. Pkt., 25 cts.

Red Riding Hood. This is an entirely new departure in form and its name is most appropriate. When fully developed the standard and wings are a pleasing rosy-pink, shading to blush white at the calyx; the keel, which is almost completely enveloped, being nearly pure white. It is early flowering, and in plentitude and continuity of bloom it excels all other sorts. It is very fragrant and produces its flowers on stems frequently eighteen inches long. Pkt., 10 cts.

DESIRABLE INTRODUCTIONS OF PREVIOUS YEARS.

Alice Eckford. Rich, Cream tinted cerise standards, white wings. Pkt., 10 cts.

Blanche Burpee. A pure white, of exquisite form and immense size. Oz., 10 cts.; pkt., 5 cts.

Blanche Ferry. Improved Extra Early strain. Two weeks earlier in flowering than the original Blanche

Ferry. Oz., 10 cts.; pkt., 5 cts. Cupid. The general experience with this new dwarf variety was somewhat disappointing last season, yet we would recommend our friends to give it another trial before condemning. It has merit although a little time may be necessary to develop the good points. The plants attain a height of six inches only although the pure white flowers are as large as those of the more vigorous growing sorts. Oz., 30 cts.; pkt., 10 cts.

Crown Jewel. Pale standard, tinted and veined with

violet-rose, the wings creamy, slightly tinted with rose.

Pkt., 10 cts.

Captivation. Rosy-purple self, finely expanded, Pkt., 10 cts.

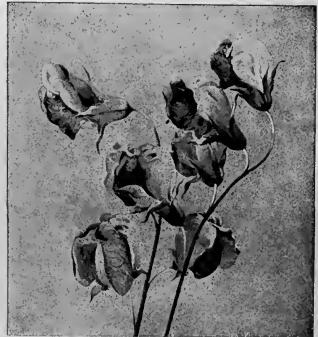

Countess of Aberdeen. White margined with pale pink.

Duke of York. The standard is bright, rosy pink, with a primrose tint. The wings are primrose, tinted white. Pkt., 5 cts.

Eliza Eckford. Standards a pretty hue of rose, the back of the standards having each a flake of deep rose and tinted with the same. The wings delicately striped

with rose. Pkt., 5 cts.

atherine Tracy. The color is soft, but brilliant pink. Oz., 10 cts.; pkt., 5 cts. Katherine Tracy. See Special Offers on third page of cover.

SUNFLOWER. Stella. This new annual Sunflower attains a height of 3 to 4 feet and differs from the miniature sunflower by its larger and better-formed flowers of the purest goldenyellow, with a black disc. The individual flowers, 3 inches across, are all borne on long stems and rise well above the small green foliage. Sown on a sunny spot in the open ground in May, flowers may be cut daily from July until the plants are killed by frost. Pkt., 10 cts.

New Double-Flowered Annual, This plant in many respects

resembles the well-known double-flowered perennial sunflower. It is of compact, pyramidal growth, attains a height of 6 feet and is entirely covered from the end of July until frost with

beautiful double, golden-yellow flowers. Pkt., 10 cts.

THISTLE. Onopordon Acanthium. A new, white-flowered variety. The leaves and stalks are of a greyish-green color, covered with a cobwebby texture. The plant attains a height of 7 feet and forms attractive specimens or groups. Sow the seed singly in small pots and transplant without disturbing the roots as soon as large enough. Pkt., 20 cts.

ZINNIA HYBRIDA. New hybrids obtained by crossing Z. Haageana and Z. elegans pomponicus fl. pl., resulting in single, semi-double and double flowers not larger than the latter section, and combining the colors and markings found in the Japanese Chrysanthemums, Gaillardias, Coreopsis, etc., such as yellow and orange-red, white to violet, including the lighter shades such as flesh and pale rose. Pkt., 20 cts.

Little Dorrit. Carmine, tinted pink standard, large white wings. Pkt.,10 cts.

Meteor. Standard very bright orange salmon, wings delicate pink with slight veins of purple. Pkt. 10 cts.

Mikado. Deep Orange cerise ground, striped white. Pkt. 15 cts. Mrs Joseph Chamberlain. White Striped

and flaked with bright rose.Pkt. 10 cts. Princess May. The standard and wings throughout are pale heliotrope. Pkt., to cts.

Breck's Boston Mixture. Lb., 75 cts.; oz., 10 cts.

Breck's Choice Mixture, Lb., 60 cts.; oz., 10 cts

Eckford's Mixture. Lb., 60 cts.; oz.10 cts. For other varieties of Sweet Peas see pages 87-89.

Sunflower, Stella.

BULBS AND PLANTS.

Achimenes.

ACHIMENES Free flowering plants of easy cultivation. The bulbs should be potted early in a mixture of loam and leaf mold. Keep warm and water carefully. Assorted colors, 5

cts. each; 50 cts. doz.

AGAPANTHUS. African Lily. These are fine for tubs, pots, vases, etc. The flowers are borne in magnificent trusses that show to advantage against the glossy-green foliage.

Umbellatus, Lily of the Nile. Blue, 50 cts. each.

Umbellatus, Albus. White, 50 cts. each.

AMARYLLIS. Lovely lily-like plants that produce flowers in almost every shade of color, ranging from pure white to deep crimson.

Pink and white. Showy for borders. 15 cts. each; Atamasco. \$1.50 per doz.

Belladonna Major. Rosy pink, fragrant, 25 cts. each. Crispa. Deep pink. 25 cts. each.

Carmine with white stripes. 60 cts. each. Defiance.

The flowers measure five or more inches across, Equestre. and are bright, sparkling orange-red, with a green and white

star at the centre. 20 cts. each; \$2.25 per doz.

Formosissima. (Jacobean Lily.) Blooms freely out of doors, the flowers are of a deep velvety crimson. 15 cts. each; \$1.75 per doz.

Johnsonii. Large crimson and white flowers. 50 cts. each; \$5.00 per doz.

See Special Offers on third page of cover.

AMARYLLIS-

Lutea. (Sternbergia.) Showy yellow, autumn flowering variety. 15 cts. each; \$1.50 per doz. Vallotta Purpurea. Crimson-scarlet flowers, borne

in clusters of five or six on a long stem. A fine sort for pot culture. 50 cts. each, \$4.00 per doz. ittata. Red and white grounds, beautifully peaked with many tints. 60 cts. each. Vittata.

APIOS TUBEROSA. A pretty, hardy, native climber. Flowers resemble the well-known Wistaria; very fragrant. 20 cts. each; \$2.00 per doz.

ANEMONES. Wind-Flower. The following sorts are perfectly hardy and well worthy a place in every garden.

A. Japonica. 2 ft., September. Of free, vigorous habit of growth, and in autumn producing a continuous abundance of bright red flowers. 20 cts. each; \$2.25 per doz.

A. Japonica Alba. 2 ft., September. An excellent companion to the preceding sort. The flowers are pure white with yellow centre, fine for cutting.

20 cts. each; \$2.25 per doz.

A. Japonica. Whirlwind. This plant is of more vigorous growth than either of the above, and has handsomer, broader and thicker foliage. The poses. 25 cts. each; \$2.50 per doz.

Tuberous Rooted Begonias

CALADIUM ESCULENTUM. Beautiful, ornamental foliage The leaves are of immense size, light green, with darker Will grow in any good garden soil, to a height of five veins. feet. Dry bulbs, according to size, 10, 15 and 20 cts. éach; \$1.00 to \$2.00 per doz. Bulbs started in pots, 20 and 25 cts. each; \$2.00 to \$3.00 per doz.

CALLA LILIES. White. 25 cts. each; \$2.50 per doz.
Little Gem. 25 cts. each; \$2.50 per doz.

CINNAMON VINE. A hardy climber with shining green foliage and fragrant white flowers. 6 cts. each; 50 cts. per doz.

CRINUM. Amaryllis-like bulbous plants, suitable for pet or open ground culture.

Capense. Bright Rose. 25 cts. each.

Kirkii. Large white, purple-striped flowers borne on dark purplecolored stems 2 feet high; 40 cts. each.

Ornatum. Delicate blush with a pink stripe through the centre. Very fragrant. 35 cts. each.

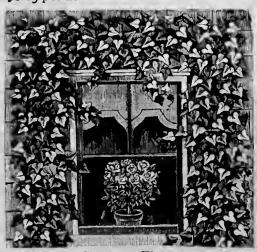

BEGONIA. Tuberous Rooted. These are desirable plants for bedding as well as pot culture. The flowers are not destroyed by rain storms but seem to shine more brilliantly after every shower. The colors are varied and beautiful. Our bulbs are from the same source as our seed and are unsurpassed. Single flowered sorts, red, crimson, scarlet, rose, pink, white, yellow, gold and bronze, striped and fiaked. 10 cts. each.; \$1.00 per doz; \$7.00 per 100. Single Flowered. Mixed colors, 6 cts.

each; 50 cts. pe. doz.; \$3.50 per 100.

Double Flowered Sorts. Same colors as the single kinds. 15 cts. each; \$1.50 per doz.

Double Flowered Mixed. 12 cts. each; \$1.25 per doz.

Cinnamon Vine.

See Special Offers on third page of cover.

WE DOUBLE IT!

We will take pleasure in duplicating all FIRST PREMIUMS offered in 1897 by any Horticultural or Agricultural Society in the United States, that may be secured with the produce of seeds or bulbs purchased of us. WE WILL PAY the amount on presentation of the certificate of the society's award, accompanied by a statement that the seeds from which the prize winners were grown, were BRECK'S SEEDS.

This offer is copyrighted.

Our purpose in making this unique offer is threefold:

- 1st. We aim to awaken a greater interest in Horticultural and Agricultural Societies, and to increase the competition at their Exhibitions for the premiums offered.
- 2nd. We hope that the enhanced value of the First Prizes—our offer, you observe, doubles each one—will result in the production of better specimens exhibited, through the planting of high-grade seeds and more intense cultivation; and that by demonstrating possibilities, stimulate a purpose on the part of both gardeners and farmers to raise better, and, therefore, more profitable crops.

3rd. We believe that the Flower, Vegetable and Field Seeds and Flowering Bulbs offered by us are the best strains in the world, and we wish to encourage those who are not acquainted with our goods to ascertain it by experience.

If you are successful in obtaining any First Prizes with the product of Breck's Seeds (Cereal grains excepted) or Bulbs, send us the society's certificates of such prizes (which certificates will be returned to you), together with any particulars of cultivation, or other matter of interest, and we will send you a sum equal to that awarded by the society. The same specimens must not be entered in more than one class or show, and if awarded specific prizes they cannot also be included in collections. We do not duplicate prizes offered for arrangement of exhibit.

Persons who intend competing for prizes must secure the necessary seeds or bulbs direct of us.

Entrance at the "Big Clock," 51 and 52 North Market Street.

Also Entrances at 46 Merchants Row and 21½ North Street, BOSTON, MASS.

Infat Frecher for

Experience versus Experiment.

Wise Cultivators Plant Breck's Seeds.

WE DOUBLED IN 1896

Nearly Five Hundred First Prizes, secured at over One Hundred Exhibition's, with the Product of

Mr. H. R. KINNEY. Breck's Seeds and Bulbs. MR. W. HEUSTIS.

The success, profit, and satisfaction that have accrued to our customers under the offer to duplicate all first prizes secured with the product of Breck's Seeds and Bulbs, was a subject of almost daily correspondence and congratulation during the summer and fall of 1896.

The hundreds of letters of thanks and particulars of achievements with the products of Breck's Seeds against all others, received from all over the United States, have induced us to renew the offer this year. (There are no conditions except those mentioned on opposite page,) and knowing the quality of the seeds we offer, and results obtainable by planting them, we already anticipate with pleasure the demands that will be made on us when the exhibition season of 1897 begins.

In 1895 the highest amount paid by us under this offer, to any one party was \$90.50, to Mr. West, of Fayetteville, Wis. Last year Mr. Kinney, of Worcester, headed the list with the grand total of \$1.42.50, being an equal sum to that awarded him as first prizes at the exhibitions of the Bay State Society, the Worcester County Horticultural Society, and the Massachusetts Horticultural Society. Mr. Kinney's prizes included the premium offered by the last named Society for the best collection of vegetables.

Messrs. Warren Heustis & Son, the Mass., were as usual well placed and gained of Breck's Seeds. They were only second hest collection of vegetables, so that

the first, but both prizes offered by the As a result of Messrs. John Grape & exhibiting, we had opportunity to duplicate product of Breck's Seeds at the great include the best collection of vegetables. photograph of their exhibit, and informed ever bought; they also assured us of their from other parties in their neighborhood of our seeds.

Mr.F. A. Wolfe, Salem, Oregon, who, Board of Agriculture, the first prize of grown in the State, not only again but also first prizes for the best collection well-known market gardeners of Belmont, some twenty first prizes with the product to Mr. Kinney in the competition for the Breck's Seeds secured in this class not only Massachusetts Horticultural Society. Co., market gardeners, Waukesha, Wis.,

sixteen first prizes awarded to them on the Wisconsin State Fair; these awards again Messrs. Grape & Co., kindly sent us a us that ours were the best seeds they had own orders in future, and a great many who are satisfied as to the superior quality

in 1895, was awarded by the Oregon State \$20 00 for the best collection of vegetables captured that much competed for premium, but also first prizes for the best collection of vegetables for the family garden, and best collection of vegetables for the market garden, in addition to eleven other firsts with the product of

Breck's Seeds. The sum we duplicated was \$65.00. At the New York State Fair our seeds secured like enviable positions to those who planted them; Mr.

E. W. Eno, Hannibal, N. Y., was awarded fourteen first prizes, including the premiums offered for collections of Asters and Ten Week Stocks. Mr. C. H. Dana, of White River Junction, Vt., demonstrated in that State the excellence of Breck's

Seeds. He raised the best general collection of vegetables, for which he was paid the Vermont State Fair prize of \$12.00, and an equal sum by us. Nine other first prizes, amounting to \$25.00, were also gained at the same exhibition by Mr. Dana.

Worcester County, Mass., growers made many demands on us to duplicate first prizes awarded by their Horticultural Society, but a single example will suffice, namely, that of Mr. C. L. Hartshorn, who gained \$34.50 in sixteen classes. This sum we doubled.

MR. GRAPE.

The portraits here reproduced of a few of these enterprising and skilful growers will doubtless be recognized by many of our friends. Lack of space prevents our entering further into detail on this subject. The particulars given of the success attending growers of Breck's seeds at the largest and most keenly competed exhibitions of the country, is a sufficient evidence as to the quality of our seeds.

We hope the renewal of our offer to "Double It" will re-

sult in an increased interest in Horticultural and Agricultural Societies, larger and more profitable crops to cultivators, and a just appreciation of the excellence of

BRECK'S PEDIGREE SEEDS.

MR. ENO.

LARGE FLOWERING DWARF FRENCH CANNAS.

The appreciation of the improvements in Cannas shown by the gardening public has resulted in increased effort being made to still further enhance their value as ornamental garden plants. We know of nothing so effective in foliage or continuous in flower as these new Dwarf French Cannas. They are very popular, and they are certainly entitled to a place in every garden. There are now a great many sorts

being catalogued, but those here described are the best in size, substance

and colors of flowers and foliage.

Alphonse Bouvier. Height, 5 feet; flower, crimson-scarlet; foliage,

Height, 4 feet; flowers, yellow, speckled with

orange-scarlet; foliage, green.

Height, 4 feet; flowers, pure yellow, very large and exceedingly beautiful; foliage, musa-like in color and form. Ea. \$1.co.
Charles Henderson. Height, 3½ feet; flowers, deep crimson; foliage, green; 25 cts. each; \$2.50 per doz.
Chicago. Height, 4 feet; flowers, vermillion-scarlet, shaded orange; foliage, deep green. 50 cts. each; \$5.00 per doz.
Columbia. Height, 5 feet; flowers, bright crimson with deep orange

shading; foliage, light green. 50 cts. each; \$5.00 per doz. Eldorado. Height, 3½ feet; flowers, bright yellow, speckled red;

foliage, deep green; 35 cts. each; \$3.50 per doz. Egandale. Height, 4 feet; flowers, bright red; foliage, purple. 25

Florance Vaughan. Height, 32 feet; flowers, golden yellow, spotted with bright red; foliage, deep green. 25 cts. each; \$2.50 per doz

F. Morel. Height, 3½ feet; flowers, bright scarlet; foliage, dark green. F. R. Pierson. Height, 3½ feet; flowers, bright scarlet; foliage, green. 50 cts. each; \$5.00 per doz.

Geoffry St. Hillaire. Height, 5 feet; flowers, glowing orange; foliage, chocolate.

Gustav Sennholz. Height, 3½ feet; flowers, silvery rose, mottled with

salmon; foliage, deep green.

The most beautiful and valuable variety yet introduced; this with Austria forms the beginning ITALIA. of a distinct type that will doubtless lead to many wonders in Cannas. Height, five feet; flowers, yellow, blotched with orange-scarlet and bordered with golden-yellow; much larger and more attractive in every way than any other variety; foliage, light green veined with dark green. \$1.25 each.

J. D. Cabos. Height, 4 feet; flowers, apricot with deeper shading; foliage, deep green. 25 cts. each; \$2.50

per doz.

Jules Chretien. Height, 4 feet; flowers, bright red, very large; foliage, deep green. Miss S. Hill. Height, 3½ feet; flowers, amaranth carmine; foliage, deep green.

Madame Crozy. Height, 3½ feet; flowers, crimson-scarlet, bordered with yellow; foliage, deep green. Mlle. de Cruillon. Height, 4 feet; flowers, light yellow, shading to terra cotta; soliage, light green.

Paul Marquant. Height, 4 feet; flowers, salmon, shaded red; foliage, deep green.

Queen Charlotte. Height, 4 feet; flowers, blood red, broadly banded with bright canary yellow; foliage, bluishgreen.

Souv d'Antoine Crozy. Height, 3 feet; flowers, intense scarlet-crimson with a broad, rich golden yellow edge; foliage, deep green. 50 cts. each; \$500 per doz. Vesuvius. Height, 4½ feet; flowers, crimson-scarlet; foliage, dark green.

Victor Hugo. Height, 4 feet; flowers, scarlet; foliage, quite dark.

Price, 15 cts. each, \$1.00 per doz., except as noted.

Cannas are not subject to either of our Special Offers.

CYCLAMEN. Suitable for pot culture only. Plant the bulbs in a light, rich soil, and water sparingly till started. Persicum Giganteum. Mixed colors, 25 cts. each; \$2.50 doz. Started Plants in pots, 50 cts. to \$1.00 each. CYCLOBOTHRA FLAVIA. This golden gem is of great beauty and easily grown; the habit of plant and bloom is

similar to Bessera; the color is clear golden-yellow, with intense black spot on each petal. 8 cts. each; 80 cts. per doz. CACTUS. These plants require absolutely no care. They grow for months in the house or garden without watering, and increase in value yearly. Their flowers are of exquisite beauty and fragrance, and their curious forms render them exceedingly interesting. In winter they require scarcely any water. We send by mail 10 fine plants of blooming size, each one distinct and named, for \$1.00, or 5 for 50 cts.

POMPON AND HARDY CHRYSANTHE-MUMS. The popularity of the "Queen of Autumn," as grown by florists, has caused attention to be given to the smaller flowered, but none the less beautiful, hardy sorts of this family. We are glad to be in a position to offer the following eighteen varieties for garden cultivation. They include a much greater diversity of color and

form than has hitherto been obtainable in any collection, and we are sure they will delight all who plant them.

ing winter. Each, 10 cts.; per doz., \$1.00. Viscount de Vere, lilac-pink; Grunnewald, pink; La Vogue, yellow; Souvenir de Jersey, yellow; Mlle. Martha, white; Blushing Bride, white,

shaded pink; Roi des Precoses, red, shaded bronze; Emily Roewhite; Snowdrop, white; Gen. Canrobert, yellow; Bronze Melane, white; Mme. des Granges, white; Julius Lagrave, Rose Trevenna, pink; Bob, brown and white; Model of Per-La Count de Franchaise de Cannel, bronze.

CHRYSANTHEMUM. We offer these from one of the largest the country. If what you want is not included in the sorts your list, we can furnish every desirable variety.

John . Shrimpton, deep red; Pink Ivory, pink; S. T. Maud Dean, dark pink; Erminilda shellpink; Minnie white; Yellow Queen, early, bright yellow; Major ary yellow; Gold Lode, dark yellow, early; M.

white; L. Canning, white; President Hyde, yellow;
Hardy Chrysanthemum.

Ada Spaulding, light pink; Cullingfordi, dark red; Col. W. B. Smith, yellow; E. G. Hill, yellow; Harry May, yellow; Ivory, white; J. H. White, white; Lincoln, yellow; Mrs. Jerome Jones, white; Mutual Friend, white; Sunnyside, pink; Yellow Ball, yellow. Ready for delivery after the middle of April. 15 cts. each; \$1.50 per doz.

CARNATIONS. For blooming in the garden we can furnish three colors that will flower if set out after the middle of May, from

July until frost.

Scarlet, Crimson, White. Extra strong plants from pots. 25 cts.

each; \$2.50 per doz.

Mound Pinks. These old favorites, if given enough room, form a pretty mound of bluish-green foliage and produce freely beautiful, blush-pink, fragrant flowers. 20 cts. each; \$2.00 per doz.

Nicholson. Soft rose, very fragrant. 20 cts. each; \$2.00 per doz. Ada Byron. Rosy-pink, very fine. 20 cts. each; \$2.00 per doz.

Margaret. This is the new class that blooms from seed in about four months. About 90 per cent of the flowers are double. All very sweet scented and they embrace a great variety of delicate shades. They are exceedingly useful for cutting. Strong plants,

15 cts. each; \$1.50 per doz.

CONVOLVULUS. Moon flower or Evening Glory. The flowers of this lovely climber are very large, freely produced, pure white in color and very fragrant. They open in the evening and are wonderfully attractive. They should not be set out until danger of frost is past. 15 cts. each; \$1.50 per doz.

CLEMATIS PANICULATA. We cannot better describe this

marvellously beautiful and fragrant climber than by the following, which appeared in a Boston daily paper, Sept. 19, 1892. "This is the time of the full splendor of that wonderful climber, as yet

quite new here, Clematis Paniculata. It covers some porches that the 'Listener' knows well, with a white sheet of beautiful bloom, and fills the air all about with a most delicious perfume. It was introduced only a few years ago, and its growth is so marvellously rapid, and its adaption to our climate so complete, that it already threatens to reach the housetops. In a general way it resembles our common wild Clematis or Virgin's Bower, but its blossoms are more profuse and pure white, and exquisitely and penetratingly fragrant. It needs a trellis to grow upon. Of course it is an added recommendation to it that its flowers come in late September, when shrubs and climbers in bloom are rare. It is only one of about a million beautiful things, more or less, in nature and art, that we owe the mother-land of gentleness and beauty, Japan." Plants, 25 cts. to \$1.00 each; \$3.00 to \$10.00 per doz.

At the Bay State Fair, Worcester, H. B. Watts secured First Prize for collection of Sweet Peas that were the product of Breck's Seeds. First Prizes on German Ten Weeks Stocks and large flowering Verbenas grown from our seeds were also awarded to Mr. Watts at the same exhibition.

Mrs. Frank Van Eps, Albion, N. Y., won the first prize for pansies at Orleans County Fair with Breek's Prize Strain.

CHRYSANTHEMUM, HARDY. Golden Fleece. A small yellowflowered variety for garden culture. 15 cts. each; \$1.50 per doz.

DAHLIAS. Large Double Show. Named sorts in a large variety of colors. 15 cts. each; \$1.50 per doz.

Pompon or Small-Flowered Double. These are really more desirable and popular than the foregoing. Named sorts in a great variety of colors. 15 cts. each; \$1.50 per doz.

Single Flowered. From a grand collection. 15 cts. each; \$1.50 per doz. Cactus. Large double and single flowered. 20 cts. each; \$2.00 per doz.

HARDY DAHLIA. Golden Ball. Although not really a Dahlia this plant bears so much resemblance to the family that the name is appropriate; the plants attain a height of 4 feet, are furnished with pretty dark green foliage, which in fall just shows through the covering of beautiful double golden-yellow flowers that last till frost. Seeds, per pkt., 5 cts. Extra strong plants, each, 15 cts.; per doz., \$1.50.

DODECATHEON MEADIA. A hardy plant, of rare beauty, producing large, cyclamen-like fragrant flowers.

Bulbs, 10 cts. each; \$1.00 per doz.

GLADIOLI. This valuable and easy cultivated class of bulbs is not half appreciated. They can be grown in beds or borders, and a continuous bloom can be kept up from June till frost by a succession of

planting. Fine mixed varieties, doz., 25 cts.; 100, \$1.75. Named sorts, mixed, doz., 30 cts.; 100. \$2.00. Scarlet shades in mixture, doz., 20 cts.; 100,

shades in mixture, doz., 35 cts.; 100, \$2.75. White shades in mixture, doz., 40 cts.; 100, \$3.00. Yellow shades in mixture, doz., 40 cts.; 100, \$3.00. Striped and variegated, doz., 30 cts.; 100, \$2.00. French Hybrids, doz. 50 cts.; 100, \$3.50. Lemoine's Hybrids, collections of

10 named varieties, \$2.00.

Gandavensis. White Lady. A new variety from Germany that is said to be superior to any other white. The flowers are large, of finest substance and of the purest white imaginable, the lower petals are slightly tinged with pale yellow; this pale yellow is so delicate and so clear that it does not impair the white of the flower in the least, on the contrary it enhances upon the white. The buds are light yellow before opening. The plants are of a remarkably strong growth and will generally produce several flower-spikes. Height,

2½ to 3 feet when in full bloom. Strong bulbs, \$2.00 each. Snow White. Nearly the entire spike of this variety is a perfect

paper white with a slight cream shade on lower end of petals. Each, 15 cts.; per doz., \$1.50.

Hyacinthus Candicans

GLOXINIA BULBS. Our stock of this exquisite plant is very choice. The bulbs should be potted in the spring in light sandy loam, and they will commence growing and blooming at once. In the fall, dry them and store in a warm place through winter. Strong, flowering bulbs, mixed colors, per bulb, 15 cts.; \$1.75 per doz.

HEUCHERA SANGUINEA. One of the handsomest hardy perennials of recent introduction. The flowers are of a rich crimson color, the leaves light-green. The graceful flowers on long spikes form splendid material for bouquets. Roots, 15 cts. each; \$1.50 per

oz. Seed, per pkt., 10 cts.

HYACINTHUS CANDICANS. Perfectly hardy. Grows to a height of three feet and bears an abundance of pure-white, bell-

shaped flowers. Each, 10 cts.; per doz., 75 cts.

IRIS KAEMPFERI. When these are in bloom nothing in the garden is grander. The name "Poor Man's Orchids" has been suggested for them on account of their ease of culture and great beauty. Think of a plant sending up to a height of 3 feet a dozen flower spikes, each spike bearing from two to four enormous blossoms 8 to 10 inches across, and of the most delicate and beautiful colors, markings, and combinations. The Kaempferi is this and much more, for with all its beauty it is perfectly hardy. Choice named varieties, \$2.50 per doz. Double and single mixed, \$1.75.

IRIS. GERMANICA. The German Iris bloom earlier than the Kaempferi, they embrace many charming combina-tions of colors, and are very fragrant. Choice named varieties, \$1.50 per doz. Fine mixture, \$1.00 per doz.

· IPOMÆA NOCTIFLORA. Moonflower or Evening Glory. These rapid climbers produce large, white, fragrant flowers that open in the evening, or earlier on cloudy days. They bloom from June until frost: 15 cts. each; \$1.50 per doz.

LILIES. Those who desire flowering plants that will, after planting, practically take care of themselves, find in this beautiful family almost everything desired. The Japanese sorts are in large demand, and may be styled the cream of the list.

Lillium Wallachianum Superbum.

"The variety Superbum of the Indian Lily is much superior to the type both in vigor of constitution and in the size and beauty of its flowers."— Garden and Forest, Aug. 27, 1890.

This is beyond question the most beautiful of all the Trumpet Lilies, the flowers being of purest white, the tube being about 10 inches long and shaded a most

lovely primrose yellow at the base.

Strong flowering bulbs, price, each, 50 cts.; per

doz., \$4.00.

Lilium Auratum. Golden Banded Lily of Japan. Immense white flowers, each petal marked with a wide gold band and spotted with maroon. Each, 20 cts.; per doz., \$2.00.

Lilium Lancifolium Rubrum. White with rich

crimson spots. Each, 15 cts.; per doz., \$1.50. Lilium Lancifolium Roseum. White stained and spotted rose. Each, 15 cts.; per doz., \$1.50.

Lilium Lancifolium Album. Large pure white

flowers. Each, 20 cts.; per doz., \$2.00.

MILLA BIFLORA. Beautiful white waxy flowers with pale lemon anthers. Deliciously fragrant. Plant outdoors in May and take up bulbs in Fall like Gladioli. Each, 10 cts; per doz., 75 cts.; per hundred, \$5.00.

MADEIRA VINE. A beautiful rapid-growing climber, bearing in profusion very fragrant white

MONTBRETIA. Crocosmiaeflora. Very large flowers of fine shape. Base of flowers is bright orange, sprinkled with purple spots, arranged like Tigridia. Each, 10cts.; per doz., 75cts. PÆONIES. We can furnish these well-known, old favorites in all the newest varieties.

Hardy Herbaceous Sorts, named. 50 cts. each.

Hardy Herbaceous, assorted colors; large flowering roots. 50 cts. each.

Hardy Herbaceous, large, double, white. 50 cts. each.

ROSES. The following are new sorts well worthy the attention of all

growers of the "Queen of Flowers."

Crimson Rambler. A new Japanese climbing variety introduced last year. It has proved perfectly hardy, and on account of its rapid growth, quantity and quality of flowers and fragrance, it is destined to become the leader among climbing sorts. Plants, each, according to size, 25 and 50 cts.

Hybrid Rugosa. Madame G. Bruant. Double white. A cross between Rugosa and Tea. Very fragrant, large white, semi-double flowers, shaped like Niphetos. 50 cts. each; \$5.00 per doz.

Madame Chas. Worth. Similar to preceding except color, which is

reddish carmine. 50 cts. each; \$5.00 per doz. New Afghan Yellow. A new and beautiful yellow rose from India. The plant is of bushy growth and very productive. 50 cts.

> each. SMILAX. A beautiful climber for greenhouse or window culture. Plants from 21/2 inch pots. 15 cts. each; \$1.00 per

doz. TIGRIDIA. (Shell Flower).

. Beautiful, large, shell-like flowers, produced from July until frost. They require similar treatment to the dahlia.

Conchiflora. Orange and crimson spots. 5 cts. each; 50 cts. per doz. Grandiflora. Crimson. 5 cts. each; 50 cts. per doz. Grandiflora Alba. White flowers spotted with maroon and rose. 5 cts. each; 50 cts. per doz.

Pavonia. Red with crimson spots. 5 cts. each; 50 cts. per doz. TUBEROSES. These are universal favorites and very easily grown. Before potting, remove the small offsets. Use rich loam and start in hot bed or in house. Do not set out until all danger from frost is past. Excelsior Double Pearl. 5 cts. each; 25 cts. per doz.; \$1.75 per 100.

Tall, Double. 5 cts. each; 25 cts. per doz.; \$1.75 per 100. This variety is hardicr and earlier than the others. The flowers are single, white; large and fragrant. 5 cts. each; 30 cts. per doz.; \$2.00 per 100.

Tigridia.

Tuberose.

FOLIAGE PLANTS FOR THE HOUSE.

ARICA LUTESCENS. A majestic palm. Its dark, glossy-green leaves are gracefully curved on slender stems. The trunk and stems are a golden yellow, irregularly spotted with bronzy green. Each, 1½ ft.,\$1.50; 2½ ft.,\$3.00. KENTIA BELMOREANA. Sometimes called the "Curly Palm," recognized as one

Kentia Belmoreana

of the best for all purposes, being able to withstand more ill-usage, perhaps, than any other. Each, 1½ ft., \$2.00; 2 ft., \$3.00; 3 ft., \$5.00.

LANTANIA BORBONICA. This is a typical palm and is more largely used than

any other. It is of strong, healthy habit, and especially suitable for window culture. Each, 11/2 ft., \$1.50; 2 ft., \$2.00; 21/2 ft., \$3.00; 3 ft., \$5.00.

PANDANUS UTILIS. This is a most desirable variety for window culture, and will bear without injury a great deal of neglect. Each, 1 ft., \$1.00; 1½ ft., \$2.50. DRACENA INDIVISA. Valuable as a window plant and for centres of vases, baskets, beds, etc.; 50 cts. to \$1.50 each.

DRACENA TERMINALIS. A beautiful decorative plant, gorgeous shades of crimson, bronzy-green and pink foliage; 50 cts. to \$1.50 each.

RUBBER PLANTS, Ficus Elestica. We can furnish nice, healthy plants of this favorite at from \$1.00 to \$5.00 each, according to size.

NEPHROLEPSIS EXALTATA. Sward Fern. A very popular window-plant. It bears well with heat, dust and neglect, and always has a bright, fresh appearance. Strong plants, 50 cts. to \$2.00 each.

AQUATIC PLANTS.

These are now indispensable in all gardens as well as in our natural ponds and swamps. They are as easy to grow as is our native pond lilies. During the past year the plants and flowers have been seen in rich abundance and they have been the most attractive features of our exhibitions. No plants are grown with less care or give such satisfaction for the amount expended. They flower profusely from early spring until cut off by frost.

The hardy varieties may be planted as soon as vegetation commences in the spring. If not convenient to grow them in a pond or lily tank (which is preferable), they may be grown in tubs, several varieties being well adapted to this mode of culture. A warm sheltered position, yet with full exposure and sunshine should be selected. Fill the tubs two thirds full of turfy soil enriched with decomposed hot bed or farmyard manure; cow manure is very desirable; cover with two inches of sand and fill with water. The crowns of the plants should be placed just under the surface of the soil.

The tender varieties should not be planted until warm weather sets in, or from the 1st to the 10th of June. Nelumbiums, though hardy when established, should not be planted as early as the hardy nymphwas; the latter end of May or first week in June is the best time to plant in our northern states.

HARDY VARIETIES.

NELUMBIUM SPECIOSUM. (Egyptian Lotus.) The well-known and far-famed species. Its superb flowers and magnificent foliage produce a splendid sub-tropical effect. The flowers, which are about a foot across when fully opened, are of a deep rose color, with a soft creamy white at bases of the petals; exquisitely fragrant. Flowering tubers, 75 cts. and \$1.50 each.

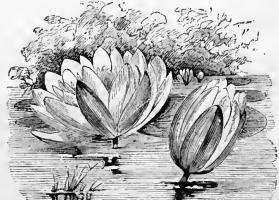

NELUMBIUM LUTEUM. (American Lotus.) This grand Lotus is indigenous in several sections of the United States, but is nevertheless little known generally. It thrives under the same conditions as N. Speciosum, from which it differs only in the color of its flowers, which are of a rich, sulphur yellow tint. 75 cts. and \$1.50 each; \$7.50 per dozen.

NELUMBIUM KERMESINUM. Another distinct and charming variety, bearing flowers resembling the Hermosa Rose in color. It received the award of a first-class certificate of merit from the Massachusetts Horticultural Society. \$2.00.

The large flowering NYMPHÆA ALBA CANDIDISSÍMA. variety of the English water lily; flowers six inches in diameter; pure white with broad petals; the earliest flowering variety, and continuous until frost; a superb variety; one of the best in cultivation. \$1.00 each; \$10.00 per dozen.

NYMPHÆA ODORATA. The well-known, fragrant pondlily. Its lovely, pure white flowers, so common in some locations, is worthy of a place among the choicest varieties where cultivated. All Nymphæas of this type are useful for naturalization. 20 cts. each; \$2.00 per dozen.

NYMPHÆA ODORATA GIGANTEA. This is a superb variety and should be in every collection, similar in all respects to N. Odorata, but the flower is very large and full. A Southern variety of the N. Odorata type. 20 cts. each; \$2.00 per dozen.

Nymphæa Odorata.

NYMPHÆA ODORATA ROSEA. (The popular pink Cape Cod Water Lily). It possesses all the desirable qualities of N. Odorata. The flowers are of large size, cup-shaped; a lovely deep pink in color; delicious fragrance and free bloomer; a most desirable variety. 50 cts. each.

NYMPHÆA ODORATA SULPHUREA. One of the very best new water lilies, with large, yellow, fragrant flowers, standing a few inches out of the water. It is very free blooming and has the fragrance of N. Odorata. The leaves are deep green, beautifully mottled with reddish purple or brown spots; a great acquisition. 50 cts. each.

NYMPHÆA MARLIACEA CHROMATELLA. A charming variety. The general habit of the plant is similar to Nymphæa Candidissima, and it succeeds admirably under the same conditions. The leaves are mottled with brown when in a young state, and its large fragrant flowers, which are a beautiful clear yellow with bright, orange stamens, are produced from early spring until destroyed by frost. A great acquisition. 50 cts. each.

TENDER VARIETIES.

NYMPHÆA CŒRULEA. (Stellata.) One of the choicest of all Nymphæas. The flowers are a clear light blue, very delicately scented; produced in abundance through the season, until frost; six to eight inches across. Native of Egypt and other parts of Africa. Also known as the Blue Lotus. \$1.00 each.

NYMPHÆA DENTATA. The largest and best white, night-blooming variety; flowers of the largest size; long,

pointed buds, on strong stalks, opening horizontally; leaves deep green, with serrated edges. Native of Sierra

Leone. 50 cts. each.

NYMPHÆA DEVONIENSIS. This is one of the very choicest Water Lilies in cultivation, and indispensable in a moderate collection. The flowers are a brilliant rosy red, a most pleasing color by artificial light, produced on stout stalks standing above the water, and are from 10 inches to 12 inches across. The leaves are deep green with reddish shade. 50 cts. each.

NYMPHÆA ZANZIBARENSIS AZUREA. This is similar to the true Zanzibarensis except in color, being deep, rich azure blue, one of the very best for general

purposes. 50 cts. each.

NYMPHÆA ZANZIBARENSIS ROSEA. Similar in every respect to the preceding, save in color, which is a beautiful deep rose, under surface of leaves also red; should be in every collection; very choice. 50 cts. each.

EICHHORNIA CRASSIPES MAJOR. (Water Hyacinth.) A very showy aquatic, bearing very freely flowers of a delicate lilac rose in trusses like a hyacinth. The individual blooms are 2 inches in diameter. It should be grown in about 3 inches of water, so that the ends of the roots can enter the soil. 15 cts. each, \$1.50 per doz.

LYMNANTHEMUM INDICUM. (Water Snowflake.) A very pretty floating species, with light green, roundish leaves and pure white flowers most beautifully

fringed. 25 cts. each.

LIMNOCHARIS HUMBOLDTI. (The Water Poppy.) A pretty little aquatic, with oval leaves, and yellow, poppy-like flowers, standing out of the water. It is a good plant for growing in shallow water or an aqua-

rium. 15 cts. each, \$1.50 per doz.

MYRIOPHYLLUM PROSERPINACOIDES. (Parrot's Feather.) An aquatic hanging plant is a novelty

indeed, and we have it to perfection in this dainty little jewel. Its long trailing stems are clothed with whorls of the most exquisite foliage, as finely cut as the leaves of the Cypress Vine, and much more delicate. Planted in a water-tight hanging-basket, so water can be kept standing on the surface, it will trail finely. 15 cts. each; \$1.50 per doz.

CYPERUS PAPYRUS. This is the true Egyptian Paper Plant. It grows finely in shallow water with rich soil, and makes a splendid companion for flowering aquatics. It will also flourish and make a fine clump in the

garden, with no more water than Cannas require to make them do well. 25 cts. each.

ZIZANIA AQUATICA. Wild Rice. This native aquatic annual is very ornamental in the water garden; its graceful panicles of bloom are produced on stalks 5 to 10 feet high; should be grown in shallow water. 10 cts. each; 75 cts. per doz.

ANNOUNCEMENT.

As stated in our CARD (see inside page of first cover) we desire to call your especial attention to our

ILLUSTRATED CATALOGUE

.....OF.....

AGRICULTURAL HARDWARE, IMPLEMENTS, MACHINES, AND WOODENWARE.

The following brief synopsis will serve to show its value as an "Encyclopedia of Everything for the Farm,
Garden, Lawn and Household."

CONTENTS

Improved Farm Machinery, Spraying Appliances
Dairy Supplies, Hoes Forks, Rakes, Etc.
Barn and Stable Supplies, Lawn Supplies
Farm, Garden and Greenhouse Requisites
Haying Tools of Every Description
Household Goods, Ensilage Machinery
Shovels, Spades and Scoops, Contractors' Supplies
Saws, Axes, Hammers, Hatchets
Cider Machinery, Handles of all kinds
Chains for all purposes, Root Cutters
Poultry Supplies, Incubators and Brooders
W. T. Wood & Co. Celebrated Ice Tools
Improved Maple Sugar Supplies
Self-Steering Sleds
Woodenware, a complete line

Etc. Etc. Etc.

This catalogue contains about three hundred large pages $(8\frac{1}{4}\times11\frac{1}{4})$; nearly one thousand illustrations, and is in fact the result of our experience covering a period of over 70 years. The book is now in the hands of the printer and we hope to be able to send it to customers who apply for it, about March 1, 1897.

Jufil Procker for

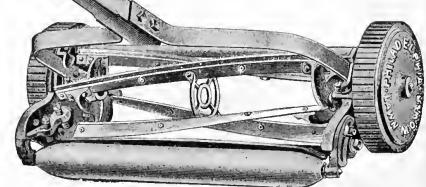

Genuine Philadelphia Lawn Mowers

FOR 1897

HAND MACHINES.

Recognizing the fact that we are the pioneers in the retail lawn mower business of the United States, the Philadelphia Lawn Mower Co., of Philadelphia,

Penn., have given us the exclusive sales in eastern New England of their latest and best inventions, namely, the new mowers designated as styles T and K, (as shown in this circular.

Style T Philadelphia Mower.

HAND MACHINES

PRICE LIST. LB &S Mfrs. Net Cash Width Weight 12 in. 30 lbs. \$16.00 \$6.00 14 0 32 0 17.006.5016 " 31 4 19 00 7.5018 " 36 " 21.008.5020 ' 38 " 23.009.50

We again offer these machines, knowing from last season's experience with them that they are, without question, the best in the market. Each machine is fully warranted against defects and to work as represented. This guarantee is a safeguard to the purchaser, and of such a nature, that we would not be warranted in offering same, were machines not perfect in every respect.

The style T machines have wheels 7 inches in diameter. The wiper is made from wrought iron, having the spiral knives bolted on. By this device the knives can be easily detached and replaced at a

trifling cost, if necessary. Having a four-blade cylinder, the machine does fine work. While these improve ments add considerably to the cost, the price is no higher than that of other machines. Every Style T Mower will be accompanied with our guarantee, covering a period of five years.

The Style K Mower, with its ro-inch wheels and 5-bladed cylinder is the lightest running and smoothest cutting mower ever used on a lawn. It will cut as high grass as any machine made, and, like the other Philadelphia mowers, it combines all that is desirable in the way of quality, simplicity, durability and ease of operation. Taking the foregoing into consideration, the prices are very reasonable.

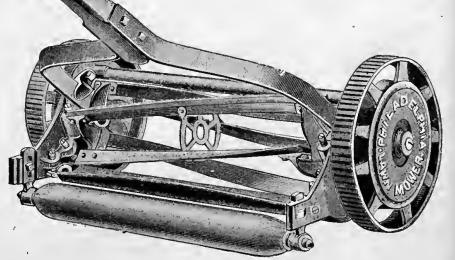

PRICE LIST.

J.B.&S. Mfrs. Net Cash Width Weight Price 14 in. 45 lbs. \$20.00 \$8.00 9:00 48 " 99 00 18 .. 50 16 24 0010.00 20 " 54 " 26.0011.00

> In order to prevent deception by unscrupulous dealers, we have had the wheels of the Styles T and K Mowers cast with raised letters, as follows: On one wheel "Joseph Breck & Sons, Corp., Boston, Mass." on the other, "Philadelphia Lawn MowerCo." No others genuine.

REMEMBER . . .

Each machine is fully guaranteed

Style K Philadelphia Mower.

See Special Offers on third page of cover.

Horse Machines.

The Philadelphia Pony and Horse Mowers are the results of an experience of over 25 years and we do not know of a single instance wherein they have failed to give perfect satisfaction. On all government grounds, public parks and fine lawns the Philadelphia Horse Mowers are the leading machines, which is the best

possible recommendation for them. For 1896 new sizes have been added, and on grounds too large for hand machines it is now an easy matter to select a size adapted to the requirements, at a reasonable price.

Before purchasing a machine of this class, we invite correspondence and feel confident that our experience in this branch of the Lawn Mower business will materially aid you in making your selections.

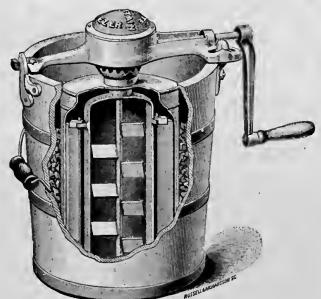

Circulars mailed on application.

Recommended for the majority of lawns.			
36-in. Horse Lawn Mower, with seat and shafts, 450 lhs For large parks and public grounds.	٠	\$160.00	125.00

The 30 and 35-inch machines are made with either open or closed cylinders, all others with open cylinders only. With Horse Mowers a side draft attachment is provided so that the horse may walk on uncut grass. No charge for same is made if ordered with the machine.

In addition to the machines shown in this catalogue we carry in stock all the other mowers made by the Philadelphia Lawn Mower Co., and can furnish same at the lowest cash prices.

Complete descriptive catalogue mailed on application.

THE "IMPROVED"

WHITE MOUNTAIN FREEZER.

Cream can be frozen in 4 minutes in the "Improved" White Mountain.

As features of especial merit, we claim:

A strong waterproof tub, bound with heavy, galvanized iron hoops that fully protect the tub and do not fall off; the gearing completely covered, so that nothing can get between the cogs. Cans full size and made of the very best quality of charcoal tin plate; beaters of malleable iron and tinned; all castings attached to the tub nicely galvanized to prevent rusting. It is the only Freezer in the world having the celebrated duplex dasher, with double self adjusting wood scraping bar, by the use of which cream can be frozen in less than one-half the time, yet finer and smoother than can possibly be produced in any other Freezer now in use. Positively the best Freezer in the world.

BRECK'S PORTABLE HAND FORCE PUMP.

Flg. 700.

GET THE BEST.

Fig. 700, as per illustrations, is a Double-Acting Portable Force Pump. It is made of brass, and therefore impervious to the action of acids and liquids, and will not rust nor corrode. Pump is placed directly in water or other liquid, insuring a perfect suction. It is furnished complete with malleable foot-rest and suitable nozzles for a solid stream and large spray. Pump may be used for washing windows, wagons, in conservatories, gardens, etc., and for general spraying purposes.

NET CASH PRICE.

particulars as to how success may be had in the planting and maturing of flowers. The skilled gardener who has every appliance necessary, often fails in his efforts; while the little girl who has no knowledge of the art, but loves flowers, will frequently surprise not only herself but the older folks, who are not so much interested, with the results obtained by her labor and love. "The Norwegians have a pretty and significant word, 'Opelske,' which they use in speaking of the care of flowers. It means literally 'loving up' or cherishing them into health and vigor."

Mrs. Celia Thaxter, in her beautiful book, "An Island Garden," when touching this subject, says: "You may give them all they need of food and drink and make the conditions of their existence as favorable as possible, and they may grow and bloom, but there is a certain ineffable something that will be missing if you do not love them."

This was her experience, and from it may be gathered the fact that something besides a skilled preparation of the ground and sowing the seed is needful. Of course it is well to know that Poppies delight in a rich, sandy loam, that Eschscholtzias will do best in a poor soil; or of Pansies, give them abundance of old manure, the richest earth you can find, plenty of water and partial shade; that you need not be anxious if it is not convenient to carry water for Nasturtiums in a dry time, for their habitat is dry Chili, and they will thrive in a dryer soil and atmosphere than almost any other plant; or that Zinnias like a heavy, cool clay; Sweet Peas a deep, rich soil and plenty of water, while such gross feeders as Roses, Sunflowers, Hollyhocks, Dahlias, and Asters cannot be planted in too rich a situation; yet,

"To raise your flowers, various arts combine, Study these well, and fancy's flight decline; If you would have a vivid, vigorous breed, Of every kind, examine well the seed; Learn to what elements your plants belong, What is their constitution, weak or strong;

Be their physician, careful of their lives, And see that every species daily thrives; These love much air, these on much earth rely. These, without constant warmth, decay and die; Supply the wants of each, and they will pay For all your care through each succeeding day."

EXPLANATORY.

Our General List of Flower Seeds, it will be found, is divided into the following groups, viz.; Annuals, Perennials and Biennials: Climbers; Greenhouse Plants; Everlastings: Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in the front of book. Following the botanical name is a brief description of the plant—its color, habits, etc. In the first column at the right, the hardiness and duration is given; in the second column, the height of plant; in the third column, the price of seed per ounce; and in the fourth column, the price of seed per packet. To this arrangement and the following abbreviations we have given the most careful attention, and we trust that its simplicity will not only find favor with our customers, but prove valuable to them as a handy reference, to be used in all matters pertaining to floriculture.

KEY TO ABBREVIATIONS.

A designates Annuals - Lasting but one year.

B "Biennials - Lasting two years.

P "Perennials - Lasting three or more years,

" This sign, where affixed to B or P, indicates Biennials or Perennials, which, if sown early, flower the first season.

hA " Hardy Annuals - Seed may be sown in early spring or late in fall.

hhff " Half Hardy Annuals - Seed should be sown about middle or last of May.

tA " Tender Annuals - Seed must be started in artificial heat, and transplanted to open ground about June 1st.

hB or hP designates Hardy Biennials or Perennials - Plants stand the coldest winter without protection,

hhB or hhP

"Half Hardy Biennials or Perennials—Plants requiring to be well protected during winter,
tP

"Tender Perennials—Plants requiring green house protection during winter.

tP "Tender Perennials - Plants requiring greenhouse protection during winter.

WILD GARDEN SEEDS.

Any one who has cultivated flowers in neatly laid out beds, or carefully planned ribbon borders, is aware of the amount of labor and constant attention necessary to produce the desired effect. To those who cannot give this care, we offer "Wild Garden Seeds," a mixture of over one hundred varieties of hardy flower seeds. No one who has not seen such a bed can form an idea of its possibilities, the different seasons of bloom insuring something new almost every day. Half-oz. packets, 20 cts.

BRECK'S COLLECTIONS OF FLOWER SEEDS.

COLLECTION "A," price 25 cts., contains one packet each of Mignonette; Alyssum, white; Sweet Peas, fine mixed; Phlox Drummondi, fine mixed; Portulaca, fine mixed; Chinese Pink, fine mixed.

PLANT DEPARTMENT.

To this important branch of our business we are giving much attention, and are in a position, second to none, to supply Fruit Trees, Shade and Ornamental Trees, Evergreen and Flowering Shrubs, Vines, Herbaceous and Summer Bedding Plants, etc., in all desirable varieties and sizes, at lowest prices. We shall be glad to advise intending buyers as to selection, and also furnish plans and estimates for laying out and planting ornamental grounds.

While we exercise the greatest care to have all Nursery stock pure and reliable, we sell no Trees, Plants, Shrubs or other Nursery stock with warranty, express or implied, in any respect. If the purchaser does not

accept these goods on these terms, they must be returned at once.

The Roses we offer are from the Nurseries of one of the most renowned and extensive growers in Britain. They were grown on a clay soil, in an exposed situation, near the sea, which insures thrifty growth, ripe wood and hardiness. They are all budded very low on the stock, and have fine roots.

The list of varieties is revised, and contains nothing but the really most desirable and distinct kinds.

PLANTING. If possible, select a position sheltered from high winds but open to sunshine. If the soil is not naturally suitable it must be improved—if light, by the addition of rich loam and decomposed cow or stable manure, well worked in; where stiff and heavy, good drainage and rough stable manure are the essentials.

When planting, carefully prune all dead or bruised roots or branches, spread the root fibres as much as possible, and set deep enough to cover the junction of the bud and stock, thereby preventing suckers, and enabling the rose to make roots.

During the growing season, frequent waterings with liquid manure is an advantage. It is easily made by mixing cow manure with water in an old tub or barrel.

In the following list of one hundred varieties we have aimed at selecting those that combine, in the fullest manner, the five requirements of a perfect rose, namely: beauty of color, beauty of form, fragrance, profusion and continuity of bloom, and vigor of growth. To aid our customers in making selection, who cannot give space to a hundred kinds, we have indicated what we consider the best fifty, by prefixing a star *; to the best twenty-five, two stars **; to the best twelve, three stars ***; to the best six, four stars ****.

Strong Plants, 30 cts. each; \$3.00 per doz. Extra Strong Plants, 50 cts. each; \$4.00 per doz. See Special Offers on third page of cover.

HYBRID PERPETUAL ROSES.

THE BEST HUNDRED VARIETIES.

*Abel Grand, silvery rose, large, very free bloomer.

Rothschild.

Strong Plants 30 cts. each, \$3.00 per doz. Extra Strong Plants 50 cts. each, \$4.00 per doz. Special prices for larger quantities upon application.

CLIMBING ROSES

crimson Rambler, the finest climbing rose yet offered; it is a very rapid grower, and produces an immense number of lovely pink flowers. It forms a nice bed if the shoots are pegged down as is sometimes done with Verbenas.

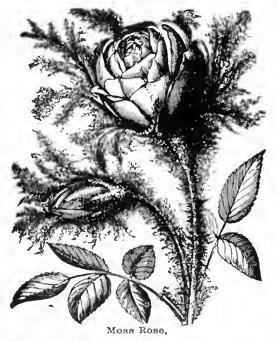

Blairii, a new variety that is unsurpassed as a climber; color, rosy-blush; very large and delightfully fragrant flowers; borne in profusion all summer; perfectly hardy.

Climbing Victor Verdier, a perpetual blooming, hardy, climbing rose; color, beautiful deep carmine; large and well-formed.

Gloire de Dijon, buff, orange centre; splendid foliage: tea scented.

Baltimore Belle, pale blush, changing to white; fine. Queen of the Prairies, bright, rosy red; frequently with white stripe.

Strong Plants. Fifty cents each; \$4.00 per dozen.

Little Gem, white, slightly tinted with pink.

Mme. Cecile Brunner, salmon rose, buff shaded. Mignonette, blush; very fragrant and free flowering.

MOSS ROSES.

Crested Moss. Rose large and full; beautiful.
Glory of Mosses. Blush, very large and full.
Laneii. Rosy crimson, tinted purple; large and full.
Little Gem. Crimson, very small and double; beautifully mossed.
Princess Adelaide. Pale, glossy rose.
Reine Blanche. Fine white, large and full.

Strong Plants, 50 cts. each; \$4.00 per doz ..

AUSTRIAN ROSES.

These are the showiest yellow roses in cultivation; very profuse bloomers, their bright flowers literally covering the bush.

Harrisonii, fine golden Yellow. | Persian Yellow, the deepest yellow. 50 cts. each: \$4.00 per doz.

POLYANTHA, OR FAIRY ROSES.

These are of low, compact habit, producing small, graceful flowers in great abundance. They are perfectly hardy, and will bloom through the hottest and dryest months of summer. Excellent for a border in front of a rose-bed, and for vases. The flowers are especially adapted for personal wear. A most exquisite class, rapidly gaining in popular favor, which they richly deserve.

Paquerette, pure white; dwarf and free flowering. Perle d'Or, saffron yellow, deeper in centre, edges white; very fine.

Price, small plants, 35 cts. each; \$3.50 per doz; large plants, 50 cts. each; \$4.00 per doz.

SINGLE ROSES.

Capucine, dazzling orange scarlet, shading to orange at the base of the petals, very distinct and attractive.

Bracteata, (Macartney Rose,) small, deep green leaves, and large flowers of pearly whiteness.

Rugosa Alba, forms large bushes with deep green, glossy foliage, flowers beautiful pure white, sweetly scented.

Rugosa Rubra, similar to the preceding, but with large rosy crimson flowers, succeeded by cherry-like fruit.

Madame G. Bruant, double white flowers, otherwise resembles R. Alba.

Madame Chas. Worth, double crimson flowers, habit similar to R. Rubra.

Carolina, (Wild Swamp Rose,) Flowers very bright. 25 cts. each; \$2.00 per doz.

Wichuriana, low trailing variety, suitable for covering banks, rocks, etc. Glossy green foliage, pure white, very fragrant flowers. 35 cts. each; \$3.00 per doc.

Strong plants, 50 cts. each; \$4.00 per doz., except as noted.

See Special Offers on third page of cover.

EVERBLOOMING TEA ROSES.

The Teas are tender, and require careful protection. They should not be planted out in spring until all danger of frost is passed. For parlor or conservatory culture they are unequalled.

Catherine Mermet. Bright silvery pink, fragrant. Cornelia Cook. Pale yellowish-white, large and full. Madam de Waterville. Salmon-white petals edged with bright rose. Very free flowering.

Madam Hardy. Pine white, fine substance, full.

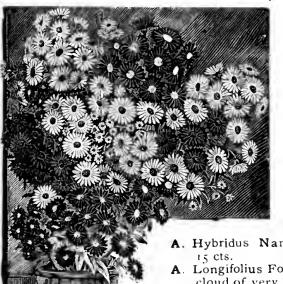

Bon Silene. Rosy-Carmine. shaded, free flowering, | Madam Hoste. Yellowish-white, centre deeper yellow; good form, very free blooming.

Marie Van Houtte. White, tinged with yellow; large. Niphetos. Pale yellowish white, large buds.

Perle des Jardins. Straw color, large and full.

Safrano. Saffron and apricot, very beautiful. Waban. A sport of Catherine Mermet, which it resembles in every way except color; rich, clear pink.

Small plants 15 cts. each, \$1,50 per doz.; Large Plants 30 cts. each, \$3.00 per doz.

Hardy Asters

HARDY ASTERS.

We have in this class some of the most showy, as well as really beautiful and interesting flowering plants in cultivation. All are quite hardy, graceful in habit, and bear such profusion of flowers that they are invaluable in the garden, especially as they blossom when the scarcity of hardv flowers is most marked. The color of the flowers has the widest range. Will thrive in the grass or any rough spot and bloom freely the first season.

A. Alpinus. 9 in. July. Bright purple.

A. Amellus Bessarabicus, 2 ft. Rich purplish-blue flowers with orange centre; one of the finest. 25 cts.

A. Chapmanni. Numerous heads of small flowers of a light clear blue. 15 cts.; \$1 50 doz.

Horizontalis. Numerous branching stems smothered with red and white flowers; pretty, neat habit. 15 cts.

A. Hybridus Nanus. 18 in. Smothered with bright pink and white flowers.

A. Longifolius Formosus. 3 ft. October. A dwarf-growing variety, which is a

cloud of very large, bright, rose-colored blossoms; a superb aster. 25 cts.

A. Novæ Angilæ. 4 ft. Our grandest American species, with thousands of big, violet-purple blossoms; a grand aster. 15 cts.

A. Nova-Belgica, var. Lady Trevellyn. 4 ft. Sept., Oct. Large heads of pure white flowers, with yellow centres. 25 cts. each; \$2 75 per doz.

A. N. Roseus. 4 ft. A most charming variety of the above, with all shades of rose and crimson. The most magnificent of all hardy asters. 25 cts.

A. Ptermacoides. 1½ ft. August, September. Flat, open heads of pure white flowers; fine for cutting. 25 cts. each; \$2.75 per doz.

A. Sibericus. 9 in. Aug., Sept. The plant forms a perfect hemisphere, and is

completely covered with clear pink flowers in autumn. 35 cts. each; \$3.75 doz.

HELIANTHUS.—Perennial Sunflowers.

These form a very important group of bold, showy autumn-flowering plants,

H. Decapetalus. 5 ft. September to frost. Fine free-flowering form, with clear vellow flowers, immense panieles. 20 cts. each; \$2.00 per doz.

H. Lætissorus. A grand percennial sunslower; slowers large and of a rich dark vellow color, the disc also being yellow. Extra strong clumps. 25 cts.
H. Japonicus. This resembles in many respects H. rigidus, but is far the best of

the two. The flowers are deeper in color, of a better formation, and about

three weeks earlier in bloom. 20 cts. each; \$1.50 per doz.

H. Maximus. The Great Perennial Sunflower. An enormous growing variety, 6 to 7 feet, producing immense golden flowers, almost as large as the annual species. This should be grown in every garden where sufficient space could be found for it. The Garden says: "It is, in our opinion, the most beautiful of all sunflowers." 25 cts.

H. Plenus. This is the Double Perennial Sunflower, one of the most useful perennials we have. 20 cts. each; \$2.00 per doz.

H. Orgyalis. A remarkable species, 10 fect high, with foliage as long and narrow as willow leaves, and blooming latest of all, in October, at the tips, high up in the air. Exceedingly graceful and beautiful. 25 cts.

H. Multiflorus Grandiplenus The true variety; a very superior form with flowers

much brighter and better shape than Multiflorus Plenus. 25 cts.

HOLLYHOCKS. — Breck's Silver Medal Strain.

This strain has been awarded a silver medal by the Massachusetts Horticultural Society, and always obtained the first prize wherever exhibited. No other collection can approach this in variety of shades of color, length of spikes, profusion and texture of flowers and foliage.

We offer a fine lot of strong, healthy plants, in all shades of white, carmine, dark maroon, salmon, apple blossom, light and dark crimson, rose, yellow, purple and variegated. 25 cts. each; \$2.50 per doz.; \$18.00

per 100.

HARDY HERBACEOUS PERENNIALS.

This collection, value \$13.75, will be delivered free, as per Special Offer No. 1. on receipt of \$10.00.

Red Dutch, a well-known variety		1.00	7.00	25 cts. each; \$2.50 per doz.	

STRAWBERRIES.

We consider the following the best system for cultivating the strawberry:

Set your plants about one foot apart in the rows, and the rows three feeet apart (it will take about fifteeen thousand plants per acre at this distance), and allow them to make runners to fill up a space of about twelve to fourteen inches wide; that would give you a space about twenty two inches wide for a path.

It is claimed that one can get two thousand quarts more fruit off the same ground grown in these narrow rows than by allowing them to run all over the ground, and

the fruit is of better quality.

They should have from fifteen to twenty cords stable manure per acre, or one ton of ground bone, one-half ton muriate of potash, and four hundred pounds nitrate of soda to be worked into the soil.

In field culture they should be worked once a week with cultivator, and gone over by hand once in two weeks; care should be taken, after runners start to work cultivator always the same way, to prevent breaking runners.

They should be mulched in fall after ground is frozen to protect from thawing and freezing during winter, and part of the mulch should remain during fruiting season. Any good corn land will raise strawberries if properly fertilized.

For garden culture, set plants one foot apart in the row, and the rows two feet apart,

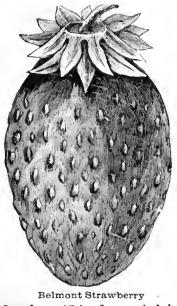

keep the runuers cut off, and otherwise carry out the instructions as given above. The varieties marked "P" are pistillate, and must have a row of staminate, or perfect-flowered varieties, planted say every ten feet among them. Those not marked "P" are staminate or self fertilizing varieties.

Belmont, (S). A strong growing sort, dark crimson. Late. Bubach, No. 5, (P). A productive, bright scarlet variety. Late. Gandy. (S.). A medium sized scarlet-crimson sort, very productive. Medium. (P.) Large, bright crimson, very productive, medium. Greenville.

Leader. (S.) Large, bright crimson berries, exceedingly early and continues in fruit a long time. Early. Marshall (S.) Very dark crimson, fine flavor and good keeper impensely production. Haviland, (P). Glossy crimson, good quality, excellent for heavy soils. Medium. Very dark crimson, fine flavor and good keeper, immensely productive. The very best. Late. 35 cts. per doz.; \$1.50 per 100.

25 cts. per doz.; 75 cts. per 100, except as noted. Special prices on large quantities.

Special offer No. 3 only refers to articles on this page.

PLEASE REMEMBER.

That orders sent in early SECURE THE FIRST SELECTIONS.

That our SPECIAL OFFERS are POSITIVELY LIMITED to ORDERS BY MAIL or EXPRESS ACCOMPANIED BY CASH, postal note, draft on New York or Boston, stamps, express or post-office money order.

That "Special Offers Nos. 2 and 3" are especially advantageous to PARTIES LIVING OUTSIDE of New England; when goods are not mailable, in a majority of cases the 10 per cent. discount will offset transportation charges.

PLEASE NOTE.

We offer such extraordinary inducements for orders sent us by mail or express, accompanied by cash, because we can execute them in the quiet of our mail order department with promptness, dispatch, and with goods of the highest excellence, and increase the volume of our business without impairing the efficiency of its service.

BAGS.—Persons remitting with their orders should include a sufficient sum to cover cost of bags necessary to contain purchase. Prices are: 1 and 2 bushels, 15 cents; 1-3 bushel, 12 cents; 1-4 bushel, 5 cents; 1-5 bushel, 6 cents. The amount charged will be refunded if bags are returned in good condition free of expense to us, within one month from date of purchase.

Juft Brocks for

HOW TO ORDER GOODS.

· ANY DESCRIPTION OF GOODS SOLD BY US MAY BE ORDERED THROUGH THE

American Express Co.'s Purchasing Department,

At places where that Company has agencies. Where the price of goods does not exceed \$5.00 they will advance amount of bill and forward goods to you by first T express, to be paid for upon delivery; thereby saving you the trouble of remitting the money in advance. No charge is made by the Express Company for their service other than a small fee for advancing the money, and the usual rates for carrying the goods.

For full information and supply of Order Blanks, apply to that Company's local Agent in your place.

Fill out the Order Blanks to read, Purchase of

EVERYTHING FOR GARDEN, FARM AND LAWN.
